Description:																								
Protective systems includes Kits for evidence Collection and Detainee Processing (KECDP). The KECDP consists of four (4) kits that support Military Police (MP) and Criminal Investigative Division (CID) elements, providing equipment to restrain detainees, compile accurate documentation at a crime scene, and collect evidence. This standardized collection of evidence and information will lead to successful prosecution of high value targets that are guilty or the release of those deemed innocent. The KECDP will aid in eliminating improperly attained or mishandled processing of evidence found at the point of capture and eliminate the release of persons who would continue to engage in insurgent activities leading to injury and death of U.S. and Coalition Forces. KECDP Estimated Army Acquisition Objective (AAO): Individual Point of Capture Kit (IPOCK) 15,170; Leader Point of Capture Kit (LPOCK) 4,995; Team Evidence Collection Kit (TECK) 1,665; Platoon Evidence Collection Kit (PECK) 1,815.																								
Additional Team Evidence Collection Kit (TECK) 61 will be used towards PACOM OCO effort.																								
Law Enforcement Ensemble Kit (LEEK) - consists of the following: Duty Belt, Belt Keeper, Pouch Handcuff, Surgical Glove Pouch and Flashlight Holder to be used by Military Law Enforcement personnel. LEEK funding will be moved to APE 115020000.																								
FY13-17 BAIS funding has been moved to Base Defense Systems (M90202).

Secondary Distribution	Total Obligation Authority	2.966	1.613	2.314	0.027	2.341	-	-	-	-

Justification:

FY19 Base procurement funding in the amount of \$2.314 million procures 4980 Individual Point of Capture Kit (IPOCK), 1895 Leader Point of Capture Kit (LPOCK) , 615 Team Evidence Collection Kit (TECK), and Platoon Evidence Collection Kit (272) PECK. KECDP kits will give our forces modernized and standardized evidence collection capability supporting the Military Police disciplines (Security and Mobility Support, Police Operations, & Detention Operations) and intelligence collection processes.

FY19 OCO procurement funding in the amount of \$.027 million procures 61 Team Evidence Collection Kit (TECK). KECDP kits will give our forces modernized and standardized evidence collection capability supporting the Military Police disciplines (Security and Mobility Support, Police Operations, & Detention Operations) and intelligence collection processes.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these items are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:												
This line contains Non-Lethal Equipment, All Types.												
M11309 The Acoustic Hailing Device (AHD) is a non-kinetic, long range hauling and warning device capable of producing highly directional sound beams to project warning tones and intelligible voice commands to distances of 300 meters with background noise present at the target's location. AHDs will support Military Police (MP), Transportation units and Psychological Operations (PSYOP), to engage non-combatants during support and stability operations. Less than lethal force is desired and necessary to prevent and minimize civilian casualties. Equipment will allow Soldiers to effectively determine the intent of a person, crowd, vessel or vehicle at a safe distance and potentially deter them prior to escalating to lethal force. This item is Code A, approved for service use.												
M11206 The Remote Deployment Device (RDD) - Single Net solution (SNS) system is wheeled vehicle stopping system. The RDD is capable of deploying a SNS in 2 seconds. The SNS is a single use net with spikes designed to stop wheeled vehicles up to 22,000 lbs. traveling up to 30 mph within 200 ft. The SNS can be hand emplaced or remotely deployed with an RDD from a standoff distance of up to 100 meters. A complete RDD-SNS system includes (1) RDD and (2) SNS. This item is Code B, not approved for service use.

Description:																	
Base Defense Systems (BDS) includes Non-Intrusive Inspection Systems (NIIS) (M90108), Battlefield Anti-Intrusion System (BAIS) (M90202), Lighting Kit Motion Detection (LKMD) (M90204), Integrated Ground Security, Surveillance and Response Capability (IGSSR-C)(M90106) Ground-Based Operational Surveillance System (Expeditionary) (GBOSS-E) (M90212), Tactical Security System (TSS) (M90220) and Integrated Base Defense (IBD) Kitting (M90115)																	
NIIS is a family of systems that inspects for the presence of explosives, weapons and other contraband in vehicles, cargo containers and personnel from a distance providing stand-off ballistic and blast protection. The current family of systems includes the Z-backscatter Van (ZBV), Military Mobile Vehicle and Cargo Inspection System (MMVACIS) and personnel scanners such as the Secure-1000. All systems are either mobile or fully re-locatable. It is a force multiplier that maximizes protection of personnel, equipment and installations while minimizing manpower requirements. NIIS provides the capability to non-intrusively inspect vehicles, cargo containers and personnel for the presence of explosives, weapons or other contraband which can kill or injure Soldiers and destroy critical warfighting materiel. NIIS supports the urgent need for Counter-Improvised Explosive Device equipment to support military operations.																	
BAIS is a compact, modular, light-weight, unattended tactical ground seismic/acoustic sensor that provides tactical units and Forward Operating Bases with an enhanced force protection capability. BAIS enhances force protection and provides early detection and warning of personnel and wheeled or tracked vehicles, increasing situational awareness during defensive and ambush-type operations. BAIS can be integrated into a layered system of systems force protection plan for small tactical units. BAIS is also one of the sub-systems included in the Force Protection Suite that is part of the Base Expeditionary Targeting and Surveillance System, Combined, employed in Forward Operating Bases (FOB) and Combat Outpost (COP) defense and force protection. BAIS provides combat Soldiers a force multiplier force protection system that significantly increases the combat potential and Soldier survivability, enhancing the probability of successful mission accomplishment. BAIS replaces the Platoon Early Warning System (PEWS), which is no longer in production. The Army Acquisition Objective (AAO) is 8,933 systems.																	
LKMD is a lightweight, man-portable, easily emplaced and recoverable motion activated warning device. LKMD provides an early detection and warning capability enhancing force protection and situational awareness during all types of combat operations. LKMD is a motion activated (Infrared (IR) and Microwave) warning and illumination (visible light, IR and strobe) system. LKMD can be employed in a stand-alone configuration or as part of an integrated protection plan. LKMD provides small-unit Commanders with close-in warning of imminent intrusion and illuminates the intrusion where it occurs, permitting easier identification and facilitating appropriate responses. LKMD systems will be organic to appropriate tactical units. LKMD provides support systems to Army units either operating in or deploying to combat theaters, thereby increasing force protection posture. The Army fielding plan, based on the approved Basis of Issue Plan, requires systems be provided to the following types of units: Military Police, Infantry, Armor and Combat Engineers. LKMD replaces the M49 Trip Flare, Electronic which is no longer in production. The Army Acquisition Objective (AAO) is 23,545 systems.

Line Item MDAP/MAIS Code: N/A																				
<p>The IGSSR-C is a Joint Requirement that provides a layered approach to integrate sensors, sensor systems and unmanned systems with automated fusion capabilities to create an in-depth security, surveillance and response Force Protection (FP) COP capability for CONUS fixed, OCONUS semi-fixed or expeditionary elements in all Operating Environments (OE). This capability will enable rapid decision analysis, speed the response process as well as increase information dissemination horizontally and vertically along the chain of command and with outside supporting organizations. IGSSR-C is a software centric fusion engine that connects legacy and emerging FP systems, legacy Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE), unmanned systems, biometric identification and forensic data systems. The desired end state is to achieve interoperability with current and emerging FP systems used by Joint Forces, Department of Defense (DoD) agencies and multi-national forces.</p> <p>Ground-Based Operational Surveillance System (Expeditionary) (GBOSS-E) will replace the interim Persistent Surveillance System-Ground (PSS-G) Increment 1 towers with improved persistent surveillance capabilities and will provide network integration and better mobility utilizing modular configurations. GBOSS-E will replace obsolete, quick reaction capability (QRC) surveillance and force protection systems utilizing modular configurations: Light (man transportable/detachable) for extra small base camps or small outpost/company, Medium variant (mid sensor height) for small to medium size base, and Heavy variant (high level sensor height) for large contingency base camps. GBOSS-E will operate in a stand-alone mode or as part of an integrated network utilizing government owned software, be easily operated and maintained, and be rugged enough to support employment in expeditionary operations worldwide.</p> <p>The Tactical Security System (TSS) provides a modular, scalable, lightweight, rapidly deployable, ground based security and surveillance Family of Systems designed for hasty emplacement to support short and long term security, surveillance and detection missions. The system will be tailor able to support various missions including internment/resettlement operations; perimeter security; internal security within base camps or installations; external security outside the perimeter and route clearance. TSS will be employed at fixed, semi-fixed or expeditionary sites providing all weather imaging during daylight/twilight and during periods of limited visibility regardless of environmental conditions to enhance the Commander's situational awareness and increase Soldier survivability. TSS is designed to be employed as a stand-alone, in a layered effort or integrated with additional force protection systems including motion, acoustic, seismic, surface and subterranean detection technologies. TSS will address four of the five base camp core protection/security capabilities identified in the IBD Concept of Operations including perimeter security, entry control, persistent surveillance and warning and alerting. TSS can be employed in support of contingency, short-notice, early-entry operations in a variety of weather and terrain from open desert to complex urban environments. TSS will assist in countering individuals and provide clandestine observation of detainees, individuals, either on foot or in vehicles from intruding into areas designated for security purposes. TSS will allow the Commander to detect and observe enemy or adversarial forces from a distance prior to entering the base area of operations. This advanced warning will allow the Commander to better deploy forces in a more effective manner to mitigate threat.</p> <p>The purpose of IBD Kitting is to harvest and refurbish physical security and FP Non-Standard Equipment and package them into integrated and interoperable IBD capabilities. IBD packages support expeditionary ground operations and provide a bridge to the enduring IBD capability. IBD kits are integrated into a System of Systems (SoS) to provide an interim IBD capability to increase protective effectiveness, enhance situational awareness and reduce troop-to-task requirements. In support of JUONS 0540 to address the Vehicle Borne Explosive Device (VBIED) threat, additional sensor systems will be procured and integrated into the current Force Protection infrastructure.</p> <p>In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.</p>

Justification:

FY19 Overseas Contingency Operation's (OCO) Procurement in the amount of \$31.976 million provides hardware equipment for Integrated Base Defense (IBD) Kitting in support of Capability Retention Requirement and Implementation Plan (CRRIP). FY19 Overseas Contingency Operation's (OCO) Procurement in the amount of \$7.224 million provides wide area motion imaging sensors in support of JUONS 540 capability gaps.

In accordance with Section 1815 of the FY2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities. All quantities and funding are for Active Components.

Description:																	
Funds acquisition of critically required Chemical Biological equipment needed to support Army mission requirements in five primary categories: Collective Protection (M01006), Decontamination (M01007), Contamination Avoidance (M01008), Individual Protection (M99001), and Weapons of Mass Destruction (WMD) Elimination (M01011). Collective protection platforms include hard and soft wall shelters, vehicles, and structures. The Contamination Avoidance program includes systems that provide detection, identification, collection and reporting of Chemical, Biological, Radiological and Nuclear (CBRN) hazards. The Individual Protection program provides Protective Masks and test equipment. The WMD Elimination (M01011) procurement efforts support missions to systematically detect, locate, characterize, identify, secure, disable and/or destroy WMD weapons, materials and related capabilities within CONUS, OCONUS and Theater.

Justification: Collective Protection (M01006):										
FY19 Base dollars in the amount of \$19.136 million supports the procurement and fielding of seven Chemical Biological Protective Shelter (CBPS) Systems and thirty-six Joint Expeditionary Collective Protection (JECP) systems. The CBPS provides the Forward Surgical Team (FST) and the Area Support Medical Company (ASMC) with a CB protective shelter system that allows their mission to continue in a chemical/biological environment. The FST and ASMC, which by doctrine must function together, are critical assets to the Brigade Combat Team Commander. The CBPS also provides chemical protective shelter capabilities to the Role 1 Medical Treatment Facility (MTF)/Battalion Aid Station (BAS) mission.										
----- Contamination Avoidance (M01008):										
FY19 Base dollars in the amount of \$86.000 million supports the Integrated Early Warning (IEW), the procurement of CBRN Robotics, MRDS, PINS, RAZORS, and HAPSITE. This equipment will be used to increase unit and individual survivability.										
----- Decontamination (M01007):										
FY19 Base dollars in the amount \$36.000 million support the procurement and fielding thirty-five High Mobility Decontamination Systems and forty-two Mass Casualty Decontamination systems that will increase unit and individual survivability.										
----- RADIACT SET AN/PDR 77 (M01280):										
FY19 Base dollars in the amount of \$32.818M supports the procurement and fielding of the Joint Personal Dosimeter - Individual. This equipment will be used to increase unit and individual survivability.										
----- FY19 Overseas Contingency Operation dollars under Collective Protection in the amount of \$2.317 million supports the procurement and fielding of two Chemical Biological Protective Shelter (CBPS) Systems.										
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:												
The Line of Communication Bridge (LOCB) system provides a 50 meter dry gap crossing capability and a 280 meter wet gap crossing capability to the Multi-Role Bridge Company (MRBC). The LOCB is designed to support equipment up to Military Load Class (MLC) 100 tracked, 120 wheeled (normal crossing) and 120 tracked, 150 wheeled (caution crossing). The LOCB has a roadway width of 4.5 meters. Each 50 meter fixed LOCB system consists of girder beams, cross bracing, decking, guard rails, erection and anchorage sets, tools and all associated hardware, and will come with a ramp set, 5 meter pier, and ground beams. Pedestrian walkways are available. The 280 meter float LOCB system will consist of the same bridge hardware as the 50 meter LOCB and will include additional items to support wet-gap crossing, including pontoons and associated equipment. One 50 meter fixed LOCB will be fielded per MRBC. Forty 50 meter fixed LOCBs and five 280 meter float LOCBs will be located in Army Prepositioned Stock (APS) for rapid deployment to the theater of operations. The U.S. Army Engineering School will have an additional six 50 meter fixed LOCBs and two 130 meter float LOCBs for training. The Milestone Decision Authority (MDA) is assessing the impacts of a potential Directed Requirement (DR) that would increase the LOCB MLC and if the new requirements would be best met through the industrial base or via commercial vendors.												
Commercial panel-truss bridge systems provide the capability to span dry and wet gaps for Military Load Classification (MLC) 80 Tracked / 110 Wheeled vehicle crossings. It is deployed as a semi-permanent bridge to restore and maintain lines of communication routes for heavy volumes of civilian and military traffic. Requirements are in draft to support bridging requirement for combatant command contingency plan.												
LOCB Army Acquisition Objective (AAO): 79												
The Dry Support Bridge (DSB) is a mobile, rapidly erected, modular military bridging system used by the MRBC. The 40 Meter DSB can span a 40-meter gap or two 20-meter gaps. The 46 Meter DSB can span a 46-meter gap or two 28-meter gaps (with the 46-meter upgrade). Both have a crossing capability of MLC 100 Wheeled/MLC 80 Tracked. The DSB has a road width of 4.3 meters and an emplacement time of 90 minutes or less, with little or no site preparation. The DSB will support the Joint Force Commander's ability to employ and sustain forces throughout the global battle space.												
DSB AAO: 112

Justification: FY 19 Base procurement dollars in the amount of \$98.229 million support the procurement of 2 Low Rate Initial Production (LRIP) LOCB system produced at Rock Island Arsenal and 26 commercial dry and wet gap panel-truss bridge systems. The HQDA staff is reviewing a potential Directed Requirement (DR) that would increase the LOCB MLC. The Milestone Decision Authority (MDA) is planning for a Decision Point in 2QFY18 to determine the cost, schedule, performance and risk implications of the potential DR and to decide whether the current Rock Island Arsenal (RIA) Industrial Base material solution or a commercial produced solution is the best approach to meet LOCB these requirements. The LOCB system provides the United States Army with an enhanced support bridging capability to replace the obsolete, 1940s era Bailey Bridge (BB). IAW Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active components and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities. The commercial panel-truss bridge system provides interim LOCB capability for current and emerging operational requirements.

Remarks: The Dry Support Bridge (DSB) is a mobile, rapidly erected, modular military bridging system used by the MRBC. The 40 Meter DSB can span a 40-meter gap or two 20-meter gaps. The 46 Meter DSB can span a 46-meter gap or two 28-meter gaps (with the 46-meter upgrade). Both have a crossing capability of MLC 100 Wheeled/MLC 80 Tracked. The DSB has a road width of 4.3 meters and an emplacement time of 90 minutes or less, with little or no site preparation. The DSB will support the Joint Force Commander's ability to employ and sustain forces throughout the global battle space.

Description:																
The Tactical Float Ribbon Bridge line supports the Multi-Role Bridge Company (MRBC). One Tactical Float Ribbon Bridge System consists of the Improved Ribbon Bridge (IRB) bays (30 Interior and 12 Ramp), 14 Propulsion Bridge Erection Boats (BEB) and 56 Common Bridge Transporters (CBT). These components are required to transport, launch, erect and retrieve up to 210 meters of floating bridge. The IRB has a Military Load Class (MLC) 96 wheeled (normal) and 110 (caution)/MLC 70 tracked (normal) and 85 (caution) and is used to transport weapon systems, Troops, and supplies over water when permanent bridges are not available. This capability will support the Joint Force Commander's ability to employ and sustain forces throughout the global battlespace. The Army plans to have 25 MRBCs.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$64.438 million supports the procurement of 78 Propulsion Bridge Erection Boats (BEB) for Army National Guard and Army Reserve requirements. The newly designed BEB will improve fleet readiness by improving the basic design to meet current survivability, transportability, and interoperability requirements. Funding supports a balanced investment strategy for the Army's approved force structure and Army Force Generation (ARFORGEN) requirements.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:																										
The M1977A4 Common Bridge Transporter (CBT) and M1064 Palletized Load System Trailer (PLST) are part of the Ribbon Bridge System. The CBT transports and launches the Bridge Erection Boat (BEB) and Improved Ribbon Bridge (IRB) Bays in the Multi-Role Bridge Company (MRBC) allowing Bridging formation assets to maintain pace with supported combat units. The CBT is also the transporter and launch vehicle for the Rapidly Emplaced Bridge System (REBS) supporting the 9 Stryker Brigade Combat Teams (SBCT) and 5 Airborne Companies. The Army plans to recapitalize 100% of the CBT fleet; 24 MRBCs (56 each), 9 SBCTs (4 each), 5 Airborne Companies (2 each), 1 European Activity Set (EAS) (58 each), and 24 CBTs in the training base.																										
The Army Acquisition Objective is 1528.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$79.916 million supports the recapitalization of 170 Common Bridge Transporters. The currently fielded M1977A0 and M1977A2 CBTs have significant obsolescence issues due to armor, electrical, and powertrain improvements. The M1977A4 provides the Soldier with key survivability requirements to include a Long Term Armor Strategy (LTAS) compliant cab, new engine and transmission, air ride suspension, anti-lock brakes and traction control, and an updated electrical system to support current and future communications equipment and diagnostic/prognostics systems.

The current strategy for recapitalization will be executed by converting excess M977A4 Cargo Trucks at Red River Army Depot (RRAD). This provides the engineer force with the improved capabilities of the A4 version of the Heavy Expanded Mobility Tactical Truck (HEMTT) at minimal cost. Any production beyond RRAD's production capability will be done at Oshkosh Defense.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Exhibit P-21, Production Schedule: PB 2019 Army										Date: February 2018			
Appropriation / Budget Activity / Budget Sub Activity: 2035A / 03 / 15				P-1 Line Item Number / Title: 3974G07000 / Common Bridge Transporter (CBT) Recap					Item Number / Title [DODIC]: G07000 / Common Bridge Transporter (CBT) Recap				
MFR Ref #	Manufacturer Name - Location	Production Rates (Each / Month)			Procurement Leadtime (Months)								
		MSR For 2019	1-8-5 For 2019	MAX For 2019	Initial				Reorder				
					ALT Prior to Oct 1	ALT After Oct 1	Manufacturing PLT	Total After Oct 1	ALT Prior to Oct 1	ALT After Oct 1	Manufacturing PLT	Total After Oct 1	
1	Oshkosh Corp - Oshkosh	20	924	2,520	0	9	11	20	0	7	5	12	
2	Red River Army Depot - Texarkana, Texas	6	8	12	0	5	4	9	0	5	4	9	

Remarks:
Government EOQ 1-8-5 production rate (924/month) accommodates mix of government and commercial production on contractor's integrated production line. Max rate (2520/month) reflects contractor capacity using second and third shifts dedicated to government production. Minimum production is one heavy truck per day.

"A" in the Delivery Schedule indicates the Contract Award Date.
Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description: The AN/PSS-14 Mine Detecting Set is a lightweight self-contained handheld mine detector system that is operated by a single soldier. It consists of a Ground Penetrating Radar (GPR), improved Metal Detector (MD), and detection algorithms that combine to provide a greatly enhanced capability over the presently fielded metal detector. The AN/PSS-14 provides the Warfighter with the capability to detect improvised explosive devices and the full spectrum of land mines to include metallic and low-metallic mines. This item is Code A, approved for service use.													
Army Acquisition Objective (AAO) is 18,461 sets.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY19 Base procurement dollars in the amount of \$8.471 million procures 306 AN/PSS-14 systems and the support required to field the systems.

TYPE CLASSIFICATION DATE: November 2003

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:													
This is an All Types line covering ground vehicle mounted or towed landmine detection, marking and neutralization systems. This Program Element contributes to Area Access (A2) to support unified land operations and improve soldier survivability. This line is used to procure Improvise Explosive Devices (IED) and landmine detection, interrogation, neutralization, protection, Area Access, route clearance and area clearance capabilities. Procurement of improved detection, interrogation, neutralization and protection capabilities for mine, IED and Explosive Hazard threats are needed as technology becomes available.													
This exhibit contains the following programs:													
Explosive Hazard Pre-Detonation (EHP)													
EHP provides the capability of a Roller System (on the Medium Mine Protected Vehicles (MMPV) Type II), Debris Blower (on the Buffalo Mine Protected Clearance Vehicle), and Wire Neutralization (on the Husky based Vehicle Mounted Mine Detection system). EHP enhances route clearance capabilities while on the move to detect (by encounter), neutralize and survive against a full spectrum of explosive hazard landmines, IEDs, Explosively Formed Penetrator, unexploded ordnance, battlefield munitions and trigger their mechanisms while conducting route clearance operations. The Army Acquisition Objective (AAO) for the Roller System is 344, the Debris Blower is 186, and the Wire Neutralization System (WNS) is 344. (AAO includes European Reassurance Initiative (EDI).													
Mine Clearing Vehicle (MCV)													
The M1271 Mine Clearing Vehicle is a medium, commercially available, blast protected, mechanical flail. The MCV is a manually controlled, self powered vehicle with an adjustable depth flail head designed to clear large areas of anti-tank and anti-personnel land mines. The AAO for MCV is 41.													
Route Clearance Virtual Clearance Training Suite (VCTS)													
The VCTS provides Soldiers at 14 sites the capability for virtual training on Route Clearance vehicles, EHP, and MCV systems.													
Vehicle Optics Sensor System (VOSS)													
VOSS provides a telescoping, gyro-stabilized, high resolution, triple sensor (day camera, Image Intensify Night Vision Sensor and an Infrared Sensor) surveillance system to optically detect from standoff distances, explosive hazards (Improvised Explosive Device (IEDs) and landmines), and their trigger sources. VOSS is mounted on MMPV located within Route Clearance Platoons and Explosive Ordnance Disposal (EOD) Companies. PM Ground Sensors is pursuing an acquisition approach which harvests Quick Reaction Capability (QRC) procured systems for refresh into the Program of Record (POR). The refresh effort will be conducted at Tobyhanna Army Depot.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

Total FY2019 Base procurement dollars in the amount of \$29.883 million procures the following:

FY2019 Base procurement dollars in the amount of \$22.370 million supports the procurement and fielding of Explosive Hazard Pre-Detonation (EHP) systems and Program Management. EHP Debris Blower funding supports fielding, Modification Work Orders (MWOs), special tools and test equipment (STTE), and spares. The Wire Neutralization Systems (WNS) funding supports production and fielding of 55 systems, which includes STTE, and spares. EHP Roller funding supports production and fielding of 59 systems which includes STTE, spares, Limited User Test (LUT) and First Article Test (FAT)

FY2019 Base procurement dollars in the amount of \$7.513 million supports the VOSS refresh and upgrade effort at Tobyhanna Army Depot and continued Total Package Fielding to Explosive Ordnance Disposal (EOD) and Engineers and to complete integration of geo-location capability into previously fielded VOSS.

Total FY2019 OCO procurement dollars in the amount of \$16.000 million procures the following:

FY2019 OCO procurement dollars in the amount of \$10.425 million will support Program Management, printing and shipping of Log Manuals, a portion of the Development of Sustainment Training - Desktop Trainer, and the procurement of 10 Debris Blowers (includes MWO), 10 WNS, and 10 Rollers, to include STTE, Spares and fielding for European Deterrence Initiative (EDI).

FY2019 OCO procurement dollars in the amount of \$5.575 million supports VOSS deployment for EDI.

The FY 2019 funding request was reduced for \$5.113 million to account for the availability of prior year execution balances.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description: The Standoff Robotic Explosive Hazard Detection System (SREHD), formerly known as the Autonomous Mine Detection System (AMDS), provides increased survivability through mine and explosive hazards stand-off detection, marking and neutralization capability for the dismounted soldier. It provides area access and freedom of movement for the Commander. SREHD consists of payload modules to be mounted on man-portable unmanned ground vehicles. The payloads, consisting of detection, marking, and neutralization payloads, are for surface laid and buried threats to include mines and explosive hazards. This capability allows a soldier to remain in a protective posture while detecting and neutralizing a wide variety of hybrid and conventional explosive threats.												
SREHD will transition from PE 0654808A, Project 415, Landmine Warfare/Barrier - Eng Dev, Engineering Manufacturing Development (EMD) phase to Low Rate Initial Production (LRIP) in FY 2018. The Army Acquisition Objective (AAO) for SREHD is 173.

Description:																	
This line is used to procure Improvised Explosive Devices (IED) and landmine detection, interrogation, neutralization, protection, route clearance and area clearance capabilities required for future battlefields. Procurements of improved detection, neutralization, and protection capabilities for mine and IED threats are expected as technology becomes available.																	
The Husky Mounted Detection System (HMDS) is a counter-explosive device capability that provides standoff detection and marking of metallic encased caches and metallic and low-metallic antitank landmines, unexploded ordnance, trigger mechanisms, and improvised explosive devices (IEDs) in support of route and area-clearance operations. HMDS is a mission equipment package, mounted on the Husky route clearance vehicle. The program was restructured in Sep 2016 to align with emerging shallow buried Wire Detection (WD) capabilities integrated onto the HMDS Increment A1 configuration (includes Ground Penetrating Radar (GPR)). These changes are necessary to adapt to changing IED threats. WD technology will be fully integrated through Engineering Change Proposals (ECPs) beginning in FY18. Future capabilities may include detection of deep buried IEDs and caches, and semi-autonomous control of the Husky vehicle and HMDS from inside a follow-on vehicle.

Remarks:

Production rates are monthly.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:																								
This Robotic Combat Support System (RCSS) Budget line procures the M160 Mine Flail and the Route Clearance and Interrogation System (RCIS) Type I.																								
The M160 is a 6.1-ton tracked, combat engineer vehicle designed for teleoperation by soldiers from either mounted or dismounted positions to perform area clearance of antipersonnel mine-sown areas. The revised Army Acquisition Objective (AAO) is 72. The M160 detonates or destroys anti-personnel mines in a 68-inch wide path through the action of a rotating chain and hammer flail system, a mine roller, or earth moving blade. The M160 provides standoff and increased protection for engineer units conducting route and area clearance missions. It fills the Light Flail mission in the Area Clearance Family of Systems. The M160 is a program of record, developed from a modified Commercial Off The Shelf (COTS) system.																								
The Route Clearance and Interrogation System (RCIS) Type I and Type II will enable an operator to semi-autonomously control (tele-operate) a High Mobility Engineering Excavator (HMEE) and an RG-31, Medium Mine Protected Vehicle. The RCIS Type I enables the Soldier to semi-autonomously control a HMEE, enabling operators to interrogate, classify and excavate deep buried explosive hazards, Improvised Explosive Devices (IEDs), and caches in a wide range of road surfaces and soil conditions from a standoff distance for Soldier protection. The RCIS Type I AAO is 266. RCIS procurement is scheduled to start in FY20.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
Justification: FY 2019 Base procurement dollars in the amount of \$4.029 million supports Total Package Fielding of M160s to Army IBCTs / National Guard / Reserve Area Clearance Platoons, M160 Technical Manual Development, New Equipment Training, Increased PM Fielding Staff, and provides Contractor Logistics Support (CLS) for maintenance actions of fielded M160s. FY 2019 Base procurement funding request was reduced by \$1.046 million to account for the availability of prior year execution balances.									
FY 2019 OCO procurement dollars in the amount of \$4.850 million will procure eight M160s which were destroyed in threathre and sent to support an approved Operation Needs Statement (ONS), restoring the program Army Acquisition Objective (AAO).									
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:												
The Man Transportable Robotic System, Talon 5a robot is a key enabler to Explosive Ordnance Disposal (EOD) soldiers, providing unmanned investigation of suspicious objects and potential Improvised Explosive Device (IED) threats, with increased manipulation capability to interrogate threats from a safe standoff distance. The robot also provides real time intelligence, surveillance and reconnaissance while accessing sites, performing route clearance missions, conducting render safe operations, and disposing of hazardous material in a high risk contaminated environment. The recapitalization effort will maximize the use of the legacy MTRS fleet by restoring currently fielded systems to a like-new condition in appearance, performance, and life expectancy, while inserting new technology where practical, to improve reliability and maintainability. The result of the recapitalization rebuild is a system with the same model and a new life. These robots were not reset subsequent to Operation Enduring Freedom. The fleet will bridge the capability gap through Fiscal Year 2028 when the program of record Man Transportable Robotic System Increment II is fielded to EOD units.												
The Common Robotic System, Heavy (CRS(H)) is a modular large-sized system that provides enhanced protection to the EOD Soldier in order to support the Joint Force Commander with the ability to identify, render safe and dispose of explosive ordnance (EO) and improvised explosive devices (IEDs) in support of the Range of Military Operations (ROMO) and Home Land Defense (HLD) operations. CRS(H) will also enable EOD Soldiers to execute Defense Support of the Civil Authorities (DSCA) operations in response to requests from federal, state, local, and tribal authorities for domestic incidents, emergencies, disasters, designated law enforcement support and other activities. CRS(H) will support current and future missions for Explosive Ordnance Disposal (EOD) and Chemical Biological Radiological and Nuclear (CBRN) units.												
The Army Acquisition Objective (AAO) for MTRS MK II robots is 587. The Army Acquisition Objective (AAO) for CRS(H) robots is 225.												
This SSN transitioned from Program Executive Office, Ammunition (PEO AMMO), Project Manager Close Combat Systems (PM CCS) to Program Executive Office, Combat Support and Combat Service Support (PEO CS&CSS), Robot Logistics Support Center (RLSC), in FY 2016, per Army Acquisition Executive (AAE) memorandum dated 28 July 2014.

Justification:

FY 2019 Base procurement dollars in the amount of \$14.208 million supports the recapitalization of 78 Man Transportable Robotic System (MTRS) MK II platforms. The currently fielded MTRS MK II platforms have obsolescence issues due to software and electrical unit upgrades. Recapitalization of the MTRS MKII platforms will reduce sustainment costs and accommodate the integration of interoperable payloads. Completion of the program will extend the life of the system through the next decade until this bridge capability is replaced by the program of record MTRS Inc II in FY 2028.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:

The Soldier Borne Sensor (SBS) is a situational awareness system, providing the squad with an organic "quick look" capability for real-time video feeds of larger, complex, and restrictive environments. SBS reduces exposure to potential threats and enhances freedom of maneuver by providing actionable information to support decisions at the lowest echelon. The Army Acquisition Objective (AAO) for this program is 7,175.

The Man-Transportable Robotic System (MTRS) Inc. II is a modular medium-sized system providing a multitude of standoff capabilities through different payloads for the Army. These capabilities include detect and confirm presence, identify disposition, and counter hazards by providing a platform for payloads in support of current and future mission requirements. MTRS Inc. II will support current and future payload missions for the Engineer's route clearance platoons, Special Operational Forces (SOF) detachments, Chemical Biological Radiological and Nuclear (CBRN), and Explosive Ordnance Disposal (EOD) Units. Approved Acquisition Objective (AAO) of 1,210.

The Common Robotic System (Individual) {CRS(I)} is the Army's small sized (<25 lbs) Soldier back-packable, remotely operated, common robotic system. The system provides dismounted Soldiers with increased standoff capability from hazardous threats. The system consists of a Universal Controller (UC), a suite of payloads, and open architecture common mobility platform allowing for future capability growth. The CRS(I) will be designed so the operator can quickly re-configure for other various missions by adding or removing modules and/or payloads. The CRS(I) will provide interrogation, detection, confirmation, and neutralization capabilities employed to support a wide spectrum of mobility missions for current and future forces. This capability provides commanders the ability to persistently monitor the operating environment (OE) while protecting and sustaining the force. The CRS(I) complements the Joint Integrated Warfighting Force by providing standoff to the Warfighter during major combat, stability, and homeland security operations. The Approved Acquisition Objective (AAO) 3,258 systems.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$3.161 million for the Common Robotic System (Individual) {{CRS (I)}} supports the procurement of 20 Low Rate Initial Production (LRIP) assets, engineering, logistics data, and System Engineering Program Management (SEPM).

FY 2019 Base procurement dollars in the amount of \$6.615 million for the Man Transportable Robotics System Increment II (MTRS Inc II) supports the procurement of 43 production systems, engineering and logistics data and System Engineering Program Management (SEPM).

FY 2019 Base procurement dollars, in the amount of \$21.680 million, supports the procurement of 1,084 SBS systems.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L 110-151), these items are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description: The Explosive Ordnance Disposal (EOD) equipment provides the capability to examine, identify, and defuse ordnance effectively and safely for Homeland Defense and Force Protection throughout the world. This equipment enables EOD soldiers to rapidly and safely render safe Unexploded Ordnance (UXO) and Improvised Explosive Devices (IEDs) that constitute a hazard to friendly operations, installations, personnel, or materiel, and is also used for dismounted operations. EOD equipment will be fielded throughout the active Army and National Guard units.																	
Decision Support System (DSS) -- Common control station hardware and software for all EOD systems. The Army Acquisition Objective (AAO) for DSS is 700.

Description: Radio Frequency Remote Activation Munition System (RF RAMS)(MK152) M60002 is a radio-controlled wireless firing device that provides the capability to wirelessly control the initiation and the detonation of demolition charges or the remote operation of other items such as laser markers and radio functioning munitions. The basic components of the RF RAMS complete set are (1) MK26 Transmitter with two antennas, (6) MK16 Receivers with antennas and (1) M6 Battery Retainer which provides additional power for the transmitter. RF RAMS has a nominal range of 2 kilometers line-of-sight (LOS) and 5 kilometers LOS with the M6 Battery Retainer. The Shock Tube Initiator (STI) M50 is an associated component/interface that is required when using the MK152 to initiate Modernized Demolition Initiators M19, M21 and M23. This item is Code A, approved for service use.															
Justification: FY 2019 Base procurement dollars in the amount of \$1.748 million supports initial fielding and deployment of RF RAMS. FY 2019 OCO procurement dollars in the amount of \$0.001 million supports initial fielding and deployment of RF RAMS. FY 2019 OCO includes \$0.001 million to support the COCOM requirement for unit equipment sets to deter potential adversaries and support the European Deterrence Initiative. In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses and providing military support to civil authorities.

<p>Justification: FY 2019 Procurement dollars in the amount of \$7.829 million supports the procurement of 47 M303 Blasting Demolition Kits. It also supports initial fielding and deployment of Blasting Demolition Kits to combat engineers. Requirements support approved Combatant Commander Operational Plans, Homeland Defense, and other directed missions. Training requirements support individual and collective training of Active and Reserve Component forces at Army schools, home station and the combined training centers.</p> <p>In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses and providing military support to civil authorities.</p>

Description:																								
The Family of Boats and Motors (FoBaM) consists of 7-person Inflatable Combat Raiding Craft (I-CRC), 15 person Inflatable Combat Assault Craft (I-CAC), Common Motor, and Rigid Inflatable Boat (RIB). The 7-person I-CRC, 15-person I-CAC, and Common Motor replace current outdated legacy systems. The RIB adds a new capability to the field. All systems support both engineer and special forces in a variety of operations such as: assault landings; reconnaissance and river crossing operations; infiltration and exfiltration; long-range surveillance; amphibious raid, surface swimming, dive, submarine, ravine, anti-mine, bridging, and air operations; underwater construction; underwater repair work; dam and pier repairs; light salvage; and humanitarian aid/disaster relief. Army Acquisition Objective (AAO) for FoBaM is: 7-person I-CRC 394, 15-person I-CAC 528, Common Motor 932, and RIB 19.																								
Funds in this program are realignment of funds from program items Less than \$5M, SSN ML5301 for more efficient, effective program management.

Justification:

FY19 Base procurement dollars in the amount of \$5.806 million supports a quantity of 140 Common Motors, 4 RIB, 77 7-person I-CRC, and 51 15-person I-CAC. Providing soldiers these systems will give them the capability to complete required missions, provide support to civil authorities and deter and defeat hybrid threats in support of Army requirements.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these item are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:																								
This budget line represents the Army's family of Improved Environmental Control Units (IECUs), commonly known as Air Conditioners. IECUs provide cooling and supplemental heating for Army tents and shelters. Systems range in size from 9,000 to 60,000 British Thermal Units/hour (BTU/hr) and are powered by common electrical currents supplied by both mobile electric power systems and standard commercial facilities. IECUs also provide dehumidification and filtering of air in support of environmentally sensitive electronic equipment in mobile shelters and vans. IECUs support critical electronic equipment that would not support the Army mission without proper environmental control. IECUs support numerous major tactical weapon systems. The majority of the supported weapon systems are command, control, and communication items. Other applications include medical facilities, expeditionary basing, support equipment, satellite communications, intelligence gathering systems, petroleum and water logistics laboratories, electronic shop sets, Test Measurement and Diagnostic Equipment (TMDE), aviation shop sets and topographic support sets.																								
The IECU program will provide a new generation of Environmental Control Units (ECUs) that use environmentally approved refrigerants, with zero ozone-depleting chemicals (ODCs), to replace the current Military Standard (MIL-STD) Family of ECUs. The IECUs will provide improved cooling, heating, and dehumidification to soldiers and materiel systems in combat, combat support and combat service support units. IECUs are required to replace currently fielded environmental control units in order to comply with statutory and regulatory restrictions on the use of Class II Ozone Depleting Chemicals (ODCs) and to increase the performance of military ECUs. They are form, fit and function replacements to the current MIL-STD ECUs. IECUs operate at wider operating temperatures, are more ruggedized than commercial ECUs, and employ embedded diagnostics and automatic safety controls. Technical improvements over existing military-standard ECUs will yield significant fuel and weight savings, reduction in scheduled maintenance, and increased reliability.																								
60,000 (3 phase / 50-60 hertz) BTUH (British Thermal Units per Hour) Army Acquisition Objective (AAO) = 2,432 9,000 (single phase / 60 hertz) BTUH AAO = 1,130 18,000 (3 phase / 60 hertz / 208V) BTUH AAO = 2,231 18,000 (single phase / 60 hertz / 230V) BTUH AAO= 842 36,000 (3 phase / 60 hertz) BTUH AAO= 1,318

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									

Justification:

FY 2019 Base procurement dollars in the amount of \$9.852 million supports the family of Improved Environmental Control Units 9,000 BTU/hr (British Thermal Units), 18,000 BTU/hr and 36,000 BTU/hr IECUs that are required as a component or separately authorized in support of fielded tactical weapon systems. They are required to fill existing shortages or provide replacement for assets that are over age, non-supportable, and non-repairable. The IECUs are critical to the systems they support. Additionally, IECUs are required to fill urgent shortages on new fieldings of high priority weapon systems. They are used in select shelters which house critical life-saving operations in Combat Support Hospitals and storage of perishable supplies in Brigade Support Battalions. The 9,000 BTU/hr, 18,000 BTU/hr and 36,000 BTU/hr IECUs provide an EPA compliant capability to the force structure before commercial/military stocks of previously used refrigerant are exhausted and no longer available.

FY 2019 OCO procurement dollars in the amount of \$0.270 million supports the European Deterrence Initiative effort.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks:

On 29 Sep 2017, new production contract awarded to procure LRIP quantities in FY17 and FY18 and FRP quantities starting in FY19. Contract work expected to resume after GAO protests are resolved (Target 30 Jan 2018). Delay due to protests will push production of LRIP and FRP quantities back approximately 4 months from original schedule.

Description:																								
The Soldier Enhancement Program (SEP) was established by the National Defense Authorization Act for Fiscal Year 1990 and 1991. The SEP evaluates available Commercial Off the Shelf (COTS), Government Off the Shelf (GOTS) and Non-Developmental Item (NDI) equipment to determine if items have the potential to provide increased combat effectiveness to the Soldier. The SEP funding provides a means of procuring individual equipment designed to increase the Soldiers' operational effectiveness for evaluation.

Justification:

FY 19 Base procurement dollars in the amount of \$5.948 million support procurement of Personnel Recovery Support System (PRSS) products that support the Army's capability to report and locate isolated, missing, detained and captured Soldiers. Funding procures equipment and materiel to support a balanced investment strategy for the Army's approved force structure.

FY 19 OCO procurement dollars in the amount of \$4.300 million funds the purchase of Secure Personal Locator Beacons and associated support services for use in overseas contingency operations by the active and reserve components of the Armed Forces.

All funding assigned to the Active Component.

The AAO is 62,909.

Description:												
The Nett Warrior (NW) (named in honor of Medal of Honor recipient Colonel Robert C. Nett and also known as Ground Soldier System) leverages commercial smart phone devices and secure Army tactical radios to provide the dismounted leader an integrated mission command and situational awareness system for use during combat operations. The NW system provides operators real-time information on friendly positions, information about enemy activity and movement, navigational data and map imagery, and other mission related graphics. This information effectively puts the power of the entire Army tactical network in the hands of the dismounted leader. The NW system also provides the same integrated mission command capability tied to Joint Battle Command Platform (JBC-P) to tactical vehicle mounted leaders so that upon dismount, they still have access to the common operating picture (COP) and full situational awareness. This capability provides the dismounted leader faster, more accurate decisions and reduced fratricide in the tactical fight. NW also procures supporting power systems aimed at significantly reducing power requirements in the expeditionary environment. The NW also provides the dismounted common computational platform for the Mobile Handheld Computing Environment. Includes integration and interface of products on Soldiers.

Justification: FY19 Base procurement dollars in the amount of \$92.487 million procures NW Soldier worn hardware, NW support equipment, NW system fielding, sustainment of New Equipment Training (NET) and support services for fielding to Army Brigade Combat Teams in Capability Set fielding and Army Special Forces. NW equipped units directly enhance the Army's combat overmatch capability in two Army mission essential tasks: 1) Enhances small unit combat fighting capabilities by providing unparalleled situational awareness and mission command to dismounted combat leaders through an integrated smart device and supporting equipment such as battery chargers and power managers and 2) enables commanders to combine the elements of combat power (mission command, movement and maneuver, leadership, intelligence, fires, information, sustainment, and protection) to engage the enemy and swiftly end tactical engagements and reduce possible fratricide. NW brings the dismounted tactical combat leaders into the Army Network and the acquisition program is aligned with Army Capability Sets providing a balanced investment strategy. Due to the commercial nature of the Nett Warrior system hardware (e.g. smart phones, smart phone cases, screen protectors, memory cards and other associated accessories) and to address diminishing manufacturing (obsolescence parts), request consolidating the purchase of NW commercial-based items requirements across multiple years in order to execute a buyout of up to three years beyond FY18 as needed.								
FY 2019 Overseas Contingency Operations funding in the amount of \$1.725 million funds hardware and co-located field service support for deployed units.								
"In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities."

Description:																								
These improved renewable systems enable dismounted Soldiers to execute their missions with fewer battery resupplies, thus reducing the logistical burden associated with moving fuel and primary (disposable) batteries. The UBC capability also allows dismounted Soldiers to operate independently for longer missions without being tethered to a large generator, vehicle, or supply train in the most austere operating environments.																								
The Integrated Soldier Power and Data System-Core (ISPDS-C), Conformal Wearable Battery (CWB), and Squad Power Manager (SPM) fill the power and energy gaps created by the increase in mission essential, Soldier portable power consumers, such as situational awareness displays, GPS systems, weapon sensors, radios, and other devices. Specific systems of Soldier Power Integrated (SPI) are the ISPDS-C, the CWB and the SPM. These power solutions include, but are not limited to, individual Soldier worn systems, integrated power management, and renewable energy. This effort is consistent with the Soldier Protection Capability Development Document (CDD) (March 2011), Operational Energy Initial Capabilities Document (26 April 2012), the Sep 2013 Small Unit Power CDD (26 September 2013), and the SPM, ISPDS-C with Conformal Central Power Source (CCPS) Capability Production Document (May 2017).																								
The Universal Battery Charger (UBC) fills the power and energy gap created by the increase in mission essential, Soldier portable power consumers, by providing a sole charging solution capable of providing power to handheld communication devices and a suite of military batteries. The UBC charging solution is suited for the platoon and intended for use in the most austere operating environments. This effort is consistent with the Operational Energy ICD (26 April 2012) and the Universal Battery Charger CPD (27 May 2015). MSC FRP occurred August 2017.

<p>Justification: FY19 Base procurement dollars in the amount of \$30.774 million procures and fields Integrated Soldier Power Data System - Core and Universal Battery Chargers and associated equipment.</p> <p>The increased digital capability of electronic devices generates an increased demand for power. Historically, innovations in Soldier power struggle to keep pace with the growing power requirements that accompany these increased capabilities. Additionally, batteries add weight and consumes more space in the combat load. Power management is a significant mission planning consideration for the dismounted squad leader who manages combat loads. Dismounted squads operating in the most austere environments have traditionally carried enough batteries to sustain individual Soldier devices for up to 72 hours before resupply. Small Unit Power seeks to reduce the number of batteries that the Soldier must carry to reduce the combat load. The Soldier and the squad are the centerpiece of the modernization strategy, as the U.S. Army develops strategies to effectively equip and train the Soldier of Force 2025; it must reconcile how to power the growing number of Soldier-worn devices while also reducing the Soldier's battery load and decreasing the logistical demand for battery resupply. Soldier and small unit power systems reduce the number of logistical convoys pushing supplies to the forward edge of the battlefield and associated cost and risk involved with battery and fuel resupply missions.</p> <p>"In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities."</p>

Description:																	
Force Provider is a fully integrated system providing critical basic life support for Soldiers deployed in remote areas. A Force Provider module provides billeting, field feeding and hygiene capabilities that include all the integrated utilities to include climate control, power generation, water and waste water systems, and fuel storage. A typical Force Provider module is capable of sustaining 150 personnel. Force Provider is fully containerized for rapid deployment and is transportable by rail, sea, land, and air using C-130, C-17 or C-5A aircraft. With the addition of Cold Weather Kits (CWKs), the module is deployable in temperatures as low as -15 degrees Fahrenheit. Missions for Force Provider are: Base camps for enforcement missions, peace keeping, theater reception/redeployment, intermediate staging base operations, humanitarian aid and disaster relief (both in theater and in austere environments). Force Provider modules are placed in Prepositioned Stocks to meet critical Operational Plan requirements of the Army Service Component Commands (ASCC). Each Force Provider module is configured in 150-Soldier or 50/75-Soldier expeditionary subsets that are capable of operating independently as mission requirements dictate. These systems are configured with optional Resource and Energy Efficiency Kits, Power Generation and Distribution Kits, Cold Weather Kits and Prime Power Kits which increase their deployment versatility. The Army Acquisition Objective for Force Provider is 226 each 150-Soldier modules and 20 each 50/75 Soldier modules. Twenty four of the 150-Soldier Modules will be equipped with energy-efficient Rigid-Walled Shelters in lieu of the standard soft-walled shelters.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 19 OCO procurement dollars in the amount of \$55.800 million supports the production of 12 Force Provider 150-Soldier equivalent systems, 6 Power Generation and Distribution Kits, and 3 Expeditionary TRICON Kits to replace battle losses.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181) this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:																	
The Field Feeding and Refrigeration program provides equipment to conduct tactical food service operations. Field Feeding is a combat multiplier which improves morale and enhances the Soldier's physical and cognitive capabilities. Associated with food service operations are storage, preparation, serving and cleanup. Equipment items include: field kitchens, food sanitation centers, and refrigerated containers. This program supports the production of the Battlefield Kitchen that will replace the over-age and outdated Mobile Kitchen Trailer (MKT) as the Army's midsized kitchen. The Battlefield Kitchen will provide units with a modern, safer, and more operationally and energy efficient capability. It is designed for today's rations and tactical prime movers that meet Army requirements for improved mobility, survivability, and deployability. In Addition, this program supports production of the Multi Temperature Refrigerated Container System (MTRCS) Assault Kitchen (AK), Containerized Kitchen (CK) and Field Feeding Sanitation Center (FSC). This equipment in conjunction with food service personnel and field rations, comprises the Army Field Feeding System (AFFS) which supports the Army standard of a minimum of one hot prepared meal per day in the field. This program provides a critical capability that supports Army transformation and modularity concept while maintaining readiness through fielding and integration of new equipment. It enhances the field Soldier's well being and reduces requirements for related lift demands, combat zone footprint, and logistical support costs.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.									
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
Justification: FY 2019 Base procurement dollars in the amount of \$17.521 million supports production of 51 Multi Temperature Refrigerated Container Systems (MTRCS) for issue upon deployment to Subsistence Platoons, and maneuver and Support BCT's to implement the configured load subsistence supply concept, 73 Assault Kitchens (AKs) to support company level feeding in light through heavy forces; 2 Battlefield Kitchens (BKs) for performance of First Article Test (FAT) and Initial Operational Test (IOT); and 5 Containerized Kitchens (CKs); and Field Feeding Sanitation Centers (FSCs) for Grow the Army.									
The MTRCS provides refrigeration capability for the distribution and storage of rations on the battlefield. The Army was able to reduce manpower by over 500 personnel as a result of the efficiency gained in ration supply operations through use of the MTRCS. The Army is procuring MTRCS to a reduced procurement objective facilitated by a pooled contingency stock of assets to be issued to fill unit requirements at deployment. This allowed the overall requirement to be reduced by over 50% avoiding \$330 million in expense. It is imperative that procurement of this stock continue to be fulfilled in order to meet essential supply demands during contingency missions.									
FY 2019 OCO procurement dollars in the amount of \$1.035 million supports production of 6 Multi Temperature Refrigerated Container System (MTRCS) for issue upon deployment to Quartermaster Supply Companies and maneuver and Support BCT's to implement configured load subsistence supply during contingency operations.									
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:																								
The Advanced Tactical Parachute System (ATPS) is the Army's next generation parachute system for personnel static line airdrop operations and consists of the T-11 (non-steerable) and MC-6 (steerable) systems. The T-11 consists of an integrated harness, reserve parachute and the T-11 main canopy for mass tactical static line airdrop operations. The T-11 replaced the T-10 main canopy, the Modified Improved Reserve Parachute System (MIRPS) and the existing parachute harness. The total Army Acquisition Objective (AAO) of 43,708 has been procured. Fielding was completed in FY15.																								
-Early T-11 and MC-6 parachutes are reaching the end of their service life and replacement systems are being procured. MC-6 procurements began in FY16 and T-11/associated T-11 Pack Tray procurements will begin in FY18.																								
-The RA-1 Parachute System is replacing the current MC-4 ram air parachute system with a multi-mission High Altitude Low Opening (HALO) and High Altitude High Opening (HAHO) standoff capability, that also provides a static line deployed ram air parachute insertion capability. The RA-1 allows personnel to exit at altitudes between 3,500 ft to 35,000 ft Mean Sea Level with a total jumper weight of 450 lbs. The AAO is 5,470 and is being procured from FY14 through FY19.																								
-The Parachutist Navigation System (PARANAVSYS) provides a Global Positioning System (GPS) capability for the RA-1 Free-fall parachutists. Procurement begins in 2018 with an AAO of 5,228.																								
-Joint Precision Air Drop System (JPADS) represents the DoD's next generation of cargo aerial delivery. The system provides autonomous guidance of loads dropped from altitudes up to 25,000 feet Mean Sea Level (MSL) at increments of 2,000 (2K) and 10,000 (10K) pounds. JPADS will allow precise delivery of critical supplies to the Warfighter on the ground while allowing aircraft delivering payloads to fly at significantly safer altitudes. This line includes both 2K and 10K procurement. AAO for JPADS 2K systems is 1557 and the AAO for 10K systems is 467.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
Justification: FY 2019 Base procurement dollars in the amount of \$41.104 million supports the procurement of MC-6 (2200), RA-1 (620), T-11 (2604), T-11R Pack Trays, PARANAVSYS MP (29), PARANAVSYS RTK (38), and PARANAVSYS Protective Case (412). FY 2019 procurement dollars in the amount of \$3.751 million supports production of 28 JPADS 10K systems. The success of JPADS in theater has reinforced the need to execute critical resupply missions without having to place Soldiers and ground vehicle convoys on the ground in high risk situations. Procurement of this system provides a vital precision aerial resupply capability to support the full spectrum of operations. Funding supports a balanced investment strategy for the Army's approved force structure and Army Force Generation (ARFORGEN) requirements. FY 2019 OCO procurement dollars in the amount of \$1.980 million supports production of an additional 60 Joint Precision Airdrop 2K systems for contingency operations. In accordance with Section 1815 of the FY2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks:

Production rates shown are monthly.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:															
The Family Of Engineering Combat and Construction Sets (ECACS) is a family of systems that will support operations by combat and construction engineer teams in urban and rural environments. ECACS sets utilized in urban environment will aid in detection, protection, surveillance, monitoring, evacuation and clearing. ECACS sets utilized in rural environments will allow clearing and troop mobility support areas to include airfields, ports, facilities, and roads. Vertical Skills Engineer Construction Kits (VSECK) has six types which each provide tools and power equipment to meet maintenance and construction mission requirements.															
The Engineer Equipment Set: Urban Operations, Platoon Set (UOpPS) consists of high technology equipment that provides soldiers with enhanced capabilities to perform missions in urbanized or complex terrain. It provides engineers and others with specialized tools enabling them to conduct operations in urban environments in a safer, more expedient manner. The components include thermal scopes, remote viewing instruments, detectors for explosives and gases, portable welders, metal cutting torches, rescue tools, mechanical entry tools, winch, and battery operated drills and saws. The set will standardize tools, reducing logistical support and provide a Type Classified (TC)-standard Army system.															
Army Acquisition Objective (AAO) for Urban Operations, Platoon Set (UOpPS) is 1165.															
The Engineer Equipment Set: Urban Operations, Squad Set (UOpSS) consists of equipment that provides Soldiers with enhanced capabilities to perform missions in urbanized or complex terrain. Components include portal blast shield, collapsible lightweight assault ladders, mechanical entry tools, and rappelling gear. This set supports dismounted engineer Soldiers and others in conducting Military Operations in Urban Terrain (MOUT). The set will standardize tools, reducing logistical support and provide a Type Classified (TC)-standard Army system.															
Army Acquisition Objective (AAO) for Urban Operations, Squad Set (UOpSS) is 1827.															
The Engineer Equipment Set: Hydraulic Electric Pneumatic Petroleum Operated Equipment (HEPPOE) supports combat and construction engineer tasks across the entire spectrum of the operation area such as clearing buildings for repair and construction, clearing areas around road constructions, port openings and any other urban areas that require operations. The HEPPOE consists of 2 power units that provide hydraulic, electric and pneumatic power in conjunction with a rapid inventory 13 case tool load (Concrete Chain Saws, Hammer Drill, Sump Pump, Pavement Breakers, etc.) that will enhance the ability to operate in an urban area. The HEPPOE replaces two legacy systems through modernization, consolidation and optimization. .															
Army Acquisition Objective (AAO) for Hydraulic Electric Pneumatic Petroleum Operated Equipment (HEPPOE) is 752.															
VSECK - Type I Carpenters Tool Kit Squad (CTKS) is a new configuration containing industrial quality hand tools, safety equipment, deployment bags and tool belts for up to eight Construction Engineers secured in a waterproof rapid inventory case. Hand tools include hammers, utility knives, chisels, punches, hacksaws, hand saws, pliers, screwdrivers, squares and tape measures. VSECK Type I replaces one

legacy system through modernization, consolidation and optimization. The legacy system this replaces does not meet current mission requirements and does not have any warranty associated with the current components. Army Acquisition Objective for Type I is 2452.																					
VSECK Type II Carpenters Supplemental Tool Kit (CSTK) is a new configuration containing battery powered & carpentry hand tools to increase productivity at remote sites supporting a platoon size element. The cordless tools are a minimum of 18v and standardized to use the same power source with a power management system capable of recharging multiple power sources simultaneously. Cordless power tools include: hammer drills, right angle drills, circular saws, jig saws and reciprocating saws. VSECK Type II replaces one legacy system through modernization, consolidation and optimization. The legacy system this replaces does not meet current mission requirements and does not have any warranty associated with the current components. Army Acquisition Objective for Type II is 624.																					
VSECK Type III Carpenters Tool Kit (CTK) is a new configuration containing commercial pneumatic, electric & hand carpentry tools that enable Soldiers to perform common carpentry tasks including construction of fighting positions, shelters, base camps, POW camps, temporary structures, bridges, ports & repair of existing structures. Tool load includes pneumatic nailer, blow gun, router, jig saw, 10" circular saw, 14" cut off saw, 12" miter saw, nibbler, electric shears and tile cutter. VSECK Type III replaces one legacy system through modernization, consolidation and optimization. The legacy system this replaces does not meet current mission requirements and does not have any warranty associated with the current components. Army Acquisition Objective for Type III is 272.																					
VSECK Type IV Electricians Tool Kit (ETK) enables 3 electricians to perform construction & maintenance tasks related to distribution & transmission of electrical power: interior & exterior lighting, installation & repair of lighting & wiring aboard ships. Kit contains conduit benders, auger bits, pliers, knives, wood chisels, crimpers, tube & PVC cutters, key sets, levels multimeter, strippers, wrenches, ladders, electric saws & drills and flood lights. VSECK IV replaces one legacy system through modernization, consolidation and optimization. The legacy system this replaces does not meet current mission requirements and does not have any warranty associated with the current components. Army Acquisition Objective for Type IV is 834.																					
VSECK Type V Mason and Concrete Tool Kit (MCTK) includes brick hammers, levels, chalk line, rulers, plumb bobs, trowels, floats, bull floats, specialized floats, screeds, edger, groover, brooms, hoses & nozzles, mortar mixer, scaffolding, sealant sprayer, pliers, vibrator, cut-off saws, grinder, rebar cutters & benders, hacksaws, knee boards, mortar boards & stands, buckets, brushes, laser level, come-a-long, tarps, hoes, rakes & shovels. VSECK Type V replaces one legacy system through modernization, consolidation and optimization. The legacy system this replaces does not meet current mission requirements and does not have any warranty associated with the current components. Army Acquisition Objective for Type V is 538.																					
VSECK Type VI Plumbers and Pipefitters Tool Kit (PPTK) is specialized equipment required by a team of plumbers and pipefitters stock to perform construction and maintenance tasks working with metal, brass, aluminum, PVC or PEX. Contains hand tools enabling performance of individual & collective tasks related to heating & air conditioning, water distribution, waste water removal & solid waste removal. The tool load includes: hammers, hack saws, chisels, wrenches, pliers, putty knives, screwdrivers, saws, level plumb bob, tool box, ladder, powered saws & drills, pry & line up bars, tubing & pipe cutters, floodlight, key set, & plunger. VSECK VI replaces three legacy systems through modernization, consolidation and optimization. The legacy systems this replaces do not meet current mission requirements and do not have any warranty associated with the current components. Army Acquisition Objective for Type VI is 815.

Justification:

FY19 base funding in the amount of \$1.774 million procures 2 HEPPOE. The Engineer Equipment Set: Hydraulic-Electric-Pneumatic-Petroleum-Operated Equipment (HEPPOE) will enhance mission accomplishment by replacing outdated systems. Providing this soldier portable set will allow soldiers to increase capability to complete required missions, provide support to civil authorities, and deter/defeat hybrid threats in support of the Army process. In addition, FY19 Base HEPPOE funding in the amount of \$3.600 million will support an Army Engineer and Research Development Center purchase of Hydrologic Survey vessels for the Korean Deterrence Initiative (approximately 4 sets).

FY19 base funding in the amount of \$6.747 million procures 38 Urban Operations Platoon Sets. The Engineer Equipment Set: Urban Operations, Platoon Set (UOpPS) uniquely fills capability gaps that exist at the platoon level for conducting operations in urban environments. The specialized high technology tools included in this kit provide engineers, infantry, military police and other military units with enhanced capability to conduct operations in urban environments in a safe and expeditious manner. This set will standardize the tools used for conducting urban operations thereby reducing logistical support and provide a Type Classified (TC)-standard Army system.

FY19 base funding in the amount of \$1.680 million procures 22 Urban Operations Squad Sets. The Engineer Equipment Set: Urban Operations, Squad Set (UOpSS) uniquely fills capability gaps that exist at the squad level for conducting operations in urban environments. The specialized low technology tools included in this set provide engineers, infantry, military police and other military units with enhanced capability to conduct operations in urban environments in a safe and expeditious manner. This set will standardize the tools used for conducting urban operations thereby reducing logistical support and provide a Type Classified (TC)-Army system.

FY19 base funding in the amount of \$0.294 million procures 22 Type I VSECK assets. Currently there is a large capability gap in the field that severely needs this materiel solution for a rapidly available, portable and modernized tool kit for the Engineer community. This will increase productivity, expand capabilities, reduce risk and will contribute to rapid mobility of Construction Engineers. Providing this capability to the Soldier will increase the Soldier's ability to complete the required missions, provide support to civil authorities and deter/defeat hybrid threats in support of the Army process.

FY19 base funding in the amount of \$0.779 million procures 32 Type II VSECK assets. Currently there is a large capability gap in the field that severely needs this materiel solution for a rapidly available, portable and modernized tool kit for the Engineer community. This will increase productivity, expand capabilities, reduce risk and will contribute to rapid mobility of Construction Engineers. Providing this capability to the

Soldier will increase the Soldier's ability to complete the required missions, provide support to civil authorities and deter/defeat hybrid threats in support of the Army process.		
FY19 base funding in the amount of \$0.341 million procures 10 Type III VSECK assets. Currently there is a large capability gap in the field that severely needs this materiel solution for a rapidly available, portable and modernized tool kit for the Engineer community. This will increase productivity, expand capabilities, reduce risk and will contribute to rapid mobility of Construction Engineers. Providing this capability to the soldier will increase the Soldier's ability to complete the required missions, provide support to civil authorities and deter/defeat hybrid threats in support of the Army process.		
FY19 base funding in the amount of \$0.541 million procures 21 Type IV VSECK assets. Currently there is a large capability gap in the field that severely needs this materiel solution for a rapidly available, portable and modernized tool kit for the Engineer community. This will increase productivity, expand capabilities, reduce risk and will contribute to rapid mobility of Construction Engineers. Providing this capability to the Soldier will increase the Soldier's ability to complete the required missions, provide support to civil authorities and deter/defeat hybrid threats in support of the Army process.		
FY19 base funding in the amount of \$0.351 million procures 8 Type V VSECK assets. Currently there is a large capability gap in the field that severely needs this materiel solution for a rapidly available, portable and modernized tool kit for the Engineer community. This will increase productivity, expand capabilities, reduce risk and will contribute to rapid mobility of Construction Engineers. Providing this capability to the Soldier will increase the Soldier's ability to complete the required missions, provide support to civil authorities and deter/defeat hybrid threats in support of the Army process.		
FY19 base funding in the amount of \$1.066 million procures 38 Type VI VSECK assets. Currently there is a large capability gap in the field that severely needs this materiel solution for a rapidly available, portable and modernized tool kit for the Engineer community. This will increase productivity, expand capabilities, reduce risk and will contribute to rapid mobility of Construction Engineers. Providing this capability to the Soldier will increase the Soldier's ability to complete the required missions, provide support to civil authorities and deter/defeat hybrid threats in support of the Army process.		
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these items are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:															
Underwater Construction Set (UCS): The Underwater Construction Set (UCS) provides the MOS 12D Diver the tools and equipment required to support all Engineer Diving operations and will reduce the footprint of the legacy set from five individual containers (QUADCON) to four. The UCS includes the following packages: Salvage package used for lifting heavy debris and recovering objects up to 160,000 pounds; Cutting and welding package used for underwater and surface operations; Reconnaissance package with increased capability using Instrument Set, Reconnaissance and Surveying (ENFIRE); Hydraulic tool package used for construction/debris removal and cutting concrete, wood, and metal; and Hand tools and hardware package for surface construction and support tools. Army Acquisition Objective (AAO) for UCS is 5.															
Firefighting Protection Equipment (FPE): The Firefighter Protection Equipment (FPE) is a superior firefighting capability used in critical life and equipment saving situations due to Improvised Explosive Devices (IED) and battle damage. FPE is employed by soldiers as an immediate means to combat vehicle convoy fires and conduct rescue operations to extract trapped and injured soldiers from burning and damaged vehicles. FPE suppresses fires faster which will minimize fire damage and loss of equipment. The FPE set has been given a Joint Designator to support the Army as well as other services. FPE consists three types: Type 1 is a Soldier-portable firefighting set; Type 2 is a skid mounted system, with dual side rails to enhance mobility, capable of being used as a ground or vehicle mounted set; Type 3 is a larger set capable of being mounted as a secondary load to army vehicles or trailers. All three types of FPE provide a superior fire suppression capability for convoy operations in all combat, garrison operations and in all terrain and conditions. FPE equipment supports mounted and dismounted soldiers by increasing firefighting suppression capability at the immediate point of need. Army Acquisition Objective (AAO) is: Type I 9301, Type II 2048, Type III 543.															
Firefighter Individual Requirements Equipment Set (FIRES): The Firefighter Individual Requirements Equipment Set (FIRES) is an assembly of standardized critical life saving fire fighting suits and equipment consisting of a Structural, Aircraft and Wildland fire fighting set to support the MOS 12M Army and Department of Defense (DoD) Firefighters. The FIRES equipment provides the Soldier/DoD Firefighter with the capability to safely conduct life, equipment and property saving fire fighting missions in all terrain, conditions, combat operations, garrison environments and disaster relief support. The FIRES has the deployability, transportability, versatility and functionality to support early entry expeditionary forces, counter- IED operations, and battle damaged equipment recovery. FIRES provides rapid fire fighting capability to commanders at Combat Operating Bases (COB), Forward Operating Bases (FOB) Camp/Station to support all military and sustainment operations. Army Acquisition Objective (AAO) for FIRES is 868.															
Family of High Pressure Breathing Air Compressors (FoHPBAC): The Family of High Pressure Breathing Air Compressors (FoHPBAC) will provide pure breathing air in support of the Self Contained Underwater Breathing Apparatus (SCUBA), Surface Supplied Diving operations, Fire Fighting Missions, and Chemical operations. This set will serve to replace and modernize current equipment and provide current and safe technology for these critical life support systems and supports the following MOS: Engineer Diver (12D), Special Forces Diver (18 series), Rangers combat diver, and 21M Fire Fighters. The FoHPBAC is															

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Army							Date: February 2018																	
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 25: Combat Service Support Equipment					P-1 Line Item Number / Title: 9530ML5301 / Items Less Than \$5M (Eng Spt)

100% commercial off the shelf and will consist of three different compressor variants: Type I 26 Cubic Feet per Minute (CFM), 5000 Pounds per Square Inch (PSI) compressor; Type II Diving 6.0 CFM 5000 PSI compressor; and Type II Fire 6.0 CFM 5000 PSI CFM 5000 PSI compressor with blast cabinet. Army Acquisition Objective (AAO) for FoHPBAC; Type I 12, Type II Diving 40, and Type II Fire 118.																								
Family of Boats & Motors (FoBaM): The Family Boats and Motors (FoBaM) will replace current outdated legacy systems and support both engineer and special forces in a variety of operations such as: assault landings; reconnaissance and river crossing operations; infiltration and exfiltration; long-range surveillance; amphibious raid, surface swimming, dive, submarine, ravine, anti-mine, bridging, and air operations; underwater construction; underwater repair work; dam and pier repairs; light salvage; and humanitarian aid/disaster relief. The FoBaM will consist of a 3-Person Pneumatic Combat Reconnaissance Craft(P-CRC), 7-Person Inflatable Combat Raiding Craft (I-CRC), 15-Person Inflatable Combat Assault Craft (I-CAC), I-CRC Submersible Outboard Motor, I-CAC Submersible Outboard Motor, and a Rigid Inflatable Combat Support Craft (RI-CSC). Army Acquisition Objective (AAO) for FoBaM is: 7-person I-CRC 922, 15-person I-CAC 528, I-CRC Outboard Motor 922, I-CAC Outboard Motor 528, and RI-CSC 29. In FY16, funds in this program are realigned to Family of Boats and Motors, SSN R12001 for more efficient,effective program management.																								
Deep Sea Set (DSS): The Deep Sea Set provides diver-worn critical life support and safety related equipment required to conduct surface supplied diving operations in accordance with all commercial and military safety standards. It includes a full helmet diving assembly that provides air, and protection from pollution, falling debris, and other hazards. It allows for communications with the surface in a dry environment, and is required equipment for construction, cutting and welding, and salvage operations. The set also includes an umbilical assembly that supplies breathing air, depth monitoring and a communications/strength member capable of supporting the diver's weight. The communications assembly allows three divers and the diving supervisor to communicate. The set can be used to a depth of 250 feet and is the only system that protects the diver while conducting heavy construction and salvage operations. Army Acquisition Objective (AAO) for DSS is 6. In FY16, funds for this program are realigned to Family of Diver Support Equipment, SSN R07005 for more efficient, effective program management.																								
Diving Equipment: The critical life support and safety related sets include Underwater Construction Set; Underwater Photo Set; Supervisor, Propulsion, Emergency and Recovery Set (SPEARS) Set; Surface Swimmer Support Set; Individual Swimmer Support Set; Deep Sea Set; and Closed & Open Circuit Set. Engineer divers support Corps/Theater level operations as a force multiplier by performing current diving missions in South West Asia to include debris removal, bridge construction, salvage operations, underwater mine and explosive detection, and personnel recovery operations. Special operations dive teams use the sets for clandestine combat waterborne infiltration/ex-filtration and to aid in search and recovery operations.																								
Pioneer Land Clearing and Building Erection Set: Provides safety equipment for working above ground and for chain saw operation. The set is configured with individual hand and pioneer tools to enable engineer squads to perform individual and collective tasks in a timely manner, such as construction of field fortifications and protective shelters; construction operations in restricted terrain, construction of individual Soldier and critical asset survivability positions; obstacle emplacement and obstacle marking.																								
Army Acquisition Objective (AAO) for Pioneer Land Clearing and Building Erection set is 805.																								
Vertical Skills Engineer Construction Kit (VSECK): The VSECK effort combines eight existing sets into a family of six systems which include hand and power tools used by carpenters, plumbers, pipefitters, electricians, and concrete & masonry craftsmen. VSECK systems leverage the latest in technological advances to support tactical missions providing means for security, stability, transition and reconstruction across Unified Land Operations. The family of VSECK enables Soldiers to efficiently respond to catastrophic events requiring humanitarian aid by enabling civil authority and shaping recovery efforts. Army Acquisition Objective (AAO) for VSECK is: Type 1 - Carpenters Tool Kit Squad (CTKS) 5,517; Type II - Carpenters Supplemental Tool Kit (CSTK) 830; Type III - Carpenters Tool Kit (CTK) 314; Type IV - Electricians Tool Kit (ETK) 928; Type V - Mason & Concrete Tool Kit (MCTK) 892; Type VI - Plumbers & Pipefitters Tool Kit (PPTK) 898.																								
In FY17, VSECK will move to Engineer Combat and Construction Sets (ECACS), SSN R70001 for more efficient, effective program management.																								
Funding will be provided to ERDEC to support the purchase of Fiber Reinforced Polymer matting kits for the airfield damage repair mission to meet force requirements as directed by HQDA G-8. Approximately 30 kits by HQDA G-8. Approximately 30 kits																								
This buys a variety of critical life support equipment such as; diving equipment, fire suppression sets, and soldier portable Engineer kits.

Description:																								
Quality Surveillance Equipment is a family of petroleum and water laboratories used to evaluate the quality of military fuels and palatable water for our soldiers.																								
The Petroleum Quality Analysis System Enhanced (PQAS-E) is a fully integrated fuel laboratory installed in an environmentally controlled International Organization for Standardization (ISO) style shelter mounted on a trailer with support equipment, supplies, and a tent. The mission of the PQAS-E consists of testing fuels received through normal supply channels, locally procured from civil sources, and captured enemy stocks. The PQAS-E is employed as the Army's single petroleum laboratory capable of performing all levels of quality surveillance tests throughout each echelon on the battlefield. The PQAS-E is capable of modified B-2 level testing In Accordance With (IAW) Military Standard (MIL-STD) 3004 on kerosene based (e.g. Jet Propellant [JP] 5, JP-8, Jet A, Jet A-1) and diesel military mobility fuels. The shelter contains fuel test equipment (Automated Instrumentation System [AIS]), support equipment and supplies, an Environmental Control Unit (ECU), and an Auxiliary Power Unit (APU). System software provides an information database/expert system for the technician to consult in the interpretation of test results and in making recommendations for the disposition of fuels. The automated data acquisition features allow test data from instrumentation to be sent directly to the system software, which reduces data transcription errors and eliminates the need for hard-copy laboratory notebooks. The PQAS-E system is being built at Rock Island Arsenal.																								
The Army Acquisition Objective (AAO) is 83 PQAS-E systems.

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 30: Petroleum Equipment		P-1 Line Item Number / Title: 0725MB6400 / QUALITY SURVEILLANCE EQUIPMENT
ID Code (A=Service Ready, B=Not Service Ready): A	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Justification: There is no FY19 Base or OCO procurement funding request for this Program Element.		
Petroleum Quality Analysis System Enhanced (PQAS-E) supports the Modular Brigades and enhances the Petroleum and Water Quartermaster (QM) War Fighting Capabilities. Quality surveillance of bulk fuel is critical to aviation and ground mobility equipment. The PQAS-E gives bulk petroleum quality surveillance capability down to brigade level in a flexible, responsive, mobile lab mounted on a 5-ton trailer. The PQAS-E is required for conducting quality tests on kerosene based and diesel fuels thus ensuring quality surveillance on the battlefield. This will help assure U.S. Armed Ground Forces' strategic responsiveness and its global force projection. The fuels that we put in our warfighting platforms must meet purity standards or it can cause equipment to be non-mission capable.		
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:												
The Family of Petroleum and Water Distribution Systems supports the Army Equipment Modernization Strategy of 2025, along with the Army's mission to supply bulk fuel and water, at the operational and tactical levels, to all Department of Defense (DoD) forces in the various worldwide Joint Operations Area. The systems support aircraft refueling, ground vehicles, and other Army equipment. Distribution Systems are comprised of hoses, pumps, tanks, filter separators, fittings, couplings, and nozzles.												
The Modular Fuel System (MFS) Tank Rack Module (TRM) is a 2,500 gallon mobile storage and distribution platform. It is configured in a 20 foot ISO frame with integrated bale bar and is Heavy Expanded Mobility Tactical Truck-Load Handling System (HEMTT-LHS), Palletized Load Handling System (PLS) and PLS Trailer transportable. The MFS-TRM has a Stand-Alone Retail Capability (S-ARC) with its integrated continuous use electric pump, filter separator and flow meter. It can be operated while truck or trailer mounted or on the ground. The MFS-TRM can also be coupled with the HEMTT Tanker to form a highly mobile 5,000 gallon distribution platform within Brigade Combat Teams. Seven MFS-TRMs and one Pump Rack (PRM) Module form the full Modular Fuel System, which provides the ability to rapidly establish a fuel distribution and storage capability at any location regardless of the availability of construction equipment or material handling equipment. The Army Acquisition Objective (AAO) is 3,340 TRMs.												
The Modular Fuel System (MFS) Pump Rack Module (PRM) is fuel pumping capability for use with Tank Rack Modules (TRM) or Collapsible Fabric Storage Tanks to create a bulk fuel storage and distribution system. The MFS-PRM is configured in a 20 foot ISO frame with integrated bale bar and is HEMTT-LHS, PLS and PLS Trailer Transportable. It has a 600 gallon per minute pump, filter separator, and on board storage with sufficient hoses, fittings and nozzles for eight bulk or retail refueling points. The MFS-PRM and MFS-TRM provide the ability to rapidly establish a fuel distribution and storage capability at any location regardless of the availability of construction equipment or material handling equipment. The full MFS consists of one PRM and seven TRMs. The Army Acquisition Objective (AAO) is 25 PRMs.												
The Load Handling System (LHS) Compatible Water Tank Racks System (Hippo) is a 2000 gallon potable water tank. It is configured in a 20 foot ISO frame with integrated bale bar and is Heavy Expanded Mobility Tactical Truck-Load Handling System (HEMTT-LHS), Palletized Load Handling System (PLS) and PLS Trailer transportable. The Hippo can distribute to multiple locations or be placed on the ground/off-loaded to establish a water supply point. It is outfitted with a water pump, hose reel, and filling station. It is used for bulk load and discharge, retail distribution, and bulk storage of potable water. Hippos will replace the Semi-trailer Mounted Fabric Tank (SMFT) and most Forward Area Water Point Supply Systems (FAWPSS). The Army Acquisition Objective (AAO) is 2,911 Hippo systems.												
The Expeditionary Water Packaging System (EWPS) is a completely containerized fully automated water packaging system that fills and caps one-liter bottles with potable water for individual Soldier consumption. The EWPS features end-to-end automated production (e.g. loading pre-forms, stretch blow molding of pre-forms into bottles, filling, capping, and labeling) within a closed, hygienic environment. It is capable of filling, at a minimum, 900 one-liter plastic bottles per hour. The EWPS is powered by multiple sources to include standard military or commercial generator sets. The finished bottles are palletized for shipment. The EWPS provides the following three main benefits: (1) reduces distribution footprint for bottled water and causalities associated with line haul distribution; (2) provides inherent safety and health

Line Item MDAP/MAIS Code: N/A																					
benefits over bulk systems through reduction of Soldier contamination at bulk system fill points; (3) minimizes the cost associated with procuring and transporting bottled water. The Army Acquisition Objective (AAO) is 30 EWPS systems.																					
The Camel II is an 800 gallon hard wall stainless steel water tank mounted on a 5-Ton trailer. It includes retail dispensing hardware comprised of the hoses and fittings necessary to gravity dispense water. The Camel II also includes integrated freeze protection that can be powered by external sources. The Camel II will partially replace the M149 and M1112 (400 gallon) potable water trailers within Field Feeding Units with Containerized Kitchens (CKs). The increase from 400-gallons to 800-gallons in capacity will decrease the frequency of water refill requirements by reducing the number of resupplies required per day. The Camel II will provide a CK with a greater capacity for carrying one full day of supply (DOS) of potable water required, approximately 1.92 gallons/person/day (gpd), for field feeding (two Unitized Group Rations [UGRs] and one Meal, Ready to Eat [MRE] per day). Current and emerging doctrine dictates the need for a combat enabler that increases unit level storage and DOS capabilities on the battlefield. Camel II will interface with the MTV 5-ton Truck as the prime mover and is operationally compatible with existing and future water purification, transport, and distribution systems. The design of Camel II Increment One includes an allowance for the space and weight necessary for the add-on capability of Increment Two, which includes a modular unit capable of water chilling, circulation, pumping (self-load/unload), and power generation. The Army Acquisition Objective (AAO) is 488 CAMEL IIs.																					
The Early Entry Fluid Distribution System (E2FDS) is a highly automated flexible conduit system that complements the Inland Petroleum Distribution System (IPDS) by providing up to 50 miles of early entry capability for petroleum and water throughput. It can throughput 850,000 gallons of petroleum or 650,000 gallons of non-potable water per day and is able to emplace/retrieve conduit at a rate of 25/10 miles per day respectively. The E2FDS consists of five major modules: automated pump stations, Employment and Retrieval System (ERS), 50 miles of flexible conduit and conduit support equipment, command and control, and a trace planning tool. The components of the E2FDS will be packaged in ISO (nine high stackable) 20-foot equivalent units (TEU) for deployment and are transportable via Heavy Expanded Mobility Tactical Truck (HEMTT) Load Handling System (LHS), Palletized Load System (PLS) and PLS Trailer. During the early phases of operations, the E2FDS reduces the requirement for line-haul petroleum semitrailers and relieves main supply route congestion. The E2FDS enables rapid setup of the conduit trace, and the automation and centralized control enable greater precision of pipeline operations with fewer personnel. Once the IPDS pipeline is emplaced, the E2FDS can be used to extend the pipeline trace or be moved to another location. The Army Acquisition Objective (AAO) is 12 (5 mile sets).																					
The Mobile Tactical Retail Refueling System (MTRRS) provides retail fuel distribution for echelons above brigade organizations. It consists of a 1050 gallon tank, pump, and filter/sePARATOR mounted in a rack that is Family of Medium Tactical Vehicles (FMTV) transportable. The MTRRS can be operated while on the truck or on the ground. It will replace the aging Tank and Pump Unit (TPU) and the Tank Unit Liquid Dispensing (TULD) systems. The Army Acquisition Objective (AAO) is 2,464.																					
The Fuel System Supply Point (FSSP) is a family of systems which consists of three storage capacities: 120K, 300K, and 800K gallon systems. This system is a bulk fuel receiving, issuing, and storing facility consisting of a 600 Gallons per Minute (GPM) pump, 350 GPM pump, 350 GPM filter separator and collapsible fabric storage tanks. The tanks vary in size from 20,000 gallons to 210,000 gallons. The 120K FSSP has 6 ea 20K fuel bags and 2 ea 350 GPM pumps. The 300K FSSP has 6 ea 50K fuel bags and 2 ea 350 GPM Pumps. The 800K FSSP has 4 ea 210K fuel bags and 2 ea 600 GPM pumps. The Army Acquisition Objective (AAO): FSSP 120K is 178 systems, FSSP 300K is 219 systems, and FSSP 800K is 58 systems.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY19 Base funding in the amount of \$39.730 million supports the procurement of the Modular Fuel System (MFS), Hippo Water Distribution Systems, Unit Water Pod System (CAMEL II), Mobile Tactical Refueling System (MTRRS), Early Entry Fluid Distribution System (E2FDS) and Fuel System Supply Point (FSSP). The Army is the executive agent for the Management of Land-Based Water Resources in support of Contingency Operations and has responsibility for all inland distribution of fuel and water to include support to other services. Distribution Systems support the Stryker Brigade Combat Teams (SBCTs), Brigade Combat Teams, Field Artillery, Maneuver Enhancement Brigades, and the Petroleum and Water Quartermaster (QM) modular force war fighting capabilities. These systems are the Army's primary means of distributing and issuing retail and bulk petroleum and water. The Army cannot fight without clean water and fuel. These systems enable the Army to achieve its Force 2025 vision by providing highly mobile and self-sustaining equipment to hostile theaters of operation. The ability to rapidly, efficiently, and safely distribute fuel on the battlefield is a critical combat enabler. Funding supports a balanced investment strategy for the Army's approved force structure and Army Force Generation (ARFORGEN) requirements to support Active, National Guard, and Reserve Components.

The FY 2019 funding request was reduced for \$ 19.094 million to account for the availability of prior year execution balances.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:

Combat Support Medical (CSM) represents the equipping component of a broad band of operational medical and health service support (hospitalization, combat stress, dental, veterinary, optical, and preventive medicine) capabilities that promote, improve, conserve, and restore the mental and physical well-being of Warfighters across the broad range of military operations. The equipping component is illustrative of the technologically advanced medical/surgical equipment, medical materiel, and nonmedical equipment required in our Combat, Combat Support, and Combat Service Support force structure.

CSM equipment supports the capabilities of the AMEDD field units to support the Army's full spectrum of operations including offensive, defensive, stability and support of the Army Early Response Force who offers capabilities such as Chemical, Biological, Radiological, Nuclear, and high yield Explosives (CBRNE) Consequence Management Response Force (CCMRF).

CSM modernizes, converts, and recapitalizes the Army Medical Department's (AMEDD's) Table of Organizational Equipment (TOE) force structure with deployable medical platforms. These combat service support systems support medical force structure at all echelons of care. This program resources the acquisition of all categories of medical equipment including surgical, combat stress, medical evacuation, dental, laboratory, radiology, optometry and new medical technology. CSM equips the Army's medical personnel to provide medical and rehabilitative care from first responder, to forward resuscitative care, to theater hospitalization, and en-route care in the Joint Area of Operations.

There are two major CSM requirements continuing in FY18 through FY22. In FY17, Combat Support Hospitals began a multi-year effort to convert and activate in support of the Vice Chief of Staff of the Army approved Field Hospital (FH) Force Design Update (FDU). This update increases FH trauma capabilities and provides improved modularity and flexibility to increase responsiveness on the battlefield. In FY18, Forward Surgical Teams begin to convert, modernize and activate in support of the Vice Chief of Staff of the Army approved Forward Resuscitative Surgical Team FDU. This design provides a standardized, more responsive and rapidly deployable, modular resuscitative and surgical team able to support short (<72hr) and extended (>72hr) operations.

Justification:

The Combat Support Medical (CSM) FY2019 Base Procurement dollars in the amount of \$57.752 million procures medical equipment and materiel to support the AMEDD's balanced investment strategy for the Army's approved force structure and Army Force Generation (ARFORGEN) requirements. It provides advanced medical equipment necessary to ensure essential care of combat casualties throughout the range of military operations and includes all care and treatment necessary to return casualties to duty (within the theater evacuation policy) or begin initial treatment and stabilization.

An important part of the CSM mission is the Field Medical Equipment-Medical Associated Support Items of Equipment (ASIOE). FY2019 Base Procurement dollars in the amount of \$39.673 Million procures, fields, incrementally modernizes & sustains medical field system (MFS) for the Deployable Force; TOE medical device development and major end items & sets, kits & outfits (SKOs) selection (e.g., trauma, EMT, surgery, optical, lab, dental, vet); TOE major end items (e.g., imaging, image management, systems linked to DoD Electronic Medical Record). MFS is carefully executed to best develop, acquire, sustain, project, and modernize medical materiel capabilities in support of Army priorities. POM priorities are a sustainable holistic approach true to the ARPL and address the needs of the Army's Total Force. MFS provide medical materiel support to all Army components (Active, Reserve, and National Guard) to optimize the medical materiel readiness of tactical Army organizations.

Critical to the CSM mission is the Medical Evacuation (MEDEVAC) Mission Equipment Package (MEP), with a FY2019 base procurement funding in the amount of \$18.079 Million it provides operational capabilities necessary to ensure continuance of essential initial treatment, stabilization and care during rapid aeromedical evacuation of critically wounded combat casualties from the battlefield to Combat Support Hospitals (CSH). This rapid, lifesaving care in flight directly contributes to the reduction in the Golden Hour of trauma care, the result of which is the lowest number of combat fatalities seen in war.

FY 2019 OCO procurement dollars in the amount of \$17.527 million procures Class VIII medical equipment in support of all units in the European Reassurance Initiative (ERI); backfills Field Medical Equipment from the Medical Materiel Readiness Program (MMRP) in support of DAMO-OD requested transfer of 28th Combat Support Hospital (CSH) mission critical organizational equipment to theatre provided equipment (TPE) in support of Combined Joint Task Force-Operation Inherent Resolve (CJTF-OIR). MEDCOM's role in ERI is to provide support for the accelerated medical build within Army Prepositioned Stocks (APS-2/Europe) and to assist with sourcing of medical equipment for the European Enduring Equipment Set.

Remarks:

The Medical Evacuation (MEDEVAC) Mission Equipment Package (MEP) provides critical upgrades to legacy MEDEVAC helicopters to ensure the best medical capabilities are available to support the rapid evacuation of wounded Soldiers. The program consists of two subsystems installed on recapitalized legacy MEDEVAC UH-60A/L Black Hawk helicopters. These subsystems include the Interim MEDEVAC Mission Support System (IMMSS) patient handling system, and the Medical Mission Sensor (MMS) Forward Looking Infrared (FLIR). These aircraft provide the required operational capabilities for aeromedical evacuation, and are utilized throughout the MEDEVAC fleet. The Interim MEDEVAC Mission Support System (IMMSS) includes seat pallets, seats, interior components, and a litter lift system. Includes the Smart Window - This new window will replace the older bubble window on the cargo door, and the Internal Communications System (ICS) Relocation Kit - the ICS must be located further to the rear of the helicopter to accommodate the new interior design. The MEDEVAC Mission Sensor (MMS) is a Forward Looking Infra-Red (FLIR) sensor that will be used as a patient location sensor. MMS is critical for the continuous visual capability during night and adverse weather conditions.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:

The Mobile Maintenance Equipment Systems (MMES) employs a system of systems approach to provide two-level maintenance capability to the Warfighter. Eight inter-connected maintenance systems distributed throughout the Army at multiple levels and echelons provide a holistic repair capability in all environments. This approach meets the Army's two-level maintenance philosophy and supports the current force while also providing modular configurations to meet the specific needs of the Army maintainer in today's transforming environment. The MMES family of systems includes Metal Working and Machining Shop Set, Fire Suppression Refill System, Armament Repair Shop Set, Hydraulic Systems Test and Repair Unit, Shop Equipment Welding, Shop Equipment Contact Maintenance, Forward Repair System, and Standard Automotive Tool Set.

The Metal Working and Machining Shop Set (MWMSS) program is a Shelter Mounted Set that assembles and packages tool load configurations based on the 91E (Allied Trades) Military Occupational Specialty (MOS). The MWMSS assembles and packages a tool load configuration to replace multiple obsolete Line Item Numbers (LINS) without losing any capability while reducing the logistics footprint. MWMSS increases safety and supportability for Allied Trades Soldiers and delivers state of the art machining capabilities using two module types, Type I and Type II. Type I contains a Computer Numeric Controlled (CNC) Lathe, Mill Drill, Multi-Process Welding, Thermal Cutting equipment, Air-Arc Gouging, air compressor, Mobile Electric Power (MEP) generator for shop power, Environmental Control Unit (ECU), and an assortment of hand/air tools. Type II augments Type I and contains a CNC Milling Machine, Plasma table, ECU, additive manufacturing, and an assortment of hand/air tools. The MWMSS is transportable by standard ground (PLS/LHS), air (C-130), rail and sea assets. MWMSS is being produced organically by the Joint Manufacturing Technology Center in Rock Island, IL. Army Acquisition Objective (AAO) of MWMSS is 298 Type I and 181 Type II.

The Fire Suppression Refill System (FSRS) is a modular, flexible, standardized fire suppression refill station consisting of a transportable ISO 8x8x20 container with an integrated Environmental Control Unit (ECU). The FSRS will be an integrated unit equipped for safe performance of refilling fire suppression bottles and systems. The FSRS will consist of an enclosure (capable of stand-alone or trailer-mounted operation) containing the tools and equipment needed to fulfill the required refill tasks and a trailer for transportation. The FSRS provides the capability to refill the vast majority of fire suppression bottles and systems currently fielded. These systems include both man portable systems as well as the fire suppression systems that can be found in military vehicles. The FSRS shall operate in every Support Maintenance Company (SMC) and Field Maintenance Company (FMC), Ground Support Sections. The FSRS will be deployed and employed in all geographical locations and environments where the U.S. Army operates. FSRS is being produced organically by the Joint Manufacturing Technology Center in Rock Island, IL. Army Acquisition Objective (AAO) of FSRS is 171 systems.

The Armament Repair Shop Set (ARSS) significantly improves on-site maintenance capability with increased proficiency and deployability. The ARSS provides a field/sustainment level maintenance and repair support platform for armament weapon systems to support units across the full spectrum of military operations. By providing on-system maintenance repairs to weapon systems and/or components as far forward as possible on the battlefield, ARSS enables major combat systems to quickly return to the fight, provides technological advancements and professional-grade tools with lifetime warranties, which will bring

Line Item MDAP/MAIS Code: N/A																									
a savings to the Army for many years. The ARSS consolidates six Line Item Numbers (LINs) to one and equips our forces with the most current and accurate tools to complete the mission while performing maintenance on the latest technologically advanced weaponry from small arms to field artillery. The consolidation of the six LINs to one results in a reduction from six tactical vehicles required to transport the individual shop sets to just one tactical vehicle to transport the ARSS. In addition, the ARSS eliminates a 51% tool redundancy across the previous six armament shop sets while reducing 43% of the armament repair tools in the field. The ARSS will be fielded to the Infantry Brigade Combat Teams (IBCTs), Heavy Brigade Combat Teams (HBCTs), Stryker Brigade Combat Teams (SBCTs), Support Maintenance Companies (SMCs), Component Repair Companies (CRCs), and Forward Support Companies (FSCs). ARSS is being produced organically by the Tobyhanna Army Depot, in Pennsylvania. Army Acquisition Objective (AAO) of ARSS is 995.																									
The Hydraulic Systems Test and Repair Unit (HSTRU) is a robust hydraulic repair system capable of supporting four trained ordnance/engineer Soldiers at one time to conduct maintenance operations. It provides the capability to fabricate industry standard crimp-style hydraulic replacement hoses of all sizes, types, and end configurations as required to restore the hydraulic systems on battle damaged or otherwise non-mission capable equipment. HSTRU also provides the ability to fabricate industry standard steel replacement hydraulic tubes used in brake lines and other high pressure applications and bends and flares these tubes as required to create a proper replacement item. The HSTRU includes an on-system diagnostic test meter that is used for troubleshooting hydraulic problems on the supported platforms. It is a trailer-mounted system with a weather tight enclosure that is configured for rapid setup for use at the point of need. It can be deployed forward on the battlefield for battle damage repair or operated in the motor pool. The HSTRU is highly transportable on or to the battlefield by light tactical vehicle towing, highway trucks, helicopter sling load, C-130 and larger fixed-wing aircraft, smaller and larger marine vessels, and rail. Approved Acquisition Objective (AAO) is 574.																									
The Shop Equipment, Welding Trailer (SEW) provides a full spectrum of welding capabilities throughout the battlefield, allowing repairs to be performed in all weather, climatic and light conditions. The SEW is a 100% duty cycle welder that can operate continuously until all welds, cutting and repairs are finished and finalized. The SEW provides heavy-duty, on-site welding capability with increased mobility and deployability. The SEW integrates commercial off the shelf (COTS) and non-developmental item (NDI) components in an enclosure mounted on an M103A3 Trailer. The SEW will provide welding repairs to tactical engineer and ordnance maintenance units. The SEW supports two level maintenance utilizing the only qualified welders in the Army. The SEW provides the capability to perform Shielded Metal Arc Welding (SMAW) "STICK", Flux Cored Arc Welding (FCAW), Gas Tungsten Arc Welding (GTAW) "TIG", and Air-Carbon Arc Cutting (AAC) "Arc gouging". The SEW also provides capability to perform Oxyfuel Gas Welding (OFW), Oxy-fuel Gas Cutting (OFC) and Torch Brazing (TB). The SEW provides compressed air on demand, electrical power for lights and electric hand tools, and an illuminated work surface with a vise. Approved Acquisition Objective (AAO) is 562.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

The Mobile Maintenance Equipment Systems are maintenance multipliers that mobilize mechanics and maintenance equipment to repair damaged light, medium, and heavy Combat and Combat Support systems in the Brigade Combat Teams (BCTs) and Combat Aviation Brigades (CABs) as close to the front lines as is safely possible. The MMES significantly increases the capability of forward maintenance units to conduct necessary battlefield repairs. With the MMES, systems and Soldiers do not have to wait for recovery vehicles to arrive and remove the system from the battlefield, thus reducing risk to the soldiers and equipment.

Fire Suppression Refill System (FSRS): FY 19 Base procurement dollars in the amount of \$6.105 million support 17 FSRS to be fielded to Armored Brigade Combat Teams and Stryker Brigade Combat Teams and Support Maintenance Companies (SMC).

Metal Working and Machining Shop Set (MWMSS): FY19 Base procurement dollars in the amount of \$13.278 million supports 28 MWMSS modules (15 Type I and 13 Type II) to be fielded to Active units. MWMSS represents a significant upgrade in technology and replaces several outdated LINS.

Armament Repair Shop Set (ARSS): FY19 Base procurement dollars in the amount of \$14.131 million support 26 ARSS to be fielded to the Infantry Brigade Combat Teams (IBCTs), Heavy Brigade Combat Teams (HBCTs), Stryker Brigade Combat Teams (SBCTs), Support Maintenance Companies (SMCs), Component Repair Companies (CRCs), and Forward Support Companies (FSCs). ARSS replaces six Line Item Numbers (LINS) and provides the capability for forward maintenance for multiple weapon systems.

Hydraulic System Test and Repair Unit (HSTRU): FY19 Base procurement dollars in the amount of \$1.841 million will purchase 12 HSTRU to be fielded to the Infantry Brigade Combat Teams (IBCTs), Heavy Brigade Combat Teams (HBCTs), Stryker Brigade Combat Teams (SBCTs), Support Maintenance Companies (SMCs), Component Repair Companies (CRCs), and Forward Support Companies (FSCs).

Shop Equipment, Welding (SEW): FY19 Base procurement dollars in the amount of \$2.367 million will purchase 6 SEW to be fielded to the Infantry Brigade Combat Teams (IBCTs), Heavy Brigade Combat Teams (HBCTs), Stryker Brigade Combat Teams (SBCTs), Support Maintenance Companies (SMCs), Component Repair Companies (CRCs), and Forward Support Companies (FSCs).

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these item are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks:

Minimum rate is 1 module per month, either Type I or Type II

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:															
Items Less Than \$5 Million (Maintenance Equipment): Acquire and field maintenance support equipment, such as the Machinist Measuring Tool Set (MMTS), Load Bank System Tactical Electric Power (TEP), Refrigeration Tool Kit Type I and Type II with improved, modernized, standardized, and centralized maintenance Sets, Kits, Outfits, and Tools (SKOT).															
The Machinist Measuring Tool Set (MMTS) provides necessary components for general machinist's use. The MMTS facilitates fabrication, repair, and modifications of metallic and nonmetallic parts, and supports metalworking shop activities. The MMTS supplements the Metal Working & Machining Shop Set (MWMSS) by providing an authorized set of hand tools and personal protective equipment necessary for the 91E Soldier to conduct welding and machining operations. The set consists of a tool box and 73 components (i.e. gauges, calipers, rulers, hammer, punches, etc.). Army Acquisition Objective (AAO) for MMTS is 2511.															
The Load Bank System Tactical Electric Power (TEP) is a Soldier-portable system required for performing diagnostics, repairs and post verification testing on all small and medium tactical generators of the Army's tactical fleet. The Load Bank System is a critical key maintenance enabler for the Tactical Electric Power (TEP) medium tactical generators (2 to 60 kw) which enable readiness of weapons systems. TEP generator sets provide power to critical life saving operations such as field hospitals that provide medical support to combat wounded soldiers, satellite and land communication systems to communicate with Soldiers in convoys and foot patrols, Tactical Operation Centers and various Soldier life support operations. This equipment allows Soldiers to properly and adequately maintain reliable systems that meet Soldier safety, supportability, and mobility requirements, thereby reducing the risk to the warfighter. The capability that Load Banks provide to load test generator sets is an essential function that Army maintenance units require to support combat and peacetime operations. Army Acquisition Objective (AAO) for Load Bank System Tactical Electric Power (TEP) is 1270.															
The Refrigeration Tool Kit (RTK) consists of two kits, the individual Soldier kit (Type I) and the base kit (Type II). These kits provide the Military Occupational Specialty (MOS) 91C Utilities Equipment Repairer Soldiers all the tools and equipment required to test, maintain and repair every Environmental Control Unit (ECU) on and off the battlefield. Proper functioning ECUs facilitate hospital/medical activities such as laboratory operations, blood banks, aiding mortuary affairs, safe transportation and storage of perishable foods; providing environmentally-controlled conditions for troops, signal, and command/control equipment; and humanitarian support, disaster relief and homeland support security deployments. The RTK operates in all environments where United States Armed Forces deploy. The RTK provides field level maintenance for all Army equipment that requires an Environmental Control Unit (ECU). The RTK provides the capability to support maintenance operations as far forward as possible on the battlefield by providing on-system maintenance repairs to Army equipment and/or components, which allows major combat systems to return to the fight rapidly. RTK Type I Army Acquisition Objective (AAO) 4762 and Type II 2655.

Justification:

FY19 Base procurement dollars in the amount of \$3.961 million will procure 293 Machinist Measuring Tool Sets, \$.339 million will procure 69 Load Bank System Tactical Electric Power (TEP), \$0.230 million will procure 12 Refrigeration Tool Kits (RTK) - Individual Soldier Kit, \$0.100 million will procure 3 RTK - Base Kit, and \$.355 is support cost for the systems mentioned.

FY19 OCO dollars in the amount of \$.136 million will procure 14 RTK - Individual Soldier Kit, and \$.132 million will procure 4 RTK - Base Kit.

The maintenance equipment is essential for units to properly maintain equipment, perform the mandatory maintenance operations and perform diagnostic testing which maintains the readiness of weapons systems. This equipment allows Soldiers to properly and adequately maintain vehicles and systems. Properly maintained systems perform at maximum capability, with improved safety and reduced risk to the warfighter. This equipment supports combat operations, Army Forces and unit Mission Essential Task List (METL) requirements. The Army requires reliable systems that support Soldier safety, supportability, and mobility requirements. SKOT systems require continuous review, revision, and upgrades to support Army requirements.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these item are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:																								
Graders are used by Horizontal & Vertical Companies, Engineer Support Companies, Clearance Companies, Asphalt Teams and Quarry Platoons in support of engineer requirements. The Grader is diesel-engine driven, pneumatic tired, with articulated frame steering. It is equipped with a power shift transmission, fully enclosed cab, hydraulically operated blade and scarifier. The Grader may be driven from one work site to another and is used for grading, shaping, bank sloping, ditching, scarifying, general construction and maintenance of roads and airfields. The Grader program includes the Type I and the Type IA Air Droppable variant. The Grader is a commercial off the shelf (COTS) program that is considered a Critical Dual Use (CDU) system enabling and supporting Defense Support to Civil Authorities (DSCA) operations. The Army Acquisition Objective (AAO) to 881 (861 Type I & 20 Type IA); with 44 Construction Equipment Virtual Trainers (CEVT).

Description:																	
The 14-18 Cubic Yard, Earthmoving Heavy Scraper is used by Horizontal Construction Companies, Vertical Construction Companies and Engineering Companies. It is a self-propelled and articulated framed steering vehicle with an open bowl, two axles, a single diesel engine and pneumatic tires. The 14-18 Cubic Yard, Earthmoving Heavy Scraper has the ability to self-load at a reduced production capacity. The 14-18 Cubic Yard, Earthmoving Heavy Scraper provides a hauling and dumping capability to perform efficient tasks in support of earthmoving projects. The 14-18 Cubic Yard, Earthmoving Heavy Scraper is a commercial off the shelf (COTS) program that provides Army Engineers with essential equipment to perform their road and airfield construction and site preparation missions. The Army Acquisition Objective (AAO) is 666; with 200 Armor Kits, and 35 Construction Equipment Virtual Trainers (CEVT).

Justification:

FY 2019 Base procurement dollars in the amount of \$7.961 million procures 10 Heavy Scrapers and funds all associated Program Management support costs. The Scraper provides the Army's forces improved mobility and deployability to meet Army requirements. New Scrapers will provide updated technology, electronics, and hydraulics which will increase the current readiness and reduce the logistics footprint.

This program is considered a Critical Dual Use (CDU) system enabling and supporting Defense Support to Civil Authorities (DSCA) operations.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:													
The Hydraulic Excavator Type I (HYEX-I) is a commercial off-the-shelf (COTS) vehicle with minor military modifications. It is diesel engine driven, self-propelled, track mounted, hydraulically controlled system, equipped with a hydraulic quick coupler system for use with a wide variety of attachments. The support equipment include a hydraulic impact breaker, plate compactor, crushing unit, barrier grapple, arm extension for dredging, and a variety of buckets for digging, dredging, and trenching. The HYEX-I provides engineer units a multi-functional construction capability that can dig, trench, dredge, scoop, lift, dump, and perform demolition to structures. The HYEX-I also has the capability to accept a Crew Protection Kit in the form of a replaceable armor C-Kit cab for contingency operations. The HYEX is fielded to Horizontal Construction Companies, VERT Companies, Multi-Role Bridge Companies, and the TRADOC training base. The minimum monthly sustaining rate for the HYEX is 5 systems per month. The HYEX Type I Army Acquisition Objective (AAO) is 472; with 35 Construction Equipment Virtual Trainers (CEVT).

Description:																	
This line covers both the T9 Medium Tractor, Full Tracked and the T5 Light Tractor, Full Tracked. These Bulldozers are used to perform dozing, rough grading, cutting and filling, and ripping in support of general engineer construction tasks; to build and maintain roads and airfields; and to build and support tactical missions. When equipped with armor protection, they fulfill the military requirements for mine clearing and military specific operations in a hostile environment. These Bulldozers are equipped with a power shift transmission and hydraulically operated semi-U type Bulldozer blade. The Bulldozers have either a winch or a ripper. Due to the low ground bearing pressure, the Bulldozer possesses the capability to work in adverse underfoot conditions and is normally one of the first pieces of construction equipment on a job site. The T9 Medium Tractor, Full Tracked is a low speed, medium draw bar pull bulldozer with a blade and is a basic item of earthmoving equipment used for heavy dozing and clearing. The T5 Light Tractor, Full Tracked is a smaller, air mobile, air droppable Bulldozer used in airborne operations for construction and maintenance emplacements, roads and airfields. This is a commercial off the shelf (COTS) program. The Army Acquisition Objective (AAO) is 1,600 (T-9: 1,296 and T-5: 304); with an Armor Kit requirement of 366 (T-9: 318 and T-5: 48) and 35 Construction Equipment Virtual Trainers (CEVT).

Description:

The All Terrain Cranes (ATC) Type I/II are self deployable systems capable of traveling on both primary and secondary roads with off-road maneuverability. The ATC Type I provides light to medium lift capabilities at a capacity of up to 25 tons. The ATC Type II provides heavy lift capabilities required by the Engineer force at a capacity of up to 50 tons. The ATC Type II provides mobility, survivability, and counter-mobility support across the entire range of theater operations supporting Route Remediation Units, Maneuver Brigade Combat Teams, and/or Expeditionary Engineer Brigades. The ATC Type II supports Joint Force capabilities to repair and expand operating capacities of Ports of Embarkation (POE), Intermediate Staging Bases/Forward Operating Bases, Ports of Debarkation (POD), entry points and bridging in and around the battle space. The ATC Type II provides capability to load and unload containers; to support base camp construction, force protection, and overhead lift operations; to assist in the loading of earth, sand, gravel, rock, and bulk-type materials; to drive steel, concrete, and timber piles; to perform tasks supporting construction rehabilitation and maintenance of mooring systems, jetties, breakwaters, and other structures; to participate in tasks that support the construction of piers, wharves, ramps and related structures required for cargo loading and off-loading; and to assist in the preparation and construction of facilities for Roll On Roll Off (RORO). The ATC Army Acquisition Objective (AAO) is 393 Systems (Type I: 179; Type II: 214 Systems). This is a Commercial-off-the Shelf (COTS) program.

Justification:

FY 2019 Base procurement dollars in the amount of \$13.031 million procures and fields 8 All Terrain Cranes (ATC) Type II systems and funds all associated Program Management support costs. The ATC Type II system is considered a Critical Dual Use (CDU) system, enabling and supporting Defense Support to Civil Authorities (DSCA) operations (i.e. Disaster Relief).

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:																								
The High Mobility Engineer Excavator Type I (HMEC-I) is a non-developmental item (NDI). It is used to clear rubble and debris from routes, roads, airfields, and the construction of these elements to include providing survivability positions for the maneuver forces. It is all-wheeled drive, diesel engine driven, highly mobile, equipped with a front bucket and a rear excavation bucket, and capable of using forklift, sweeper, and auger attachments. It is self-deployable, does not require a truck/trailer combination for transport, and can reach speeds up to 60 MPH. It is transported on C-130 (w/o armor), C-5, and C-17 aircraft. The HMEC-I also has the capability to accept a Crew Protection Kit in the form of an armored cab for contingency operations. The HMEC-I provides the capability of maintaining pace with the rapid movement of forces between engagements. The HMEC-I is fielded to Heavy, Light, and Stryker Brigade Combat Teams, Engineer Support Companies, Multi-Roll Bridge Companies, Route Clearance Companies, Petroleum Pipeline Companies and the Army training base. A quantity of 266 HMEC-I vehicles may be converted into semi-autonomous Route Clearance Interrogation System (RCIS)-capable vehicles, which requires a revision of the Interactive Technical Manual (IETM) to incorporate fleet retrofits of the Engineering Change Proposals (ECP). The minimum monthly sustaining rate for the HMEC-I is 3 systems per month. The High Mobility Engineer Excavator (Airborne) (HMEC-A) is an armored, slightly modified HMEC-I that is air-droppable from a C-17 aircraft. The HMEC-A provides the same excavation and high travel speed (60 mph) capabilities as the HMEC-I. The HMEC-A will be fielded to Engineer Support Companies and Infantry Brigade Combat Teams (IBCTs) in Airborne units.																								
The High Mobility Engineer Excavator Type III (HMEC-III) is a Backhoe Loader (BHL) which is a Commercial Off-the-Shelf (COTS) backhoe loader with minor military modifications. The BHL provides the capability to execute general construction missions in the areas of road building, airfield construction, repair and improve road systems, trails and bridges. The BHL also has the capability to accept a Crew Protection Kit in the form of a replaceable armored cab for contingency operations. The BHL is capable of driving up to 25 MPH on improved roads and 7 MPH off-road. The BHL is transported in the air via C-130, C-5, or C-17 aircraft, or across the highway with M916/M870 and M915/M172 truck/trailer combination organic to the unit. The BHL is fielded to Horizontal and Vertical Construction Companies, the Army training base, and other Non-Engineer Units.																								
The Army Acquisition Objective is: 1,990 (HMEC-I: 1,308/HMEC-III: 682).

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY19 Base procurement dollars in the amount of \$46.048 million will procure 80 HMEE-I un-armored vehicles and programmatic system support, and the revision of the Interactive Electronic Technical Manuals (IETM) for the base HMEE-I vehicles to incorporate fleet retrofits of Engineering Change Proposals related to the 266 HMEE-I vehicles being converted into semi-autonomous Route Clearance Interrogation System (RCIS)-capable vehicles.

FY19 OCO procurement dollars in the amount of \$25.700 million will procure 50 HMEE-I armored vehicles to support the Combatant Command (COCOM) requirement to replace battlefield loss for Operation Enduring Freedom - Horn of Africa. The purchase of armored vehicles replaces theater-specific equipment and has an increased unit cost over the un-armored vehicle.

This program is considered a Critical Dual Use (CDU) system enabling and supporting Defense Support to Civil Authorities (DSCA) operations.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:																	
The Engineer Rapid Airfield Construction Capabilities (ERACC) consists of four (4) independent products that enhance the joint commander's capability for Enable Theater Access (ETA) operations. ERACC provides the joint commander the capability enhancement to rapidly construct new airfields, runways and to upgrade existing facilities to meet joint task force needs. This expands operating capacities of Aerial ports Embarkation/Debarkation (APOE/APOD). ERACC Type I, Type II, Type III and Type IV are commercial off the shelf (COTS) programs. Joint U.S. Forces will employ ERACC types (I-IV) individually or as a combined mission based on engineer requirements.																	
ERACC Type I, Site Selection and Assessment. This capability package is a software centric capability used to rapidly assess potential sites for airfield operations. This capability provides geospatial information, site analysis, terrain visualization, airfield performance predictions, constructability estimations, on-site material characterization, and site design capabilities. The fielding of the ERACC Type I software will be to users of the ENFIRE engineer reconnaissance system as part of the ENFIRE 7.0 software baseline, and will be included in all subsequent baselines. The users include construction engineer platoon leaders, engineer liaison teams, facilities managers, and contracting personnel within Engineer organizations for construction project management, reconnaissance, facilities and inventory management, Tele-engineering, site layout, rudimentary surveying, mapping, and associated reporting. The ERACC Type I system is a software application on the ENFIRE system. The Army Acquisition Objective (AAO) for the Type I is 41 and will be procured by Product Director Combat Terrain Information Systems (PD CTIS).																	
ERACC Type II, Enhanced Earthmoving. This system is a Grade Control System that includes a global positioning system (GPS) and laser leveling system that is installed on a dozer, grader, scraper and Deployable Universal Combat Earthmover (DEUCE). The Grade Control System with automatic blade control significantly increases operating productivity and training efficiencies by reducing construction times and fuel consumption. A project design can be loaded into the blade leveling display box allowing the operator to have 3-D view of where he is in relation to the project end state. This allows the operator to instantly know where to fill and cut and thus eliminates the requirement for the survey team to repetitively verify the project. The fielding of the Enhanced Earthmoving will be within Engineer Support Company, Engineer Support Teams, and to Rapidly Deployable Earthmoving-Light (RDE-L) Platoons, an integral asset of the Engineer Support Companies. The AAO for the Type II 342 will be procured by PM Combat Engineer/Material Handling Equipment (CE/MHE).																	
ERACC Type III, Mobile Technical Engineer Lab (MTEL) is an integration of commercially available non-developmental items. MTEL effort is a C130 airplane Low Velocity Air Droppable (LVAD)/CH-47 helicopter sling transportable package enhancing a modularly designed capability to rapidly open new airfields and runways, and/or upgrade existing facilities to meet joint task force needs. The MTEL provides a soil test and survey capability utilizing a utility vehicle. This allows the ERACC Team to quickly understand the composition of the soil to determine feasibility for construction of an airfield. The MTEL can also be used for recon and scouting once the lab package is removed. The fielding of the MTEL will be within Engineer Support Company and Engineer Support Teams. The ERACC Type III AAO is 86 and will be procured by PM CE/MHE.

ERACC Type IV, Soil Stabilization. This system is essential to mix soil stabilization products with soil to produce desired stabilized base layers suitable for aircraft traffic operations. This system supports rapid construction and or expansion of airfield operation capacities. It will also be employed during the construction/upgrading of helipads as a means to prevent brownout conditions from occurring during helicopter landing and takeoff operations. The machine is equipped with an onboard automated liquid distribution system that matches the desired liquid polymer application rate to the machines ground speed. It has the capability to continuously operate for a period of 10 hours. The Soil Reclaimer Stabilizer will be fielded to the Rapidly Deployable Earthmoving-Light (RDE-L) Platoon within the Engineer Support Company (ESC), Engineer Survey and Design Sections, Engineer Geospatial Cells, Forward Engineer Support Teams, and Technical Engineer Sections. The ERACC Type IV AAO is 31 and will be procured by PM CE/MHE.

Justification: FY 2019 Base Procurement dollars in the amount of \$0.980 million for the procurement, installation and fielding of non B-kit items, rapid construction and/or expansion of airfield operating capacities in support of ERACC Type II mission requirements. FY 2019 Base Procurement supports a balanced investment strategy for the Army's approved force structure and Army Force Generation (ARFORGEN) requirements, as well as, funds all associated Program Management costs.														
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active components and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:													
The Construction Equipment (CE) budget line funds the Service Life Extension Program (SLEP) across the Construction Equipment/Combat Engineer portfolio and supports the Engineer Strategy by extending current construction capability to bridge the gap until new procurements. The SLEP candidates include the Deployable Universal Combat Earthmover (DEUCE), Dual Steel Wheel Roller (DSWR), High Speed Compactors (HSC), Vibratory Rollers, All Terrain Crane (ATEC), Hydraulic Excavator (HYEX), Scraper 613C, 7.5T Crane, D7-G Dozer, Engineer Mission Module (EMM) and select components of the Asphalt Mixing Plant (AMP). The CE SLEP is a commercial off the shelf program (COTS).													
The DEUCE is a rubber-tracked dozer used in clearing, leveling, and excavation operations. It is C-130 airplane transportable and can be dropped by parachute at low velocity. It can travel at speeds up to 30 miles per hour (MPH) eliminating the typical construction equipment requirement of trailers and additional haul assets. The DEUCE rubber tracks allow construction, loading, and off-loading on airfields and paved roads without damage. No replacement solution provides these capabilities at this time. The SLEP Army Acquisition Objective (AAO) for DEUCE is 214 systems.													
The Dual Steel Wheel Roller is a self-propelled vehicle consisting of two steel drums, a diesel engine, and a hydrostatic drive. It is a commercial system used to compact bituminous material in paving operations. The SLEP AAO for DSWR is 39 systems.													
The High Speed Compactor is equipped with articulated steering, a dozer blade, a diesel engine, and has segmented impact pads on each of the four drums. It is capable of compacting various soil types in forward or reverse at speeds up to 12 MPH. The SLEP AAO for HSC is 152 systems.													
The Vibratory Rollers Type I, Type II, and Type III are self-propelled single drum rollers equipped with vibratory action, and are used to level and compact all soil types. The combined AAO for Vibratory Rollers Type I and Type III is 88. The SLEP AAO for Vibratory Rollers Type II is 393 systems.													
The All Terrain Crane is a hydraulic, all terrain crane capable of traveling over primary, secondary and off road surfaces at the tactical support level. Technical characteristics include: diesel engine, power shift transmission, three mode steering, independently controlled hydraulic outriggers and a 70 foot telescoping boom. The ATEC supports construction, maintenance bridging and resupply activities. The SLEP AAO for ATEC is 215 systems; in addition the Armor Kit requirement is 29.													
The Hydraulic Excavator Type I, II and III is a commercial item of construction equipment with minor military modifications. It is a diesel-driven, self-propelled, track mounted, hydraulically controlled system equipped with a hydraulic quick disconnect coupler for use with a wide variety of attachments. The SLEP AAO for HYEX Type I is 189 systems.

Line Item MDAP/MAIS Code: N/A		
<p>The Scraper 613C is a non-sectionalized/sectionalized scraper used by Engineer Support Companies for earthmoving maintenance and construction of roads and airfields. The sectionalized scraper can be sectionalized into two sections for transport by helicopter. The SLEP AAO for Scraper (613C) is 210 systems.</p> <p>The 7.5T Crane is used primarily in light cargo handling units where mobility is required. It is capable of safe operation in explosive environments at Ammunition and Petroleum, Oil, and Lubricant supply points and can be used by ordnance companies, petroleum platoons and maintenance battalions. The SLEP AAO for 7.5T Crane SLEP is 232 systems and is only to fulfill PEO Aviation requirements.</p> <p>The Engineer Mission Module, Water Distributor is one of four Engineer Mission Modules which are demountable, systems capable of repeated transport, operation and use with Load Handling systems (LHS) type trucks and associated trailers. The four EMMs are the EMM-Dump Body (DB), EMM-Concrete Module (CM), EMM-Bituminous Distributor (BD) and EMM-Water Distributor (WD). The SLEP AAO for EMM is 302 systems.</p> <p>The Asphalt Mixing Plant is a portable drum type, electric motor driven facility, capable of self erection (major components), and satisfactory operation without requiring permanent type footings. It consists of major units, components and accessories as required to assemble a complete plant capable of producing 150 tons per hour of graded asphalt paving mix. These units are trailer mounted and can be interconnected mechanically and electrically, and operated to rated capacity. The SLEP AAO for AMP is 2 systems.</p>

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$37.125 million provides refurbishment of approximately 165 vehicles consisting of the ATEC Crane, Vibratory Rollers I/III and II, 7.5 Ton Crane, EMM Pilot, and Compaction Equipment. The Construction Equipment (CE) Service Life Extension Program (SLEP) is the engineer's lifeline to sustain the current force. The SLEP is critical to maintaining engineer unit's operational readiness standards by extending the life of many different CE vehicles by 10-15 years. It returns vehicles to the field with zero hours and zero miles with a manufacturer new vehicle warranty of 18 months. This program lowers the Army's operation and support costs normally associated with aged equipment. The SLEP is conducted at government and contractor facilities worldwide to include Germany, Italy, Korea, Kuwait, and the USA.

This program is considered a Critical Dual Use (CDU) system enabling and supporting Defense Support to Civil Authorities (DSCA) operations.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:																										
The Construction Equipment (CE) Items less than \$5.0M supports various Programs of Record (POR) where the acquisition cost for each line item is below \$5.0 million. These programs provide the enhanced capabilities to the current force enabling them to execute their expeditionary mission to include:																										
1. Route Remediation is mission that is supported by multiple programs that provides combat engineer units the capability to quickly repair damaged or lay new routes. Route Remediation PORs consists of: --Portable Asphalt Patcher (PAP) is a highly mobile, self-contained, spray injection asphalt patcher built on an M1077 flat rack. It mixes aggregate with asphalt emulsion and dispenses the mixture into a repair area for a patch that is traffic ready within 20 minutes. Army Acquisition Objective (AAO) is 7 systems. --Self Propelled Concrete Saw (SPCS) supports rapid route repair in support of assured mobility and airfield damage repairs. AAO is 62 systems. --Portable Concrete Mixer (PCM) is a 2 cubic yard capacity trailer mounted independently powered volumetric concrete mixer that supports the rapid route repair mission. AAO is 268 systems. --Machine Powered Mowing System (MPMS) is a telescoping, high-powered mowing attachment mounted on a 966H, Wheeled Loader to rapidly remove ground cover and foliage. The MPMS system consists of a 60-inch mower head attachment, a 4-blade saw, and a ditching attachment. MPMS is interoperable with the armored and non-armored polycarbonate windowed variants of the 966H Wheeled Loader, and is transported via M916 and M870 while attached to the machine. AAO is 66 systems.																										
2. Water Well Drilling Rig (WWDR) is a four piece system consisting of a self-propelled drilling rig, support/tender truck, a mud trailer and an air compressor trailer. The WWDR produces water where surface or commercial sources do not exist. The drilling rig is a hydraulic, top-head driven unit with a telescoping mast capable of employing a standard 20 feet 8 inch drill steel string to a depth of 2000 feet. The rig carries the initial 500 feet of drill steel. The support/tender truck has a 2500-gallon water tank, an auxiliary 500-gallon fuel tank, a crane, and the capacity to carry 1500 feet in additional drill steel. The air compressor trailer is utilized for drilling and retrieving drill steel based upon geographical situations. The mud trailer contains a mixing/cleaning system. AAO is 8 systems.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$6.103 million supports the procurement of 37 Route Remediation systems. Funding activities also include Engineering Change Proposals (ECPs), Technical Manuals, Support Equipment, Fielding, Training, and Program Management Support costs.

The FY 2019 funding request was reduced for \$.686 million to account for the availability of prior year execution balances

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:																										
The Army Watercraft Extended Service Program (ESP) budget line funds the Service Life Extension Programs (SLEP) across the Army Watercraft Systems portfolio. During FY 2016 - FY 2025 specifically, the Army Watercraft ESP budget line will fund the Army Landing Craft Utility 2000 (LCU-2000), a globally dispersed fleet of 34 vessels, and will serve to extend the current Economic Useful Life (EUL) of this platform by 10 years; bridging the gap until the procurement of a replacement vessel. The LCU-2000 provides intra-theater movement of combat vehicles, equipment, and sustainment cargo, to include containerized, break-bulk, and roll-on roll-off (RO/RO) cargo, to improved and/or degraded ports, bare and austere beaches, and inland water terminals. The vessel is ideally suited for the discharge and back load of sea lift; the shallow draft, bow ramp, and associated systems providing for beaching and extraction. The vessel supports Joint Logistics Over the Shore (JLOTS), seaport opening, and delivers combat-configured elements or sustainment cargo during all phases of the campaign. The LCU-2000 was fielded from 1990-1993 and was designed and built specifically to the objective of a 25 year EUL. While new capability is not being added, some capabilities will be improved and modernized through the application of Engineering Change Proposals (ECPs), such as Engine Repower, power generation, force protection and habitability. The LCU-2000 Technical Manuals and provisioning data effort covers development, re-write and publishing of the critical repower requirement along with all other subsystems effected by SLEP.																										
The Army Watercraft ESP budget line will also fund the SLEP of the Modular Causeway System (MCS), specifically the Modular Warping Tug (MWT) and Causeway Ferry (CF). The MWT/CF SLEP will extend the economic useful life of the MWT and CF to FY 2040 and bridge the gap between the current MCS and the Future MCS projected to begin production in FY 2042 per the Transportation Portfolio Strategic Portfolio Analysis Review (SPAR 20). The MWT is used to assist in the assembly, movement, and positioning of MCS and the CF is used to transfer containers from containerships directly to the beach.																										
The Army Watercraft ESP budget line also supports modernized bridge or pilot house configuration efforts which serve to maintain the ability to communicate, navigate as well as maintain situational awareness worldwide in both a joint as well as commercial maritime environment. As the refresh on this technology is as little as two years, unless the capability is continuously updated and maintained, the safety of the vessel and its crew as well as its ability to support the combatant commanders is at great risk. The LCU 2000 and LSV 1 class are the current applications of vessel specific modernized communication packages. This line will also include the future SLEP activities of fleet wide modifications consisting of: Landing Craft consist of 8 Logistic Support Vessels (LSV), 34 Landing Craft Utility 2000 (LCU-2000), 30 Landing Craft Mechanized 8 (LCM-8) MOD 1, and 6 LCM-8 MOD 2 (Watercraft Operations Support). Towing and Terminal Operations consist of 6 Large Tug 800 (LT-800), 16 Small Tug 900 (ST-900), and 4 Barge Derrick Crane 115-ton (BD-115). Ship-to-Shore Enablers consist of 3 Modular Causeway Systems (MCS) [each MCS includes 2 Roll-On/Roll-Off Discharge Facilities (RRDF), 5 Modular Warping Tugs (MWT), 1 Causeway Ferry (CF), 1 Floating Causeway (FC)]. Landing Craft discharge combat equipment or troops to austere beaches, undeveloped coastlines and operate in a non-permissive environment. Towing and Terminal Operations and Ship-to-Shore Enablers support ocean and port/harbor towing/salvage operations. Both are critical in denied/degraded ports, Joint Logistics Over-the-Shore (JLOTS) operations, and operations throughout the littorals.

Army Watercraft funding supports initiatives to enhance the seaworthiness, safety, and survivability while increasing the lethality, tactical mobility, and operational capability of the Army Mariner. Vessel lethality/ Escalation of Force measures have increasingly become an area of vital concern to the Combatant Commanders (CCDR) given the requirement to preserve "freedom of the seas" access in all areas of the world, particularly the littorals, to support maneuver operations in all Areas of Responsibility.																			
Comments: In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
Justification:									
FY 2019 Base procurement dollars in the amount of \$20.186 million supports a quantity of 2 vessels for the Landing Craft Utility 2000 (LCU-2000) and Program Management/Matrix Support for the fiscal year. The LCU-2000 SLEP modification package will make improvements to all engines, power generators and the application of Engineering Change Proposals (ECPs) which focus on modernization and technology insertion; these efforts are not covered under the Modification of In-Service Equipment appropriation. Furthermore, the LCU-2000 Technical Manuals and provisioning data effort covers development, re-write and publishing of the critical repower requirement along with all other subsystems effected by SLEP. Program Management/Matrix Support includes the Program Management, Logistics and System Engineering oversight required to manage the program and provide contractor oversight. Salaries, benefits, travel, personnel training and other Government costs are included for retaining a professional acquisition workforce. The LCU-2000 SLEP is performed in conjunction with the vessels' statutorily required On-Condition Cyclic Maintenance (OCCM), which is funded with Operations and Maintenance, Army (OMA) dollars.									
FY 2019 Base procurement dollars in the amount of \$3.145 million supports a quantity of 1 vessel for the Modular Causeway System (MCS) Service Life Extension Programs (SLEP). The Modular Causeway System (MCS) SLEP production will resolve engine, electrical, and deck winch sustainment issues in the Modular Warping Tug (MWT) through modification during OCCM. The MCS SLEP production will leverage the Technical Data Package (TDP) developed under the RDTE 526 funding line.									
FY 2019 Base procurement dollars in the amount of \$4.380 million supports the Integrated Bridge Systems (IBS) effort for the LCU-2000. This bridge configuration effort provides the LCU 2000 the critical ability to communicate, navigate as well as maintain situational awareness worldwide in both a joint as well as commercial maritime environment. Multi-domain system and equipment are integrated to display required navigation at all operator positions to support seamless, efficient and safe operations for any mission.									
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks:

Due to delay of LCU-2000 SLEP Phase I contract award to September 2016, TDP development to inform phase II has been delayed. As a result, the initial contract award for LCU-2000 SLEP Phase II is currently projected for 4th quarter FY 2019. The Landing Craft Utility 2000 (LCU-2000) Service Life Extension Program (SLEP) is planned to be conducted in two phases. The first phase (Phase I) will consist of up to 2 Low Rate Initial Production (LRIP) vessels, and 2 option vessels. LRIP during FY 2016-2018 will be used for SLEP, Engineering Change Proposal (ECP), Technical Data Package (TDP), New Equipment Training (NET) development, Test, Evaluation, Technical Manual (TM) Validation, and TM Verification. The second phase (Phase II) will consist of Full Rate Production (FRP) of LCU-2000 vessels in FY 2019-2026. The SLEP activities will update Main Propulsion, Bow Thruster, and Ships Service and Emergency Diesel Generator engines; upgrade Force Protection Equipment (new gun mounts and ballistic protection), and upgrade various engineering systems (e.g. Air Conditioning System). Lead times are based on previous SLEP contracts for other vessels.

Description: This budget line funds two separate programs. One program supports Float and the other program supports Rail.																	
The Float program funds hardware and material in support of Army Watercraft Systems. The principle capabilities of Army Watercraft Systems are 1) movement/maneuver and distribution of combat equipment and sustainment material; 2) access to degraded and/or austere ports; 3) seaport operations, to include docking/undocking, firefighting, towing and rescue; 4) ship to shore access to "no port" areas such as austere and remote, bare beaches; and 5) heavy lift in support of damaged seaport and/or vessel repair and salvage.																	
Army Watercraft Systems are categorized under Landing Craft, Towing and Terminal Operations, Ship-to-Shore Enablers and Watercraft Operations Support. Landing Craft consist of 8 Logistic Support Vessels (LSV), 34 Landing Craft Utility 2000 (LCU-2000), 30 Landing Craft Mechanized 8 (LCM-8) MOD 1, and 6 LCM-8 MOD 2 (Watercraft Operations Support). Towing and Terminal Operations consist of 6 Large Tug 800 (LT-800), 16 Small Tug 900 (ST-900), and 4 Barge Derrick Crane 115-ton (BD-115). Ship-to-Shore Enablers consist of 3 Modular Causeway Systems (MCS) [each MCS includes 2 Roll-On/Roll-Off Discharge Facilities (RRDF), 5 Modular Warping Tugs (MWT), 1 Causeway Ferry (CF), 1 Floating Causeway (FC)]. Landing Craft discharge combat equipment or troops to austere beaches, undeveloped coastlines and operate in a non-permissive environment. Towing and Terminal Operations and Ship-to-Shore Enablers support ocean and port/harbor towing/salvage operations. Both are critical in denied/degraded ports, Joint Logistics Over-the-Shore (JLOTS) operations, and operations throughout the littorals. Rescue Boats with outboard engines to meet Safety-of-Life at Sea (SOLAS) requirements for the Watercraft LSV, LCU-2000, LT-800 and MCS fleet, including cranes, cradles, and davit assemblies (support assemblies).																	
For the Rail program, railroad equipment consists of locomotives, rolling stock, railway passenger cars, track maintenance equipment, etc., used to support Army ammunition plants, Army Materiel Command (AMC) depots, Installation Management Command (IMCOM), Forces Command (FORSCOM) and Training and Doctrine Command (TRADOC) installations in peacetime, training and mobilization missions. This Railway Equipment is procured for the replacement of logistically unsupportable assets where current items are in some cases already unserviceable and in other cases, either unsafe or not cleared for use under the Federal Railroad Administration (FRA). Funding has been provided to procure shop equipment and tools to assist in the Army's move of its railroad locomotive overhaul facility, the Defense Generator & Rail Center from Hill, AFB, UT to Anniston, AL.																	
Locomotive procurement consists of commercial off-the-shelf GENSET switcher locomotives in direct support of the Army Rail Modernization Program. The program mandates systematic replacement of an aging fleet, that for the respective installations are becoming increasingly more costly to maintain. The GENSET Locomotives are industry proven, state of the art technology that will position the Army to meet current EPA air quality restrictions, and future fuel economy mandates.

Justification:

FY 2019 Base procurement dollars in the amount of \$2.385 million supports Army Watercraft Systems for material and/or hardware for modifications to correct safety discrepancies, increase interoperability, extend useful life, improve supportability, increase efficiency, meet new and changing statutory and regulatory requirements. FY 2019 Base procurement dollars in the amount of \$6.0 million has also been provided to procure shop equipment and tools to assist in the Army's move of its railroad locomotive overhaul facility, the Defense Generator & Rail Center from Hill, AFB, UT to Anniston, AL. FY 2019 Base procurement dollars also support Program Management Support which includes Program Management Matrix support and System Engineering oversight required to manage the program and provide contractor oversight. Matrix salaries, benefits, travel, personnel training and other government costs are included for retaining a professional acquisition workforce.

Description:												
The MA9800 / Generators and Associated Equipment funding line supports the Mobile Electric Power Generating Sources (MEPGS) systems. The MEPGS systems consist of three generations: first generation is Military Standard (MIL STD) generators (to include the 2kW Military Tactical Generator (MTG)); the second generation is the Tactical Quiet Generator (TQG); the third generation is the Tactical Electric Power (TEP). The TEP program is to replace and modernize the first and second generation of DoD generators (MIL STD, MTG and TQG, respectively) inventory to meet the Army's requirements and establish the DoD standard for tactical power generation. The TEP program is structured around the Small Tactical Electric Power (STEP) that covers 2-3kW stand-alone generator variants, Advanced Medium Mobile Power Sources (AMMPS) that covers 5-60kW stand-alone generator variants, Large Advanced Mobile Power Sources (LAMPS) that covers 100kW and 200kW stand-alone generator variants, multiple Power Units / Power Plants (PU / PP) and Microgrid configurations, and associated power distribution equipment (Power Distribution Illumination Systems Electrical (PDISE) and the Management and Distribution Control (MDC)). These programs collectively provide a new, modern family of generators and distribution systems satisfying critical user requirements. The TEP CPD (rev 2 July 2014) will:												
1. Reduce Acquisition Costs and Operations and Sustainment (O&S) costs by 15-20%.												
2. Reduce weight by 25% across generator population, thereby reducing the Logistics footprint and improving deployability.												
3. Significantly improve Reliability, Availability and Maintainability, to include Mean Time Between Failure improvements of 100-300%.												
4. Eliminate gasoline from the generator inventory, thus complying with DoD guidance regarding single fuel on the battlefield (diesel/JP-8).												
5. Reduce battlefield detectability by lowering noise levels by 50-75% across generator population.												
6. Improve battlefield survivability by providing mission critical electric power to the digitized warfighting forces.												
Management and Distribution Control (MDC), funded with the Improved Power Distribution Illumination Systems Electrical (IPDISE) program element, will be the next generation DoD Mobile Electric Power Distribution System. MDC will support the full spectrum of (low voltage) Tactical Electrical Power (TEP) and (medium voltage) Deployable Prime Power System (DPPS) with advanced features which enable micro-grid and smart-grid power systems, power monitoring, energy storage and incorporation of renewable energy sources. The program will entail a phased development of a Joint power distribution and management family of equipment intended to be the lifecycle replacement for USA PDISE, USMC MEFDIS-R, USAF BEAR AND USN power distribution systems.												
MDC AAO = TBD (current PDISE AAO = 23,752); Multiple Input PDU AAO = TBD, PPCK AAO = TBD, M20 AAO = TBD.												
Power Distribution Illumination Systems Electrical (PDISE) provides reliable, quick to assemble, modular designed power distribution equipment that is critical to deploying power networks. The PDISE family consists of five different end items, including M200 and M100 feeder systems, M40 and M60 distribution systems and the M46 electrical utility kit. PDISE is simple, reliable, and compatible with DoD generator sets from 5kW to 200kW. It is used to subdivide and distribute electricity from single power sources to multiple equipment users within shelters and various unit complexes, and thus is a critical element of the DoD power structure. PDISE is also critical to Army's transformation by reducing the logistics footprint through the use of centralized power configurations.												

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 60: Generators		P-1 Line Item Number / Title: 0426MA9800 / Generators And Associated Equip
ID Code (A=Service Ready, B=Not Service Ready): A	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
M200 Army Acquisition Objective (AAO) = 247; M100 AAO = 2,188; M60 AAO = 5,763; M40 AAO = 4,155; M46 AAO = 11,399.		
The Advanced Medium Mobile Power Sources (AMMPS) program provides mid-range power sources, including the 5 kilowatt (kW), 10kW, 15kW, 30kW, and 60kW Skid Mounted Advanced Medium Mobile Power Sources (AMMPS), which incorporates state-of-the-art commercial technologies that enhance the operational effectiveness and supportability of power sources. Operational effectiveness is improved through reduced noise (increasing survivability), and reduced weight (enhancing deployability, reduced footprint). The logistics footprint has been significantly reduced through improved fuel consumption (15-21% reduction), use of embedded diagnostics and improved maintainability. AMMPS are fully capable of meeting the most rigorous operational requirements providing mobile electric power to our deployed Soldiers, Sailors, Airmen and Marines worldwide. Army Acquisition Objective (AAO) = 14,593.		
Power Units/Mounted (AMMPS): The integration of generator sets on trailers with the electronic components are defined as power units or power plants. Power Units (PUs) consist of one generator set mounted on a trailer. Power Plants (PPs) consist of two generator sets mounted on either one or two trailers (depending on size) with a switchbox installed and paralleling cables between sets. The Microgrid capability allows up to six (6) 30kW or 60kW sized AMMPS generators to automatically start and stop to match load demand and supply power to a common distribution hub. The generator sets are procured by competitive contracts through the Army Contracting Command -Aberdeen Proving Ground (APG), Belvoir. The trailers are procured by competitive contracts through the Army Contracting Command - Warren. Set sizes from 5 kilowatt (kW) thru 60kW are mounted in Power Unit/Power Plant (PU/PP) configurations to meet the requirements of the DoD. Power Units/Power Plants Army Acquisition Objective (AAO) = 15,240; Microgrid AAO = TBD.		
LAMPS is a modernization program that will provide more mobile, reliable, and logistically supportable tactical electric power sources for the Department of Defense's 21st century digitized forces. LAMPS will replace the currently fielded 100/200 kilowatt (kW) Military Standard (MIL STD) generator sets and Tactical Quiet Generator (TQG) sets. LAMPS will provide improved tactical electric power to combat support, and combat service support units throughout the Army and the other military Services within the DoD. The LAMPS system is based on technology currently available from industry and being used in various industrial applications. They are used to provide power to Field Hospitals, Corps Support Commands, Homeland Defense, Military Intelligence, Special Operations Command and Forward Operating Bases. The LAMPS program will provide significant improvements over currently fielded systems in size, mobility, transportability, diagnostics/prognostics, enhanced survivability and supportability. The LAMPS program includes four (4) 50/60 Hertz (Hz) configurations; two (2) skid-mounted configurations and two (2) trailer-mounted (5 ton M1061A1 trailer) configurations as Power Units; and the LAMPS Power Distribution Unit (PDU). The LAMPS PDU will replace the M-400 (100 Amp) power distribution panel. Army Acquisition Objective (AAO): LAMPS = 794, LAMPS PDU = 459.		
The Small Tactical Electric Power (STEP) program will provide the Warfighter with expeditionary power solutions designed for combat operations in the most austere environments. STEP will replace existing systems and is a modernization program that will provide improved tactical electric mobile power sources for replacement of the currently fielded 2kW (MTG) sets and 3kW (TQG) sets, initially procured in the 1990s. STEP models will be more mobile, reliable, and logistically supportable power sources than their predecessors for the Department of Defense's (DoD) 21st century digitized forces. STEP 2kW Army Acquisition Objective (AAO) is 5,000; STEP 3kW AAO is 20,000.

Justification:

FY 2019 Base procurement dollars in the amount of \$133.772 million supports small, medium and large generator sets, assembly of power units, power plants, and microgrids, and power feeder, distribution and management systems. The program provides for the partial replacement of the current inventory of over aged, gasoline-fueled generators with modernized single fuel (diesel/JP-8) assets that will enhance the user's safety, survivability, reduce the logistics footprint and enhance reliability, availability and maintainability. These mobile generators provide tactical electric power to virtually every weapon, communication, medical and combat support system in the inventory including Missile/Air Defense Systems; Tactical Operations Centers; Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance systems; and Brigade Combat Teams (BCTs).

IPDISE (M50202): FY 2019 Base procurement dollars in the amount of \$1.716 million is for Management and Distribution Control (MDC). All funding for this line has been moved from SSN R45400 Power Distribution Illumination Systems Electrical (PDISE) 40-200 Amp, SSN R45400, as of FY 2017. PDISE continues fielding to Corps/Division headquarters, Brigade Combat Teams (BCTs), and Support Brigades in support of their combat support systems. MDC will begin production in FY 2018.

PDISE (R45400): FY19 Base procurement dollars in the amount of \$0.388 on this budget line should be reflected in the following budget line: IPDISE (M50202).

AMMPS (R51050): FY 2019 Base procurement dollars in the amount of \$60.702 million is for the Advanced Medium Mobile Power Sources (AMMPS) 5kW-60kW skid sets, which replace aging legacy systems, reduce total ownership costs and support modernization. This program continues fielding to Corps/Division headquarters, Brigade Combat Teams (BCTs), and Support Brigades in support of their combat support systems. All funding for this line has been moved from Medium Sets, SSN M53500, as of FY 2017.

Power Units/Mounted (AMMPS) (R59210): FY 2019 Base procurement dollars in the amount of \$61.051 million supports power units, power plants, and microgrids. The program continues fielding to Corps/Division headquarters, Brigade Combat Teams (BCT), and Support Brigades in support of their Command, Control, Communications, Computers, Intelligence, Surveillance, Reconnaissance (C4ISR) and combat service support mission. All funding for this line has been moved from POWER UNITS/POWER PLANTS, SSN R62700, as of FY 2017.

LAMPS (R61510): FY 2019 Base procurement dollars in the amount of \$1.976 million supports the configuration management of 100kW and 200kW Large Tactical Power and the acquisition of large generator sets and power distribution units. Funds in this program are a realignment of funds from program Large Sets, SSN M54400, as of FY 2017.

STEP (R63510): FY 2019 Base Procurement dollars in the amount of \$7.939 million will continue engineering, and requirements analysis for the STEP 2kW and 3kW variants. STEP production is not scheduled to begin until FY 2025. Funds in this program are a realignment of funds from Small Sets (2-3kW), SSN M59400, as of FY 2017. Funds also support engineering, logistics, part obsolescence, and program management efforts to sustain the 2kW (MTG) and 3kW (TQG) system until STEP fielding (FY26 - FY30). ----- FY 2019 OCO procurement dollars in the amount of \$0.024 million supports the European Deterrence Initiative effort (IPDISE (M50202)). FY 2019 OCO procurement dollars in the amount of \$.545 million supports the European Deterrence Initiative effort (Power Units/Mounted (AMMPS) (R59210)). In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

3	CUMMINS POWER GENERATION; INC - Minneapolis, MN	1,600	3,100	5,000	6	2	17	19	0	4	12	16	

Remarks:
All production rates shown on a yearly basis

Manufacturer has multiple products that contribute to the minimum production rate.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

This is an integration of components delivered to the contractor which makes up the power unit/power plant. The manufacturing lead time includes the time to order and receive the generator sets, trailers, and switchboxes.

All production rates are shown on a yearly basis.

Manufacturer has multiple products that contribute to the minimum production rate.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:																	
This effort supports the recapitalization of the MEP-PU-810A/B, Deployable Power Generation & Distribution System (DPGDS) Prime Power Unit (PPU). The DPGDS PPU is the U.S. Army's current prime power mobile electric power generating asset. The DPGDS PPU is a wheel-mounted, diesel engine driven, prime power (Type II), utility (Class 2A), Mode I unit that produces 840 kilowatts (kW), 4160 volts line-to-line at 60Hz and 700kW, 3800 volts line-to-line at 50Hz with an 0.8 power factor, lagging. The MEP-PU-810 has two variants, the MEP-PU-810A, a towed trailer configuration capable of being air transported by a C-130 aircraft, and the MEP-PU-810B, a 5th wheel configuration Department of Transportation (DOT) approved for over the road use at 55 miles per hour. Throughout the Department of Defense there are 165 'A' Models and 66 'B' Models supporting numerous missions, such as supporting the nation's Ballistic Missile Defense System.

Justification:

FY 2019 Base procurement dollars in the amount of \$8.333 million supports First Article Testing of the DPGDS PPU Recapitalization units. IAW Army Regulation 70-1, Army Acquisition Policy, Recapitalization is a key element in the modernization and sustainment of the Army's current force. The goals of recapitalization are to extend service life, stabilize the rate of growth of operating and support costs, improve reliability, maintainability, safety, and the efficiency of recapitalized systems. Further, recapitalization is expected to reduce the logistics footprint, as well as enhance warfighting capabilities for selected recapitalized systems. Hence, the recapitalization of the existing DPGDS PPUs is required to extend their economic useful life and to prevent a capability gap from emerging. Units currently requiring this capability include the 249th Engineer Battalion (Prime Power), the Missile Defense Agency/U.S. Army Space and Missile Defense Command Forward-Based Mode radar sites. This effort will streamline the logistical support requirements, capitalize on advancements in technology and afford the capability to the force for an estimated additional fifteen (15) years.

At contract award in April 2017, the prime vendor took possession of Government Furnished Property first article units, three (3) each MEP-PU-810A and MEP-PU-810B, and is creating the Modification Work Order (MWO) to Recapitalize a MEP-PU-810 A to a MEP-PU-810C and a MEP-PU-810B to a MEP-PU-810D. Upon successful completion of the MWO on the first article units, first article testing will commence. Consequently, there are no quantities listed in FY 2019.

Remarks:

All production rates shown on a yearly basis. Manufacturer has multiple products that contribute to the minimum production rate.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:

The Family of Forklifts supports various combat, combat support, and combat service support units in the loading and unloading of palletized supplies. Currently, the forklift family consists of the 5K Light Capability Rough Terrain Forklift (LCRTF) and the All-Terrain Lifter, Army System (ATLAS).

The 5K Light Capability Rough Terrain Forklift is used to load and unload palletized supplies including ammunition from International Standard Organization (ISO) containers and tactical vehicles. The 5K LCRTF will move supplies across the beach and rough terrain to transfer loads from aircraft landing zones and tactical vehicles. The 5K LCRTF mission profile is 20 hours of operations in all types of environmental conditions. The 5K LCRTF will be employed by cargo battalions, artillery units, transportation support battalions, combat service support units and various aviation units. It will be routinely in forward deployed areas with operating forces in support of combat operations other than war. The 5K LCRTF system is a Critical Dual Use (CDU) system enabling and supporting Defense Support to Civil Authorities (DSCA) operations (i.e. Disaster Relief). It can be transported by C-130 aircraft and external sling load via CH47D helicopter. The 5K LCRT Forklift Army Acquisition Objective (AAO): 2,776 Systems. The minimum sustainment rate is 15 systems.

The All-Terrain Lifter, Army System is a family of, C-130 airplane, transportable 10,000 Pound (LB) capacity variable reach rough terrain forklifts. The ATLAS primary missions include handling all classes of supply, stuffing and un-stuffing standard Army pallets in 20 foot ISO containers, handling break-bulk cargo and loads weighing up to 10,000 LBS on Air Force 463L pallets. It is a key component to the Army's Container Oriented Distribution System which is essential to the deployment of an Expeditionary Army and sustainment of a deployed force. The ATLAS forklift mobility capabilities support all the Army's Brigade Combat Teams and units from seven branches (Transportation, Quartermaster, Ordnance, Missile & Munitions, Engineer, Aviation and Medical). Crew survivability is being addressed in accordance with the Army's Long Term Armor Strategy (LTAS). The ATLAS is a military unique vehicle. It operates in all terrains, has cross country mobility and road speed of 23 Miles per Hour (MPH). Commercial forklifts cannot meet the military requirements nor the Key Performance Parameters (KPP) identified in the ATLAS requirements document. The ATLAS is capable of performing all mission requirements and meets EPA Tier III emissions requirements, with increased reliability and survivability. The ATLAS system is a CDU system enabling and supporting DSCA operations (i.e. Disaster Relief). The ATLAS AAO is: 4,645. The Army has procured 4,399 Systems.

Description:																	
The Combat Training Centers (CTCs) are the Army's premiere collective training centers. The CTCs provide high-fidelity Live, Virtual and Constructive (LVC) Brigade training rotations which prepare Brigade Combat Teams, Joint partners, and supporting units to deploy in support of the Army's Sustainable Readiness Model (SRM). The CTC program supports the National Training Center (NTC), the Joint Readiness Training Center (JRTC), and the Joint Multinational Readiness Center (JMRC). The CTCs primary goal is to develop agile and adaptive leaders at the tactical, operational and strategic levels while providing BCTs the core training necessary to conduct decisive action in a dynamic operating environment.																	
The Combat Training Center Instrumentation System (CTC-IS) is a communications, analysis and feedback system that provides a realistic operational environment for training the Brigade Combat Team (BCT) and below in preparation for deployment to conduct Unified Land Operations (ULO). It is comprised of voice, video, and data instrumentation subsystem networks that include software, hardware, work stations, base-station equipment, communications infrastructure, voice radios, data devices, and interfaces. The Instrumentation System provides the Combat Trainer (CT) critical situational awareness for training safety, analysis, and feedback capabilities to conduct After Action Reviews (AARs).																	
The Combat Training Center Military Operations on Urban Terrain Instrumentation System (CTC MOUT-IS) provides instrumentation for the collection, data transfer, control, editing and presentation of training exercises including realistic battlefield effects, targetry, and night operations. The After Action Review (AAR) theater provides a multi-media environment with video replay capability to enable discussions and assessments of unit performance during exercises. Program instrumentation is fielded at the National Training Center (NTC), the Joint Readiness Training Center (JRTC), and the Joint Multinational Readiness Center (JMRC).																	
The Combat Training Center LIVE FIRE Modernization (CTC LIVE FIRE MOD) provides Future Army System of Integrated Targets (FASIT) qualified live-fire capable targets: stationary armor targets (SAT) with accompanying battlefield effects simulators (BES); stationary infantry targets (SIT); human urban targets (HUT); double-arm SIT's; moving infantry targets (MIT); and non-FASIT qualified Aviation 3-D and Unattended Aerial Systems (UAS) targets which provide a capability for the CTCs to support the transition from Mission Rehearsal Exercise/Situational Training Exercise (MRE/ST) rotations to Unified Land Operations (ULO) against a hybrid threat.																	
The CTC Aviation program procures and installs instrumentation capabilities on the Light Utility Helicopter (LUH) and for the Instrumentation System (IS) to track newly fielded Light Utility Helicopters (LUH) performing Observer/Controller (OC) and Opposing Forces (OPFOR) roles at the three CTCs. The CTC Aviation program provides the capabilities to communicate with LUH organic onboard radios via the CTC ground-based Observer Controller Communications Systems (OCCS). The OPFOR capability provides a high-fidelity threat to the BLUFOR in training at the CTCs and the OC capability provides and aids the control of the CTC exercises to ultimately achieve the objective of improved and sustained readiness of the force.

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 70: Training Equipment		P-1 Line Item Number / Title: 1780MA6600 / Combat Training Centers Support
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		

The OPFOR Surrogate Wheeled Vehicles (OSWV) program procures technical wheeled vehicles, unique Visual Modifications (VISMODs), and Civilian on the Battlefield Vehicles (COBVs). This capability provides for a more realistic replication of OPFOR and Civilians on the Battlefield (COB) vehicle environment that rotational units must train against.

The Army identified an operational gap in the training strategy for the OPFOR Integrated Air Defense System (IADS). It's a collection of enemy weapons systems that engage Army aviation assets. Training Aircraft Survivability Equipment (ASE) Stimulation Suite (TASS) is a live training system consisting of aircraft components and ground emitters that replicate current and emerging enemy Air Defense systems. Its fidelity supports individual pilot training as well as the collective training requirements of the Brigade Combat Team (BCT) to fully plan, prepare, execute and react against an enemy air defense weapons at the Combat Training Centers (CTC). The Integrated Air Defense System Radar Signal Emulator (RSE) replicates an enemy multi-layered, short range, medium and high altitude air-defense system to execute unified land operations against the current or projected threat.

Independent Commercially Compatible Cellular Network System (IC3NS) provides a closed loop, commercially available cell phone communications infrastructure at the Maneuver Combat Training Centers (CTCs) that portrays the OPFOR cellular telephone network portion of the Operating Environment to allow BCTs to train on exploit/defeat the network tasks.

Opposing Forces (OPFOR) Surrogate Vehicles (OSV) Tank Thermal Sites (TTS) replaces obsolete and unsustainable M60 TTSs at the Combat Training Centers (CTCs). The current TTSs that the CTCs' OPFOR have on their OPFOR Surrogate Vehicle (OSV) are causing operational issues specifically at NTC where approximately half of their fleet has non-functional TTSs. With the current Operational Environment, US Army units must train against forces that have near peer capabilities which the current TTS system does not meet. This program will provide a near peer TTS that is common to today's M1 Abrams Tanks and M2 Bradley's (Block 1 Version 2nd Generation Forwarding Looking Infrared (FLIR)) which will allow the CTCs' OPFOR to fight safely at night.

The Opposing Forces (OPFOR) Vehicles program consists of two variants, the Opposing Forces Surrogate Training System Main Battle Tank (OSTS-MBT) and the Opposing Surrogate Vehicle. They are used in force on force training as the OPFOR in active battle scenarios. Both vehicles are based on the M113 platform with an added turret and other modifications for opposing force visual recognition; to look like an opposing force combat vehicle.

The Cyber Operations systems shall represent a peer threat Offensive Cyber capability in a collective training environment. The Cyber Operations systems require the ability to replicate the complexities of the World Wide Web and the information domain of the Operational Environment. The EW, Cyber, and Space Operations systems shall be able to operate within the designated geographic and electromagnetic spectrum confines of the respective training center. The EW, Cyber, and Space Operations systems shall create a threat environment which requires the Rotational Training Unit (RTU) to identify situations which require external (higher headquarters or supporting agency) support to mitigate the threat or to seize opportunity in the EMS Operational Environment (OE). The EW/Space Operations systems require the ability to replicate competitive threat signatures to enable the RTU to execute Mission Command, Movement and Maneuver, Intelligence, Fires, Sustainment, and Protection operations to identify and mitigate the threat.

Justification:

FY 2019 Base procurement dollars in the amount of \$123.228 million supports the following efforts:

FY 2019 Combat Training Center Instrumentation System (CTC-IS) Base procurement dollars in the amount of \$40.868 million procures Joint Multinational Readiness Center (JMRC) modernization to include five new communications sites, composed of both fixed towers and High Mobility Multipurpose Wheeled Vehicle (HMMWV)-mounted mobile (Remote Base Station - RBS) capabilities, to increase the spectrum coverage to near 100% over the JMRC training areas. JMRC is providing the HMMWVs to include operations and maintenance costs associated with the vehicles. Both types of sites will have base stations and ancillary components to support the Observer Controller Communications System (OCCS) voice network and the Range Data Measurement Subsystem (RDMS) Tactical Engagement Simulation (TES) data network. Funding will also be used to perform essential lifecycle activities on the existing subsystems of the fielded Instrumentation Systems located at the National Training Center (NTC), JRTC, and JMRC. These essential lifecycle activities consist of Information Technology (IT) Hardware Replacement, Continuous Technology Refresh (CTR), and Post Deployment Software Support (PDSS) to ensure that the Instrumentation System subsystems do not become obsolete and that there is a continuing evolution of system capability over the lifecycle of the Instrumentation Systems at the three Combat Training Centers.

FY 2019 Combat Training Center Military Operations on Urban Terrain Instrumentation System (CTC MOUT-IS) Base procurement dollars in the amount of \$11.379 million procures Continuous Technology Refreshment (CTR) to evolve the system architecture to Common Training Instrumentation Architecture (CTIA) Version 4 standards for the 3 CTC MOUT areas at National Training Center. All cameras, IT equipment, and software will be replaced. The site will also receive new user Manuals, New Equipment Training, and interim contractor support.

FY 2019 Combat Training Center LIVE FIRE Modernization (CTC LIVE FIRE MOD) Base procurement dollars in the amount of \$4.834 million procures the Capability Set 3 package of targets for JRTC, which will close out the JRTC CTC Live Fire requirements and targets for the NTC. Total quantity of 477 target kits include 325 Stationary Infantry Targets (SITs), 87 Double Arm Targets (DATs), 4 Moving Armor Targets (MATs), 61 Moving Infantry Targets (MITs), ancillary equipment, and integration.

FY 2019 OPFOR Integrated Air Defense System (IADS) Base procurement dollars in the amount of \$5.910 million procures visual modification (VISMOD) mock-ups with thermal signatures to replicate Threat air defense systems, Ground Threat Emitters (GTEs), and aircraft instrumentation kits in support of opposing threat training at the National Training Center, Joint Readiness Training Center and the Joint Multinational Readiness Center.

FY 2019 Independent Commercially Compatible Cellular Network System (IC3NS) base procurement in the amount of \$4.482 million procures closed loop cellular infrastructure for Opposing Force (OPFOR) use during training rotations at the National Training Center (NTC) and Joint Readiness Training Center (JRTC). The IC3NS program begins in FY19 with the procurement of 3G cellular infrastructure and subsequent fielding during FY20. Phase II, 4G cellular infrastructure fielding occurs in FY23-24.

FY 2019 Opposing Forces (OPFOR) Surrogate Vehicles (OSV) Tank Thermal Sites (TTS) Base procurement dollars in the amount of \$27.382 million procures replacement thermal sights for the OSV and Main Battle Tank (MBT) fleet and support for the new sights. These sites replace obsolete inadequate equipment in order to provide a near peer TTS that is common to today's M1 Abrams Tanks and M2 Bradley's (Block 1 Version 2nd Generation FLIR). This will allow the CTCs' OPFOR to fight safely at night.

FY 2019 Opposing Forces (OPFOR) Vehicles Base procurement dollars in the amount of \$23.000 million funds the conversion of 26 each M113 family of vehicles (FOV) into two variants which consist of 12 Opposing Forces Surrogate Training System Main Battle Tanks (OSTS-MBT) and 14 Opposing Surrogate Vehicles.		
FY 2019 Base procurement dollars in the amount of \$0.573 million procures program management and travel in support of OPFOR Surrogate Wheeled Vehicles (OSWV) program.		
FY 2019 Base procurement dollars for Operational Environment and Infrastructure Improvements in the amount of \$3.000 million procures integration of the Cyber and Electro-Magnetic Activities (CEMA) and Integrated Air Defense Systems (IADS) integration with the Combat Training Center (CTC) Instrumentation System (IS).		
FY 2019 Base procurement dollars for EW/Space/Cyber in the amount of \$1.800 million procures and integrates IT equipment in support of the Cyber Environment Replication (CER) program.		
FY 2019 Base procurement dollars procure training devices and systems in support of U.S. Army Readiness to support a balanced investment strategy for the Army's approved force structure and the Army's Sustainable Readiness Model (SRM).		
All quantities support the Active Army.

(†) indicates the presence of a P-21

Remarks:

PEO STRI = Program Executive Office for Simulation, Training and Instrumentation
Army Contracting Command, (ACC) Orlando, FL

EW/Space/Cyber are COTS items.

CTC Live Fire Modernization Target Kit costs are dependent on the quantities and the types of targets being procured per year. For example, FY 19 is the only year that the program is procuring MATs, which are by far the most expensive type of target at an estimated 177K each, followed by MITs at 29K each. Target Kits are GOTS items.

P-5A cost elements with no presence of a P-21 is due to the total cost being less than the \$5 million threshold identified in the published FY 2019 President's Budget Submission (PB) Resource Formulation Guide (RFG). RFG, page 10-11, states, "If any of the cost elements on the P-21 is under \$5 million, that element will not be generated."

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:															
The Army continues to build on a major initiative with the Non-System Training Device (NSTD) program to introduce realistic and effective training devices into the individual and unit training setting. These devices bring into play many aspects of the combat environment (smoke, noise, confusion, stress, etc.), which provide our Soldiers with a valuable experience of battlefield conditions in a training environment. This effort includes the acquisition of training capabilities that support force-on-force training, force-on-target training, engagement simulation, and classroom instruction. Devices and simulations are being fielded to minimize resource consumption which will affect a direct cost reduction through conservation of energy and ammunition. These devices provide capabilities that allow Soldiers, leaders, and units to train tasks and missions that would be unsafe or too resource intensive to conduct with actual weapons, weapons systems, and ammunitions or if done in the actual environment. This budget line supports all Other Procurement, Army (OPA) funding for Non-System Training Devices (NSTD). It procures a variety of NSTD items such as the Home Station Instrumentation Training System (HITS), Live, Virtual, Constructive Integrating Architecture (LVC-IA), Army Targetry System (ATS), Digital Range Training System (DRTS), Integrated Military Operations in Urbanized Terrain (MOUT) Training System (IMTS), Battle Command Training Capability - Equipment Support (BCTC-ES), Common Training Instrumentation Architecture (CTIA), Intelligence & Electronic Warfare Tactical Proficiency Trainer (IEWTPT), Target Modernization, Joint Land Component Constructive Training Capability (JLCCTC), Common Battle Command Simulations Equipment (CBCSE), Joint Pacific Multinational Readiness Capability-Instrumentation System (JPMRC-IS), Call For Fire Trainer (CFFT), Engagement Skills Trainer (EST), Instrumentable Multiple Integrated Laser Engagement System (I-MILES), Basic Electronics Maintenance Trainer (BEMT), and Medical Simulation Training Center (MSTC).															
The Engagement Skills Trainer (EST) is the unit/institutional, indoor, multipurpose, multi-lane, small arms, crew-served and individual anti-tank training simulation that enables training across three different modes: individual marksmanship; small unit (collective) gunnery and tactical training; and judgmental use of force (shoot/don't shoot), which includes escalation of force/graduated response scenarios.															
The Call For Fire Trainer (CFFT) family of systems is a lightweight, rapidly deployable, observed fire training system that provides simulated battlefield training for Fire Support Specialists (FSS), Joint Fires Observers (JFO), and Soldiers. The system provides simulated battlefield training to conduct Indirect Fires, Close Air Support, Close Combat Attack, and Naval Surface Fire Support. The CFFT Immersive System provides the capability for Army, Joint, Multinational, and Special Operations Forces to conduct advanced, complex, and realistic fires training at the Fires Center of Excellence, Ft Sill, OK. CFFT is a critical training enabler to support Warfighters in applying precision fires on target to prevent fratricide and minimize collateral damage.															
The Basic Electronics Maintenance Trainer (BEMT) is a stand-alone, non-system training device that supports critical basic electronics training for 40 different Military Occupational Specialties (MOS) in all aspects of basic electronics, including theory and hands-on application. The system allows instructors and administrators to assign lessons and practical exercises to either a class of networked student stations, or individual students, and track their progress.

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 70: Training Equipment		P-1 Line Item Number / Title: 2062NA0100 / Training Devices, Nonsystem
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0654715A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
The Home Station Instrumentation Training System (HITS) provides a high-fidelity deployable instrumented training capability to support platoon through battalion level Live Force-on-Force Training. HITS tracks the location of soldiers and vehicles and simulates weapons' effects and engagements, allowing units to "Train as they Fight" against live opponents. HITS provides accurate feedback to training units. HITS consists of light deployable components that can be rapidly assembled/disassembled and transported to support deployed training. HITS integrates with future and legacy MILES. HITS is a member of the Live Training Transformation (LT2) family of training systems and shares several hardware and software components with the Instrumentation Systems (IS). HITS provides the Live domain for Live-Virtual-Constructive (LVC) training integration.		
The Joint Pacific Multinational Readiness Capability-Instrumentation System (JPMRC-IS) is a transportable instrumentation system that provides instrumented training for the Brigade Combat Team and below. JPMRC-IS a rapidly deployable, self-supported system providing an Observer Controller Communications Systems, Battle Command Systems, Instrumentation System, Embedded Constructive Simulations, TAF workstations, Voice and Video Monitoring, AAR presentation, and provides its own power generation. JPMRC-IS performs the end-to-end mission functions of Exercise Planning, System Preparation, Exercise Management, Monitoring, and Control, Training Performance Feedback through onsite AARs and unit Take Home Packages.		
The Medical Simulation Training Center (MSTC) is a critical readiness enabler for combat units as it provides realistic medical training to both medical and non-medical Soldiers in the Active, Reserve, and National Guard. MSTCs provide hands-on instruction on the latest battlefield trauma and critical care techniques based on Army Medical Department (AMEDD) approved performance oriented Program of Instructions (POI). Medical treatment validation exercises simulate the high stress of performing medical interventions in combat. MSTC supports Unit Medical Readiness by validating Combat Medic Military Occupational Specialty (MOS) (68W) Emergency Medical Technician (EMT) biennial recertification requirements and provides Combat Lifesaver (CLS) training to non-medical Soldiers.		
The Intelligence Electronic Warfare Tactical Proficiency Trainer (IEWTPT) is a Non-System Training Device (NTSD) which supports training intelligence soldiers by simulating and stimulating Military Intelligence (MI) organic or surrogate equipment. It enables sustainment of critical individual, crew, and collective tasks/skills and is the core of the United States Army Intelligence Center of Excellence (USAICoEs) military Intelligence (MI) holistic training strategy and includes both stand-alone and network enabled training capabilities. IEWTPT provides a realistic Intelligence target environment for Multi-Intelligence disciplines such as Signals Intelligence (SIGINT), Imagery Intelligence (IMINT), Human Intelligence (HUMINT), Counterintelligence (CI), Geospatial Intelligence (GEOINT) and All Source Intelligence and must stimulate and emulate multiple intelligence, surveillance, reconnaissance (ISR) platform systems such as: PROPHET, Distributed Common Ground Station-Army (DCGS-A), and Aerial Intelligence assets such as Enhanced Medium Altitude Reconnaissance and Surveillance System (EMARSS), Airborne Reconnaissance Low-Enhanced (ARL-E), and Guardrail Common Sensor (GRCS). IEWTPT provides static and dynamic training capabilities (interactive environment for individual, collective, and Live, Virtual, and Constructive integrated mission rehearsals/exercises utilizing a constructive simulation feed) in an integrated, playback, and stand-alone mode. IEWTPT is composed of two major components: Technical Control Cell (TCC) and the HUMINT Control Cell (HCC). The IEWTPT TCC provides critical Intel enhancements to a constructive simulation to stimulate go-to-war or surrogate ISR systems where system operators/analysts are able to exploit exercise intelligence data during training, just as they would in a "real world" operation.		
Joint Land Component Constructive Training Capability (JLCCTC) supports Army Title X training worldwide for Army Commanders and their staff at Mission Training Complexes (MTCs), Training and Doctrine Command (TRADOC) facilities, and other customer locations. JLCCTC trains Commanders and their staff in Decisive Actions to include offensive, defensive, stability, and civil support operations. JLCCTC is a software modeling and simulation capability that contributes to Army Training Mission Area by providing appropriate levels of model and simulation resolution and fidelity to support unit collective and combined arms training. The JLCCTC provides a composable federation configurable to any combination of models and simulations, as required by training exercise intent/design. The JLCCTC provides accurate representations of tactically and operationally relevant land warfare operations executed in a contemporary Joint operating environment/context in support of Army Training and Readiness.		
Common Battle Command Simulation Equipment (CBCSE) is a fundamental element of the Joint Land Component Constructive Training Capability (JLCCTC) Program of Record, which supports institutional and operational Mission Command training for Active, Reserve, and National Guard units. CBCSE procures and fields commercial-off-the-shelf hardware, software and delta/new equipment training for Army Hub and Spoke Mission Training Complexes in support of JLCCTC. CBCSE must be capable of running each JLCCTC fielded software version of Army training in support of Army Force 2025 and beyond.		
Army Targetry Systems (ATS) will provide computerized live fire Armor and Infantry training ranges to the Army, Active Reserve (USAR) and Army National Guard (ARNG) installations. This equipment enables trainers to develop scenarios and to control targetry and battlefield simulation devices so that soldiers can practice wartime mission tasks in a stressful battlefield environment. The computerized system also provides feedback on individual and unit level performance to enable recognition of problem areas needing corrective action while at the same time recognizing positive performance. This equipment reinforces correct procedures and fosters soldier's confidence. The fielded equipment includes stationary and moving infantry and armor targets along with battlefield simulators for sound and sight. All ranges can be used with Multiple Integrated Laser Engagement System (MILES) equipment.		

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 70: Training Equipment		P-1 Line Item Number / Title: 2062NA0100 / Training Devices, Nonsystem
ID Code (A=Service Ready, B=Not Service Ready): Line Item MDAP/MAIS Code: N/A	Program Elements for Code B Items: 0654715A	Other Related Program Elements: N/A
The Digital Range Training System (DRTS) provides new and modern ranges capable of training, evaluating and stressing Soldiers and their modern equipment with a realistic train-as-you-fight environment. Four standard training ranges Digital Multi-Purpose Range Complex (DMPRC), Digital Multi-Purpose Training Range (DMPTR), Battle Area Complex (BAX) and Digital Air Ground Integrated Range (DAGIR) will utilize all available combat systems capabilities, and digitally integrate them to manage all forces undergoing individual and collective live-fire training and qualification. These Training Systems replace obsolete, inadequate training methods and equipment in order to simulate new weapon systems, challenge Soldiers, incorporate the Digitized Force, and provide enhanced training data collection and After Action Review (AAR) capabilities. They incorporate digital system training as well as integrate multiple ranges and training environments for the training units.		
The Integrated Military Operations in Urban Terrain (MOUT) Training System (IMTS) program fields the Combined Arms Collective Training Facility (CACTF), the Collective Training Facility (CTF), Live Fire Shoot House (LFSH), and the Urban Assault Course (UAC). The IMTS training systems provide instrumentation to enable training and After Action Review (AAR) of Soldier training exercises up to the battalion level combined training for the Active and Reserve Component Army. The CACTF, CTF, and LFSH enable training and AAR under daylight and night vision environments.		
The Target Modernization program enhances the warfighter's live fire readiness by providing continued software support and enhancements for the Government owned target control system software Targetry Range Automated Control and Recording (TRACR), integration with legacy range adapter software (interfacing TRACR to legacy targets, allowing range upgrades without the need to replace the targets), a single Information Assurance accreditation and support package, and synchronization with the Common Training Instrumentation Architecture (CTIA). Target Modernization supports the revitalization vice replacement of existing ranges. The Target Modernization program provides a single common target specification, standards, and interfaces for all target system devices, and provides support for Live, Virtual, and Constructive Training Environment.		
Battle Command Training Capability - Equipment Support (BCTC-ES) provides the furniture, fixtures, equipment (FFE), network, Reconfigurable Tactical Operation Center (RTOC), technical control, classroom and work cell capabilities, and technical tools required for all Army Mission Training Complexes (MTC) and for the associated Military Construction Army (MCA) infrastructure. Enabling the linkage of constructive simulations to Mission Command (MC) systems and extending unit communications. BCTC-ES provides equipment that integrates Army MC Systems into Tactical Operation Center (TOC) sets, providing visualization of the Common Operating Picture (COP). It also supports the requirements for the DoD Information Assurance Certification and Accreditation Process (DIACAP), which helps enable the linkage within a MTC that supports secure and distributed MC/Simulation training. Provides Architectural and Engineering (A&E) support to the MTC Design Board for new MCA development.		
The Instrumentable-Multiple Integrated Laser Engagement System (I-MILES) program enhances the warfighter's capability to prepare for combat operations allowing training and assessment of individual and collective tasks during force-on-force operations. The devices use an eye-safe laser to replicate the engagement effects of their intended "line of sight" weapons systems. I-MILES provides realistic, real-time casualty effects for force-on-force tactical engagement training scenarios and its ability to integrate into training instrumentation systems provide for high fidelity combined arms combat exercises. Due to their modular design, I-MILES devices are approved for use at Home Station, the Combat Training Centers (CTCs) and in the theater of operations to meet training requirements. The current "Instrumentable" MILES replaces the previously fielded "Basic" MILES, which cannot integrate into training instrumentation systems. Army Tactical Engagement Simulation System (A-TESS) will combine existing I-MILES capabilities with indirect fire capabilities into a single TESS program of record.		
The Common Training Instrumentation Architecture (CTIA) is the critical core product-line architecture of the Live, Virtual, Constructive Integrated Training Environment (LVC-ITE). The program provides Army owned software, product-line architecture, product-line software, standards, services, and the architectural framework for supporting the Live Training Transformation (LT2) of Live Training Systems (LTS) to include Army-wide live instrumented Force-On-Force (FOF) and Force-On-Target (FOT) training requirements. It includes Post Deployment Software Support (PDSS) and technology refresh for the LT2 family of LTS as well, with over 200 fielded training systems across the Army at both CONUS and OCONUS locations. CTIA also provides the live training standard for achieving and maintaining interoperability between LTS and the Live, Virtual, Constructive Integrating Architecture (LVC-IA), battle command and control (C2) systems.		
The Live, Virtual, Constructive - Integrating Architecture (LVC-IA) provides a net-centric linkage that collects, retrieves and exchanges data among existing Training Aids, Devices, Simulations, and Simulators (TADSS) and Mission Command Systems. LVC-IA provides the architecture that enables the Army to utilize the Live, Virtual, and Constructive training devices in the Army's Integrated Training Environment (ITE). The LVC-IA defines "how" information is exchanged among the different LVC domains and the Mission Command Systems. The LVC-IA provides enterprise level tools for exercise control, After Action Review, and system information assurance. It also provides hardware and software to interface the different Live, Virtual, and Constructive communication protocols and provides a correlated common operating picture for the training audience on their organic Mission Command equipment. The integration of the Live, Virtual, and Constructive and Gaming TADSS with the Mission Command equipment will enable larger and more robust training events to better prepare U.S. Soldiers for their missions at an overall reduced cost. The end-state goal is to enable an LVC Integrated Training Environment that can cost effectively replicate Operational Environments to provide a high level of value-added training and mission rehearsal opportunities to Army Commanders and their Soldiers enhancing Army training and readiness.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.									
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
Justification: Reduction in funding from FY18 to FY19 is primarily due to a reduction in Program Management Office cost, resulting from the movement of civilian pay from procurement funding to operations and maintenance funding.									
FY 2019 BASE dollars in the amount of \$228.598 million supports the following efforts:									
Soldier Training Support program of \$44.614 million consists of:									
FY 2019 Base procurement dollars in the amount of \$4.553 million will be used to perform essential lifecycle activities on the existing 15 fielded Home Station Instrumentation Systems (HITS). The Continuous Technology Refresh (CTR) and Post-Deployment Software Support (PDSS) efforts will focus on upgrading the two HITS versions to a common and Government owned Exercise Control product with more maintainable, sustainable software and hardware. PDSS will maintain the system relevancy and ensure concurrence of combined arms training capabilities with integration into Live Virtual Constructive Integrated Architecture (LVC-IA) for simulation interoperability.									
FY 2019 Base procurement dollars in the amount of \$14.161 million will be used to procure continued Post Development Software Support(PDSS), Continuous Tech Refresh(CTR) and funding capabilities to support the Full Operational Capability(FOC) of the Joint Pacific Multinational Readiness Capability Information System (JPMRC-IS) located at Schofield Barracks, HI.									
FY 2019 Base procurement dollars in the amount of \$0.416 will support the fielding of upgraded systems. The use of the Call For Fire Trainer (CFFT) maximizes and enhances live training, and is used for total recertification of Joint Fires Observers (JFO), reducing time and cost while enabling readiness.									
FY 2019 Base procurement dollars in the amount of \$15.137 million will provide (6) Medical Training Command and Control (MT-C2) platforms. The MT-C2 enables MSTC training environment manipulation, medical scenario integration, mannequin control, audio video (AV) surveillance and recording as well as hostile fire simulations and friendly force engagement control in order to maximize the positive impact and training experience of each fluid training event. Procurement dollars will also provide (129) Tactical Combat Casualty Care - Exportable (TC3-X) Kits to US Army Brigades. Each TC3-X kit consists of, and utilizes, High Fidelity Tetherless Mannequins, Low fidelity Mannequins, Traumatic Amputation Task Trainers, Upper Torso airway/breathing task trainers, a Field Expedient Bleeding System, Moulage kit and an expendables kit. The TC3 - X provides medical training on basic and advanced medical skills necessary for recertification of US Army 68Ws, as well as trains non-medical Soldiers/Combat Lifesavers (CLS)

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 70: Training Equipment	P-1 Line Item Number / Title: 2062NA0100 / Training Devices, Nonsystem	
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0654715A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
on basic lifesaving tasks and techniques often experienced on the battlefield (Warrior Tasks). Procurement dollars will also provide 68W Accreditation Technical Refreshes of the MSTCs Advanced Cardia Life Support (ACLS) & Pediatric Advanced Life Support (PALS) systems.		
FY 2019 Base procurement dollars in the amount of \$9.228 million will tech re-fresh Engagement Skills Trainer (EST) systems and provides for pre-planned product improvements in weapons optics integration. The EST enables readiness and enhances live training, and is identified as a substitute for night and chemical, biological, radiological, nuclear and explosives scenarios. Units without assigned weapons are authorized to use the EST for qualification per regulations.		
FY2019 Base procurement dollars of \$1.119 million supports the Basic Electronics Maintenance Trainer (BEMT) II to procure, upgrade and install 262 BEMT II systems to provide increased capabilities in systems level training, distance learning, and soldiering techniques.		
Intelligence program of \$4.658 million consists of:		
FY 2019 Base procurement dollars in the amount of \$4.658 million supports the Intelligence Electronic Warfare Tactical Proficiency Trainer (IEWTPT) in procuring two Technical Control Cells (TCC) and Interim Contractor Support for two installations and technical and post deployment software support for TCC systems across the Army. The funds will provide concurrency for the Distributed Common Ground Station-Army (DCGS-A) increment 2, Prophet next generation, aerial intelligence, surveillance, reconnaissance sensors and will fund the migration of the cloud computing environment. IEWTPT consists of a blend of non-developmental hardware components and mission specific software to support detailed Army intelligence corps training and readiness at home station locations.		
Command & Control program of \$38.113 million consists of:		
FY 2019 Base procurement dollars in the amount of \$38.113 million will be used to procure Common Battle Command Simulation Equipment (CBCSE) commercial off-the-shelf (COTS) hardware and software, to conduct Joint Land Component Constructive Training Capability (JLCCTC) post deployment software refinement and Pre-Planned Product Improvement (P3I) activities. This includes fixing Problem Tracking Reports (PTRs), First-Use exercise support and Training Documentation updates, Information Assurance/Risk Management Framework (RMF) for Mission Command Concurrency, Synthetic Environment Core (SE Core) and Live, Virtual, Constructive - Integrating Architecture (LVC-IA) Interoperability, Regression Test of external interfaces, Fielding activities, Information Assurance Vulnerability Assessment (IAVA), Configuration Management, and Helpdesk activities. This will enable continued efficient training from the current systems and facilities, then transition these facilities to the objective simulation systems as part of the Constructive Simulation Strategy. This Constructive Simulation Strategy will merge software from two Federations (Multi-Resolution Federation used for Brigade/Division and above exercises and Entity Resolution Federation used for Brigade and below exercises) into a single Federation solution. Quantities represent sites and vary to configuration of site size, therefore, causing unit costs to fluctuate. The base quantity reflects the number of planned fielding events.		
Ranges and Targets program of \$99.640 million consists of:		
FY 2019 Base procurement dollars in the amount of \$15.350 million procures for the Army Targetry Systems (ATS) program a Battle Area Complex Range for Eglin, continuous tech refreshment of 10 ranges for multiple locations, and program support. These ranges will replace existing ranges with new technology and increase throughput capability by providing additional ranges. Readiness of soldiers is critical to saving lives in wartime situations. Training ranges being provided will enhance the quality of training at installations. Accurate feedback to soldiers on training with battlefield conditions helps them learn procedures and techniques that will save lives and achieve success on the battlefield.		
FY 2019 Base procurement dollars in the amount of \$56.436 million procures for the Digital Range Training System (DRTS) program: program management support and travel, Digital Air-Ground Integration for Orchard Range Phase I, Post Deployment Software Support (PDSS), Aviation Integration, and continuous tech refreshment of 8 ranges for multiple locations.		
FY 2019 Base procurement dollars in the amount of \$22.528 million procures for the Integrated Military Operations in Urban Terrain (MOUT) Training System (IMTS) program, Continuous Technology Refreshment (CTR) for eight aging Combined Arms Collective Training Facilities (CACTFs) This brings all CACTFs to the same hardware and software configuration using Government-owned software. Funding also provides new work stations, monitors, equipment room air conditioners, and uninterruptable power source (UPS) for the remaining 24 CACTF sites. The new work stations are required to provide the

hardware components necessary for enabling Windows 10 security capabilities including Trusted Platform Module 2.0 as required by the DoD. The air conditioners and UPS have not been replaced since initial fielding (2004 thru 2010).		
FY 2019 Base procurement dollars amount to \$5.326 million procures for the Target Modernization program a single Government owned common target control system for all Army targets and small arms ranges, this includes: Range Configuration Management efforts to establish and maintain hardware and software baseline definition and control needed to support operations at the 290+ ranges utilizing the TRACR software; Continuous Technology Refreshment (CTR) of the hardware and software baselines to align with emerging hardware changes, and cybersecurity changes; Post Deployment Software Support (PDSS) of the TRACR/TRACR Suite/TRACR LOMAH family of products; evolution of the Future Army System of Integrated Targets (FASIT) standards and specifications to maintain relevancy; provide for integration and procurement of Targetry Range Automated Control and Recording (TRACR) Legacy Range and Device Adapters to support to migration of TRACR to legacy ranges without having to replace targets; and advance the TRACR Product Line to maintain synchronization with Common Training Instrumentation Architecture (CTIA). Funding also provides for the conversion of 44 legacy ranges to the Government owned target control system software Targetry Range Automated Control and Recording (TRACR), provides also for appropriate alignment to cybersecurity requirements, property accountability for the new equipment fielded, and system training.		
Battle Command Training Support Program of \$20.005 million consists of:		
FY 2019 Base procurement dollars in the amount of \$20.005 million procures Mission Command equipment for refresh/ upgrades, network infrastructure equipment for upgrades or to meet emerging Information Assurance and Risk Management Framework (RMF) requirements, and the refresh of furniture, fixtures and equipment for the Mission Command Training Complexes. Battle Command Training Capability-Equipment Support (BCTC-ES), BCTC-ES also funds DIACAP and Risk Management Framework (RMF), server refresh and upgrades, as well as the Electronic Security System (ESS). All of these systems enable initial, sustainment and pre-deployment digital training as well as providing a reach back capability for deployed units. DIACAP and Mission Command refresh quantities reflect all sites which will receive at least one type of these fieldings or equipment installations. The cost varies by site and fiscal year, depending on the size of the MTC or length of time between upgrades. Starting in FY17, the increase in costs show actual costs in regards to refreshing legacy MTCs; the older systems were analog and all technology is currently digital and has increased refresh cost significantly. The onset of the RMF process and the new requirements it is levying on MTC has driven costs up, which is from the increased amount of equipment (HW/SW) required to maintain accreditation and system security.		
MILES Program of \$13.487 million consists of:		
FY 2019 Base procurement dollars in the amount of \$13.487 million procures 498 Vehicle Tactical Engagement Simulation System (VTESS) kits to satisfy our Basis of Issue Plan (BOIP), which replaces the obsolete Basic MILES, and MILES XXI at various installations Army wide. Procurement funding will also provide a technology refresh to the I-MILES fleet which incorporates the Live Training Engagement Composition (LTEC) architecture and Engineering Change Proposals that refine and enhance the VTESS systems during its initial fielding. I-MILES systems support Brigade Combat Teams (BCT) down to the squad level and can be integrated into the Live-Virtual-Constructive Integrated Architecture (LVC-IA) as a component of the full training environment. I-MILES enhances the Warfighter's ability to effectively train individual and collective combat skills in a safe training environment. The data from I-MILES systems provide information for After Action Reviews (AAR) to assess Tactics Techniques Procedures (TTPs). All I-MILES devices integrate into instrumentation systems fielded by Project Manager Training Devices (PM TRADE), providing near real time tracking ability and high-level training fidelity. The completion of the I-MILES basis of issue plan and pure fleeting of the I-MILES product lines will standardize training at Home Station, Combat Training Centers and deployed training environments. Pure fleeting the I-MILES product lines allows maximized maintenance efficiencies and balance requirements to set the conditions for Commanders to conduct improved force-on-force training contributing to unit readiness supporting the 39th Chief of the Staff of the Army's #1 priority of "Readiness".		
LVC Architecture Program of \$8.081 million consists of:		
FY 2019 Base procurement dollars in the amount of \$3.035 million procures for the required CTIA program infrastructure, core lab facility, Post Deployment Software Support (PDSS), Technology Refresh and Modifications for the Live Training Transformation (LT2), Family of Training Systems (FTS), and the Live, Virtual, Constructive Integrated Training Environment (LVC-ITE).		

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018		
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 70: Training Equipment		P-1 Line Item Number / Title: 2062NA0100 / Training Devices, Nonsystem		
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0654715A	Other Related Program Elements: N/A		
Line Item MDAP/MAIS Code: N/A				
FY 2019 Base procurement dollars in the amount of \$5.046 million procures the Live, Virtual, Constructive - Integrating Architecture (LVC-IA) associated hardware and software, Post Deployment Software Support (PDSS) activities, version upgrades, technology refresh/ spares, site support and New Equipment Training (NET) at Army Mission Training Complexes (MTC) in preparation for Force 2025 and beyond. LVC-IA program PDSS provides a capability to support sustainment of the system software and its associated subsystems and components. LVC-IA program performs version upgrades for replacement or modification of components for reasons other than obsolescence including Pre-Planned Product Improvement (P3I), modification, conversion, reconfiguration, retrofit, and technology insertion to increase the performance capability of the system; program will conduct upgrades from Version 2 to Version 3 at five (5) fielded locations. Government Program Management will provide program management; engineering and technical oversight; activities necessary for Army Risk Management Framework (RMF) requirement; contract support and travel for the LVC-IA. FY18 quantity of 7 is not currently populating on the P-40 for NA0121 due to database being locked. It will be updated in the next budget cycle.				
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

^(†) indicates the presence of a P-21

Remarks:

PEO STRI = Program Executive Office for Simulation, Training and Instrumentation

MSTC High Fidelity Tetherless Mannequin (HFTM) are COTS.

Army Contracting Command, (ACC) Orlando, FL

EST - Difference in unit costs are due to quantity levels purchased and associated costs for OCONUS fieldings.

P-5A cost elements with no presence of a P-21 is due to the total cost being less than the \$5 million threshold identified in the published FY 2019 President's Budget Submission (PB) Resource Formulation Guide (RFG). RFG, page 10-11, states, "If any of the cost elements on the P-21 is under \$5 million, that element will not be generated."

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

IEWTPT TCC		2019	General Dyn. Mission Sys Inc / Orlando, FL	Option / FFP	ACC, Orlando, FL	Feb 2019	May 2019	2	384.000	Y		

Remarks:

A new IEWTPT system contract was awarded in 2nd Quarter 2017 to continue the production using Commercial, Off-the-Shelf (COTS) items, integration, fielding, training, hardware/software updates, and technical support of the IEWTPT Technical Control Cell (TCC) system. Post Deployment Software Support (PDSS) version releases are planned as well as product improvement releases.

Army Contracting Command, (ACC) Orlando, FL

NOTES:

(1) P-5 - Support Costs - Decrease in FY18 to FY19 program management costs due to Army civilians being paid by OMA funds. Program changed the cost element from Program Management Cost to Contractor Management. The \$.367 in FY19 is for contractor management support.

(2) Contractor, General Dynamics, changed their name from General Dynamics C4 Sys Inc to General Dynamics Mission Sys Inc.

Flyaway Recurring: Spoke		2019	TBS / TBS	C / FFP	TBS	Oct 2018	Jan 2019	8	603.130	Y		
Remarks: Items are all commercial-off-the-shelf (COTS). Per the Resource Formulation Guidance, no P-21 is required for COTS items.												
Cost decreased because Government civilian labor moved to OMA SAG 435 MDEP level.												
JLCCTC is currently comprised of two federations, Multi-Resolution Federation (MRF) which supports BDE/DIV & above exercises and Entity Resolution Federation (ERF) which supports BDE & below exercises. The Constructive Simulation Strategy combines the capabilities into a single federation solution. The FY 18 and FY 19 Unit Cost (Hub/Spoke) for the JLCCTC federation solution has decreased due to efficiencies gained by implementing the Constructive Simulation Strategy.												
Minimal Common Hardware Platforms (CHP) will be refreshed during FY 18. However, during FY 19, program will resume the planned 5-year CHP refresh cycle.												
New CBCSE contract (Hub/Spoke) was awarded 30 August 2017 (delayed from December 2016). Due to delay in award, Task Order 0002 award is currently planned for February 2018 (originally planned for October 2017). RFP expected January 2018.

^(†) indicates the presence of a P-21

Remarks:

* ATS contractors are Meggitt Defense Systems-Caswell, Minneapolis, MN; Action Target, Provo, UT; SAAB, Orlando, FL; Lockheed-Martin, Huntsville, AL; and Strategic Systems Inc., Decatur, AL. Long term IDIQ contracts have been negotiated with all five sources. Contract awards will be made in some combination to some or all of these sources.

Army Contracting Command, (ACC) Orlando, FL

P-5A cost elements with no presence of a P-21 is due to the total cost being less than the \$5 million threshold identified in the published FY 2019 President's Budget Submission (PB) Resource Formulation Guide (RFG). RFG, page 10-11, states, "If any of the cost elements on the P-21 is under \$5 million, that element will not be generated."

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

Army Contracting Command, (ACC) Orlando, FL

P-5A cost elements with no presence of a P-21 is due to the total cost being less than the \$5 million threshold identified in the published FY 2019 President's Budget Submission (PB) Resource Formulation Guide (RFG). RFG, page 10-11, states, "If any of the cost elements on the P-21 is under \$5 million, that element will not be generated."

Remarks:

I-MILES CVTESS production completed with FY16 PB Funds. I-MILES Individual Weapon System (IWS) production completed with FY17 PB Funds. I-MILES Vehicle TESS (V-TESS) production to be completed with FY16-FY19 Funds.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks: In FY16, the Basis of Issue Plan (BOIP) was changed from 15 to 12 sites. In FY17, the deliveries for LVC-IA Version Upgrades/Tech Refresh commenced once the FY16 fieldings supporting the accelerated upgrades from Version 1 to Version 2 were completed; these deliveries continued the accelerating upgrades from Version 1 to Version 2 at 5 locations. In FY18, the increase in unit cost for LVC-IA Version Upgrades/Tech Refresh is due to the additional integration requirements required to comply with the Army's Constructive Strategy to be completed by FY19. The deliveries of Version 3 upgrade commences in 2nd quarter FY18. Quantities for Version Upgrades/Tech Refresh and PDSS were transposed and will be corrected in a future cycle due to database being locked. In FY19, deliveries continue to upgrade from Version 2 to Version 3 at 5 locations. P-5A cost elements with no presence of a P-21 is due to the total cost being less than the \$5 million threshold identified in the published FY 2019 President's Budget Submission (PB) Resource Formulation Guide (RFG). RFG, page 10-11, states, "If any of the cost elements on the P-21 is under \$5 million, that element will not be generated."

Description:												
The Close Combat Tactical Trainer (CCTT) is a critical readiness enabler for Armored Brigade Combat Team (ABCT) units. CCTT simulators support Commanders' home station collective training and readiness requirements in conducting pre-deployment training in preparation for worldwide combat operations. CCTT immersively and comprehensively trains Armor, Cavalry, Infantry, Mechanized Infantry and Armored Reconnaissance units from squad through Battalion/Squadron level to include their staffs. The primary training audience operates from full-crew simulators, reconfigurable command posts and live battalion command posts to accomplish their combined arms training tasks. CCTT is a ground based, collective training device. CCTT is comprised of full fidelity, manned simulators for the M1 Abrams Main Battle Tank, M2 Bradley Fighting Vehicle (BFV) variants and includes the Reconfigurable Vehicle Tactical Trainer (RVTT) and Reconfigurable Vehicle Simulator (RVS) modules. RVTT is comprised of full fidelity, manned simulators for the High Mobility Multipurpose Wheeled Vehicle (HMMWV) and the Heavy Expanded Mobility Tactical Truck (HEMTT).												
CCTT is an integral part of the Army training strategy, and through planned platform concurrency modernization, will enable CCTT to support Army Force 2025 and Beyond.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 base procurement dollars in the amount of \$33.080 million procures simulator modernization upgrades. A follow-on Production Contract called Manned Module Modernization (M3) will focus on fleet wide tech refresh and concurrency, and a Post Deployment Software Support (PDSS) contract will focus on software maintenance and cybersecurity. FY19 funds will procure hardware and software to enable a complete tech refresh of CCTT site infrastructure, with a focus on reducing gross hardware quantities through the use of virtualization capabilities. FY19 funding will also initiate the Non-Recurring Engineering (NRE) effort for a CCTT image generator tech refresh.

CCTT PDSS will provide services to CCTT fielded systems which includes: Software Maintenance and associated activities for preparing new block releases; Perfective Maintenance to support CCTT concurrency modification to the simulators; Adaptive Maintenance to support CCTT's close affiliation with the One Semi-Automated Forces (OneSAF), Synthetic Environment Core (SE Core), and the Live, Virtual and Constructive-Integrated Architecture (LVC-IA) programs; and Corrective maintenance to support fielded software baselines. It will provide Sustainment Engineering to allow the Government to sustain multiple software releases in the field and conduct Independent Test and Evaluation for verifying and validating the system as releases are prepared. It will provide product support to maintain the overall integrity and quality of the process and products during the operations phase of the system. It will provide the means for maintaining the CCTT systems security by providing Cybersecurity related services that comply with DOD guidance.

Modernization upgrades and software support are essential to continue providing long term operation and sustainability of the CCTT system which is a key training enabler for the Active, Reserve, and National Guard components for training in a simulated, fully interactive, virtual battlefield. The CCTT requirement exists to train and sustain collective (crew through battalion) tasks to meet Army readiness and Mission objectives. CCTT training also contributes to unit readiness by augmenting live training to train tasks that cannot be performed in a live environment due to safety, cost and/or environmental constraints.

The PDSS contract has been delayed and a 6 month-bridge contract implemented as an interim solution in FY17 to ensure continued support to the Warfighter. As a result, the FY17 PDSS costs are lower, as they reflect a 6 month period of performance until the newly competed contract can be implemented.

In 2019, Government program management costs will realign Civilian Pay, which was directed by an OSD directive to move to OMA SAG 435.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the Active and Reserve Components of the Army Forces for homeland defense missions, domestic emergency responses and providing military support to civil authorities.

Remarks:

Unit cost fluctuation from FY18 to FY19 for Modernization/Tech Refresh is due to the specific subcomponents within a simulator receiving a tech refresh change each year. The cost of these subcomponents varies, so the unit costs are expected to adjust annually based on the specific changes being applied to each unit

The program has identified cost efficiencies through economy of scale hardware purchases, streamlining the fielding process and concurrent NRE efforts which decrease the budget funding requirement in the areas of PMO, schedule, production and travel related to the recompete of Modernization/ Tech refresh. The recompete was shifted from Sep 17 to Sep 18. As a result, this award will use both FY17 and FY18 funding and is currently scheduled for Sep 18.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:													
The Aviation Combined Arms Tactical Trainer (AVCATT) is Army Aviation's only Collective Training System of Record to ensure the Active, Reserve and Army National Guard Aviation Units are trained and ready. AVCATT enables unit collective and combined arms air-ground training for AH-64, UH-60, CH-47, UH-72, and UH-72 aircrews within the Live, Virtual, Constructive (LVC) Integrated Training Environment (ITE). The AVCATT also supports the training of Non-Rated crew members in crew coordination, flight, aerial gunnery, hoist, and slingload related tasks via the Non-Rated Crewmember Manned Module (NCM3); which can be linked to AVCATT's UH-60, CH-47, and UH-72 cockpit configurations to support a unit's specific Mission Training Requirements.													
The Synthetic Training Environment (STE) is the next generation holistic collective training capability that will train units at the point of need within the entire range of Multi-Domain Battle tasks in support of Unified Land Operations in a complex operational environment. STE will be a synthetic environment (virtual, constructive, and gaming) utilizing one world terrain, common authoritative data and models that is cloud-enabled through the Army Enterprise Network, and is service-based through the Common Operating Environment. The STE will be available for use anywhere a Soldier needs it and will include Soldier and Squad Immersive Virtual Training (S/SVT) capabilities.

Justification:

FY 2019 Base procurement dollars in the amount of \$24.3 million supports AVCATT/NCM3 Post Deployment Software Support (PDSS), interoperability support, and replacement of obsolete technology. Interoperability support includes the maintenance of Authority to Operate for AVCATT and NCM3, upgrades to the OneSAF semiautonomous computer generated forces, support for interoperability with the Close Combat Tactical Trainer (CCTT), support for interoperability with the Universal Mission Simulator (UMS), and testing/fielding of integrated Live Virtual Constructive Integrating Architecture (LVC-IA).

Technology Refresh includes replacement of and modernization of AVCATT manned module hardware to include sensor video recording system, instrument panel display generator computers and simulator host computers in a virtualized configuration. AVCATT/NCM3 modernization will occur in parallel with platform concurrency upgrades that support the AH-64E v4 (phase 2 of 2), CH-47F v9.4, Common Operating Environment (COE), Integrated Digital Modem (IDM), Link 16 communications, Aircraft Survivability Equipment (ASE) updates, and UH-72 system upgrades. The aforementioned modernization upgrades are essential to enable the long term operational relevancy and sustainability of the AVCATT/NCM3 system, which is a key training enabler for the Active and National Guard components for training combined arms operations in a simulated, fully interactive, virtual battlefield. The AVCATT/NCM3 requirement exists to train and sustain collective (crew through battalion) tasks to meet Army readiness and mission objectives. AVCATT/NCM3 training also contributes to unit readiness by augmenting live training to train tasks that cannot be performed in a live training environment due to safety, cost, and environmental constraints.

AVCATT/NCM3 is an integral part of the Army training strategy, and through planned platform concurrency modernization.

In 2017, the AVCATT Army Acquisition Objective changed from 20 to 21 suites.

In 2018, AVCATT/ NCM3 will shift to an annual tech refresh cycle and complete one tech refresh on each of the 21 suites once per year. This will enable AVCATT/ NCM3 to support Army Force 2025 and beyond.

In 2019, Civilian Pay will be realigned to SAG 435 OMA as directed by OSD.

FY 2019 base funding in the amount of \$8.4 million will support Near Term Capability for the STE program. The Near Term Capability will include the Common Synthetic Environment and Virtual Collective Trainers.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the Active and Reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks:

NCM3 Suite - Procurement are options on existing contracts exercised in 2QFY17. The one-year lead time is based upon historical data for the amount of time required to produce and deliver an NCM3.

Technology refresh - Award date is for award of a new task order to an existing IDIQ contract. Tech refresh in 2018 includes replacement of obsolete data switches, partial replacement of electronic control loading servo control switches, and modernization of manned module computers.

Virtualization - Award dates are for awards of new task orders to an existing IDIQ contract. The award in 2017 includes upgrades to the training environment and Semi Autonomous Forces computers (SAF).

HVAC Obsolescence - Procurement are options on existing contracts exercised in 2QFY17 for 9 units.

Modernization / Tech Refresh - This competitive acquisition is expected to be awarded in June 2019 and will include requirements for the delivery of Modernization and tech refresh of various components of AVCATT and NCM3 to include Helmet Mounted Displays (HMD), Image Generators, Computer Servers, Input/Output (I/O) subsystem, Video distribution and display equipment and aircraft concurrency upgrades. A fully virtualized and modernized AVCATT/NCM3 hardware/software baseline, capable of drawing from a local computing resource pool (local cloud), is the expected deliverable.

STE Reconfigurable Virtual Trainer - This award will take place on the Other Transaction Agreement (OTA) authority in Feb 19 for a total of 28 units.

Remarks:

Note - Lead Times are estimates based on historical information.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:													
The Games for Training (GFT) Program prepares Soldiers and leaders for combined arms maneuver operations for Force 2025 and beyond in support of the Joint Force and allies with tailororable and scalable training and mission rehearsal capabilities. Gaming Technology provides an application to train and rehearse convoy-operations, platoon level, mounted infantry tactics, dismounted operations, rules-of-engagement training, cross-cultural communications training, Improvised explosive device (IED) defeat training, route clearance, ground air coordination, Unmanned Aerial Vehicle (UAV) integration, Stryker Collective Training (SVCT), and other small unit and individual training and mission rehearsal requirements. The GFT program satisfies the Active, the National Guard, and the Army Reserves' educational requirements in the Operational, Institutional, and Self-Development Training Domains with a low-overhead, flexible, persistent training capability on geo-specific and geo-typical terrain that is relevant with all military platforms and weapon systems. GFT comprehensively trains Company and below formations to operate in today's dynamic combat environment. GFT trains higher multi-echelon units and staffs without troops to meet Combatant Commanders' requirements.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$25.161 million allows for the Games for Training (GFT) program to enable sustained readiness by efficiently and effectively building Soldier, leader, and unit competency on technical skills necessary to perform multiple mission types in accordance with current tactics, techniques and procedures in preparation for Force 2025 and beyond. FY19 funds supports the procurement and fielding of 2 suites to support Stryker Virtual Collective Training (SVCT), in addition to 31 classroom suites. The base dollars also performs the concurrency, verification, validation and assessment (VV&A) of the Virtual BattleSpace 3 (VBS3) software license that provides Army Enterprise use rights. Funding procures VBS3 training and technical support, as well as commercial VBS3 software to provide areas of training competency such as engineering tasks, call for fire, and the generation of supporting 3D models. Additionally, funding procures data rights supporting the GFT Program; FY19 is the first year that starts this procurement to allow for full and open competition for future software modifications as required.

Fielding support includes logistical provisioning for de-confliction and coordination with receiving locations as well as oversight for meeting network and cyber requirements. New Equipment Training reflects the creation of training materials and delivery of training for new suites.

Government Management will provide program management, engineering and technical oversight, and travel for the GFT program. Government Furnished Material provides a Web Portal for the centralized distribution, repository of content and tech support of the VBS3 and gaming software for the Army training community. GFT is a critical program enabling other virtual and constructive training capabilities and the Integrated Training Environment (ITE).

The increase in the Gross/Weapon System Unit cost from FY18 to FY19 is due to increase software cost associated with the procurement of commercial data rights supporting the GFT Program; this procurement will provide the Army a fully capable game application available for all individuals, institutions, agencies, and units for training and education purposes. Additionally, this effort will include delivery of the game based training software with an Army-wide license, integration of the software on Government Furnished Equipment (GFE) PCs, fielding, training and technical support with Army data rights.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the Active and Reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks:

New Gaming Hardware Suites/ Gaming System Refresh are COTS procured through the ARMY CHESS Program.

FY18 unit costs for New Gaming Hardware Suites and Gaming Hardware Refresh cost elements should reflect a Unit Cost of \$175.000 thousand; this information is not accurately reflected in the P-5 and P-5a and will be updated in the next available future cycle.

Description:																										
Calibration Sets Equipment (CALSETS) consists of calibration instrumentation housed in fixed facilities or contained within tactical shelters with accompanying power generation equipment. The CALSETS instrumentation provides support to maintenance units and area support organizations from brigade to multi-theater sustainment operations and ensures a cascading transfer of precision accuracy originating from the US National Institute of Standards and Technology (NIST). The calibration sets are designed to support 90 percent of the Army test, measurement and diagnostic equipment (TMDE) workload with an objective of 98 percent. The instruments and equipment procured through this program are assembled into several set configurations (AN/GSM-286, AN/GSM-287, AN/GSM-439, AN/GSM-440, AN/GSM-442, AN/GSM-26(V)1, AN/GSM-26(V)2 and Secondary Reference) and two tactical calibration shelters (AN/GSM-705 and AN/GSM-421A(V)2). These calibration standards sets are integral to verifying the accuracy of TMDE with mandated traceability to accuracy standards. State-of-the-art calibration equipment is required to ensure that advanced technology weapons and systems are maintained at the required state of operational readiness. Systems supported by the Calibration Sets include, but are not limited to, unmanned aerial vehicles (Shadow); military signal and electronic intelligence operations; tactical and strategic communications (Single Channel Ground and Airborne Radio System (SINCGARS)); and ground, missile and aviation platforms such as the Army Family of Medium Tactical Vehicles (FMTV), Abrams, Multiple Launch Rocket System, Patriot, Apache, Blackhawk and Chinook.																										
Army Acquisition Objective (AAO): AN/GSM-286 - 45; AN/GSM-287 - 67; AN/GSM-439 - 37; AN/GSM-440 - 32; AN/GSM-705 - 26; AN/GSM-421A(V)2 - 26; AN/GSM-26(V)1 - 161; AN/GSM-26(V)2 - 37; AN/GSM-422 - 1; Secondary Reference Standards Set - 11

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 80: Test Measure and Dig Equipment (TMD)		P-1 Line Item Number / Title: 0100N10000 / Calibration Sets Equipment
ID Code (A=Service Ready, B=Not Service Ready): A	Program Elements for Code B Items: N/A	Other Related Program Elements: 0604746A
Line Item MDAP/MAIS Code: N/A		
Justification: FY 2019 base procurement dollars in the amount of \$4.270 million support acquisition of low phase noise signal generators, multi-function electrical calibrators (to support various electronic test, measurement and diagnostic equipment used on aviation, communication, missile and radar systems), pneumatic pressure indicators (to support Army pitot-static test equipment (i.e., Army aviation altitude and airspeed testers)), and instrument controllers (used to display all Army calibration procedures and to automate the execution of most Army calibration procedures). These items are components of various calibration sets and may be used in tactical calibration shelters.		
The FY 2019 funding request was reduced for \$2.487 million to account for the availability of prior year execution balances.		
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:															
The Integrated Family of Test Equipment (IFTE) includes the Maintenance Support Device (MSD) for at-system automatic test support and the Next Generation Automatic Test System (NGATS) for consolidation of off-system automatic test and diagnostic equipment requirements. The IFTE systems provide electronic fault isolation, diagnostic and repair capabilities at all levels of maintenance and do it more cost effectively than system-specific testers. They are designed to and are capable of supporting multiple weapons systems. The MSD fleet consists of portable rugged and light (non-rugged) test and diagnostic equipment used at all levels of maintenance to automatically diagnose electronic and automotive subsystems of the Army's ground and aviation weapon systems. The MSD systems provide test and diagnostic support and maintenance automation capabilities that are critical to the readiness of Army units and their equipment. They host interactive electronic technical manuals and expert diagnostics systems, conduct intrusive testing in support of Army weapons and electronic systems, and provide a means to upload/download mission-critical software into weapon system on-board computer electronics. The MSDs are being fielded to support approved Army force structure requirements. They will host the Digital Logbook and Global Combat Support System-Army (GCSS-A) software, provide Army maintainers the capability to connect to the logistics enterprise, and perform maintenance management in an information-enabled environment. The MSDs are the Army's standard at-system test and diagnostic equipment. They are an essential maintenance tool in the support plans for the Army's ground vehicle and aviation fleets, and are in widespread use in deployed units. The NGATS is a mobile, rapidly deployable, reconfigurable general-purpose automatic test and diagnostic system which provides sustainment level maintenance testing and screening directly to the Army's major weapons systems in order to maintain the readiness and availability of those combat systems. NGATS maintains backward compatibility with previous IFTE versions, is Joint Services Next-Generation Test (NxTest) compliant, and includes interservice testing and diagnostic support capability. It is capable of satisfying field, sustainment and depot level requirements for fault isolation, diagnostics and off-system repair of current and future weapons systems. NGATS will be the single automatic test and diagnostic solution in the Army by incrementally replacing the Direct Support Electrical Systems Test Set (DSESTS), all previous IFTE Base Shop Test Facility versions, and depot system-specific automatic test equipment. It is the platform for transitioning Agile Rapid Global Combat Support System (ARGCS) technologies into the Army's weapon system support structure. The ARGCS Advanced Concept Technology Demonstration (ACTD) was sponsored by the Department of Defense (DoD), and all Services are expected to transition demonstrated technologies into their automatic test system (ATS) programs. The NGATS eliminates the requirement for the 1970s era DSESTS and reduces the associated logistics burden and cost of support. It implements a modern test and diagnostic capability to support the new generation of ground-based targeting and observation sensor packages for individual, crew and intelligence gathering systems and equipment such as Stryker Remote Weapons Station (RWS), Improved Tube-launched Optically-tracked Wire-guided missile (TOW) Acquisition System (ITAS), Common Remotely Operated Weapons Station (CROWS) and Common Missile Warning System (CMWS) and also has the ability to improve the testing and diagnostic support of legacy weapons systems.															
Army Acquisition Objective (AAO): MSD - 34,610; AV-MSD - 5002; NGATS - 173

Justification:

FY 2019 Base procurement dollars in the amount of \$76.295 million support acquisition of 14 Next Generation Automatic Test Systems (NGATS) and 2705 Maintenance Support Devices (MSD) to satisfy critical test and diagnostic requirements of Army warfighting systems and to support a balanced investment strategy for the Army's approved force structure requirements. Acquisition of the NGATS will continue deployment of a multi-purpose, multi-echelon off-platform automatic test and diagnostic capability to support many of the Army's weapons platforms such as Abrams, Bradley, Counter Radio-Controlled Improvised Explosive Device (RCIED) Electronic Warfare (CREW)/Duke, Stryker, Common Remotely Operated Weapons Station (CROWS), M777, Paladin Integrated Management (PIM), Tube-launched Optically-tracked Wire-guided (TOW), Avenger and Multiple Launch Rocket System and to achieve the stated Department of Defense (DoD) goal of replacing multiple single function, aging, obsolete and costly automatic test systems with a single tester capable of supporting all weapons systems at field, sustainment and depot maintenance levels. The FY 2019 funding will complete buy out of the entire NGATS US Army Training and Doctrine Command (TRADOC) requirement and replacement of obsolete DSESTS at 10 Armored Brigade Combat Teams (ABCT) in support of the Abrams and Bradley systems. This funding also implements the net-centric logistics capability ensuring maintenance data is leveraged at all support levels through a closed loop data sharing architecture that supports the future logistics concepts as well as improved diagnostics by linking embedded diagnostics and condition-based maintenance. Acquisition of the MSDs will satisfy approved Army force structure requirements. This equipment provides critical test and diagnostics support for weapons and support systems such as the Abrams, Bradley, Stryker, Blackhawk, Chinook, Apache, Patriot, Mine-Resistant Ambush-Protected (MRAP) vehicle, and the Army's diesel-powered tactical wheeled vehicles.

The FY19 OCO includes \$9.495 million to replace obsolete MSDs deployed in Korea and the European theater and to support other overseas contingency operation initiatives.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks:

Unit costs vary from year to year depending upon the configurations purchased to meet projected fielding requirements. Maintenance Support Device (MSD) systems are costed and programmed normally with 60 percent of the MSD fleet equipped with a wireless at-platform test set (WATS) required for testing diesel powered engines and an approximate mix of 50 percent rugged and 50 percent light configurations.

Exhibit P-21, Production Schedule: PB 2019 Army								Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A / 03 / 80			P-1 Line Item Number / Title: 0200MB4000 / Integrated Family Of Test Equipment (IFTE)					

MFR Ref #	Manufacturer Name - Location	Production Rates (Each / Year)			Procurement Leadtime (Months)							
		MSR For 2019	1-8-5 For 2019	MAX For 2019	Initial				Reorder			
					ALT Prior to Oct 1	ALT After Oct 1	Manufacturing PLT	Total After Oct 1	ALT Prior to Oct 1	ALT After Oct 1	Manufacturing PLT	Total After Oct 1
1	Miltope Corporation - Hope Hull, AL	500	1,500	4,000	0	6	3	9	0	5	5	10
2	TBS (1) - TBD (1)	50	1,000	2,500	14	4	6	10	0	4	6	10
3	TBS (2) - TBD (2)	50	1,000	2,500	7	1	5	6	0	4	5	9

Remarks:

Production rates are annual rates.

These items are being procured by other customers from the same production line; therefore, orders below the minimum production rate or lower than the 1-8-5 rate are economical.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

Production rates are annual rates.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:																								
The Test Equipment Modernization (TEMOD) program improves the materiel readiness of Army weapon systems; minimizes general-purpose Test, Measurement, and Diagnostic Equipment (TMDE) proliferation and obsolescence; and also reduces the Army's operations and support costs. These objectives are accomplished through the cost-effective acquisition of state-of-the-art test equipment that is employed for verifying accuracy, operability and safety of Army weapon systems and for supporting those systems at all maintenance levels. The TEMOD program procures general-purpose TMDE that supports all Army commodities and is essential to the continued support of weapon system platforms such as the Abrams Tank, Bradley Fighting Vehicle, Apache Helicopter, Patriot, and Single-Channel Ground and Airborne Radio System (SINCGARS), as well as other weapon systems scheduled for fielding to the current and future forces. The Telecommunications System Test Set analyzes signal quality between communication systems to ensure data exchange accurately. The High End Oscilloscope is used to test, adjust, repair and align communications and electronic systems. The Low End Oscilloscope is a hand-held portable device used to adjust, repair, and align communications and electronic systems. The Radio Frequency (RF) Power Meter Test Set is a solid-state, microprocessor based RF microwatt meter. It has the ability to measure oscillator power, gain, insertion loss, RF attenuation, and antenna, low-power transmitter, signal generator, standing wave ratio and return loss measurements with directional couplers and slotted lines on radios, satellite communication systems and RADAR systems (Sentinel and Patriot). By using a streamlined acquisition process, the TEMOD program realizes discounts of up to 55 percent from the manufacturers' suggested retail prices.																								
Army Acquisition Objective (AAO): Telecommunications System Test Set - 412; Oscilloscope (High End) - 495; Oscilloscope (Low End) - 1294; RF Power Meter Test Set - 586

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$9.806 million support acquisition of additional quantities of the Telecommunications System Test Set, the RF Power Meter, the High End Oscilloscope and the Low End Oscilloscope. TEMOD uses multi-year Indefinite Delivery Indefinite Quantity Firm Fixed Price contracts. Procurements in FY19 include 141 TS-4544 Telecommunication System Test Sets, 68 OS-305 Oscilloscopes, 61 TS-4548 Power Meter Test Sets, and 104 OS-307 Oscilloscopes. These procurements are needed based on the approved Army Acquisition Objectives. Lack of capabilities provided by this equipment will impact unit readiness levels and incur unnecessary risks for Army personnel and equipment.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:													
The Stabilized Binocular provides the Soldier, both mounted and dismounted, with enhanced target acquisition capability. The M25 is a high powered (14X magnification), hand held binocular which uses a gyro stabilizer to compensate for resolution degrading effects of using a hand held high powered optic and/or certain moving vehicular scenarios. The M25A1 is a smaller, lighter weight stabilized binocular which will allow the warfighter to more effectively perform mission than with the heavier version of the M25. The authorized Army Acquisition Objective (AAO) is 11,654.

Justification:													
FY 2019 Base procurement dollars in the amount of \$4.368 million supports the Active Army by procuring 342 M25A1 Stabilized Binoculars.													
FY 2019 Overseas Contingency Operations (OCO) procurement dollars in the amount of \$0.033 supports the Active Army by procuring 4 M25A1 Stabilized Binoculars.													
In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description: The Rapid Equipping Force (REF) supports Combatant Command (COCOM)/Army Service Component Command (ASCC) based on emerging rapid equipment requirements. The REF is an enduring organization (Base funded) per Memorandum, Under Secretary of the Army, 30 Jan 2014, subject: Implementation Plan for Stabilization of the Rapid Equipping Force (REF). The REF is the Army's Quick Reaction Capability (QRC) with the ability to acquire, integrate and sustain Commercial-Off-The Shelf (COTS), Government Off-The-Shelf (GOTS), Non-Developmental Item (NDI), and non-standard equipment solutions to meet urgent combat requirements for globally employed forces. It inserts selected future force technologies, capabilities, and surrogate materiel solutions into deployed, deploying, select-prepared to deploy, and transformational forces for operational evaluation, assessment, and evolutionary development. The REF assesses the provided capabilities to improve future solutions to inform materiel development for the future Army capability requirements and to potentially transition the capability to an Army acquisition program. The REF bridges the gap between the Army's traditional acquisition process and immediate equipping needs. The REF pursues tangible solutions that can be equipped rapidly with a goal of 180 days. The REF focuses on finding immediate and effective game-changing capabilities to increase U.S. Army Force readiness, effectiveness, protection, and lethality in any operational environment. The REF 10-Liner process provides the ability to react quickly to an ever-changing enemy who changes in days and months, not years in a complex world. The REF coordinates with the COCOMs/ASCCs in theater to fully understand their urgent needs, for which the REF acquisition capability may identify, procure, deliver, and sustain solutions to the deployed units. Although the REF works directly with Operational Commanders at all levels, it focuses on Brigade level and below to equip solutions to identified capability gaps. The Army Acquisition Executive designated Program Executive Office (PEO) Soldier as the Milestone Decision Authority (MDA) to institutionalize the acquisition authorities in support of the REF and to provide proper acquisition oversight while enhancing visibility of these efforts. The MDA will ensure flexibility and speed focused on the needs of Soldiers serviced by the dedicated REF Program Management Office (PMO). This establishes a formal acquisition reporting chain that leverages existing reporting venues to ensure appropriate Assistant Secretary of the Army /Acquisition Logistics/Technology (ASA) (ALT) visibility, oversight, and direction.

Justification:

FY19 procurement dollars in the amount of \$9.879 million (Base) and \$18.000 million (OCO) meets urgently needed state-of-the-art technology for immediate warfighter needs for deployed and pre-deploying forces across all ASCCs of the COCOMs and the Global Response Force (GRF).

The FY19 OCO funding in the amount of \$18.000 million is required to support emerging requirements to meet capability gaps in Operation Freedom Sentinel (OFS), Operation Inherent Resolve (OIR), Operation Atlantic Resolve (OAR), Horn of Africa (HOA), and all other OCO funded operations/regions.

The REF may purchase technologies to support: Tactical Satellite Communications (SATCOM) and communications systems; tactical and small Combat Out Post/Forward Operating Base (COP/FOB) Intelligence, Surveillance, and Reconnaissance (ISR) and Force Protection systems; Counter Unmanned Aerial Systems (CUAS); Electronic Warfare (EW) systems; Non-Tactical Vehicles (NTV); Persistent Duration UAS, and Subterranean (SubT) Operations capabilities.

The REF capabilities cross all Warfighter Functions:

1. Mission and Command: \$ 994K (Base) and \$1,812K (OCO) 10.06%
2. Movement and Maneuver: \$1,636K (Base) and \$2,981K (OCO) 16.56%
3. Intelligence: \$2,277K (Base) and \$4,149K (OCO) 23.05%
4. Fires: \$32K (Base) and \$58K (OCO) .32%
5. Sustainment: \$1,572K (Base) and \$2,864K (OCO) 15.91%
6. Protection: \$3,368K (Base) and \$6,136K (OCO) 34.10%

The FY19 breakout is base on the FY17 requirements trend.

Description:																	
Physical Security Systems (MA0780) protect vulnerable critical assets and infrastructure from determined, highly motivated and skilled intruders. Physical Security Systems include the Standard Intrusion Detection Systems (SIDS) (MA0781), the Commercial Intrusion Detection System (CIDS) (MA0782) and Other Physical Security Measures Equipment (MA0783). SIDS includes the Integrated Commercial Intrusion Detection System (ICIDS) program. Other Physical Security Measures Equipment includes the Automated Installation Entry (AIE) program and other efforts consistent with Office of Provost Marshal General (OPMG) security measures.																	
The Physical Security program's goal is to provide enhanced security to Units, Installations and Facilities. The Physical Security/Force Protection programs minimize risks and vulnerabilities by providing Commanders with the appropriate levels of protection through the use of available technology to safeguard personnel and Army assets. By increasing protection to personnel, facilities and equipment, the program supports unit readiness and deployment by reducing the vulnerability of Units and Installations from intruder and terrorist threats.																	
The ICIDS program consists of commercially available interior and exterior sensors, response, entry control, electronic surveillance and command and control devices. ICIDS protects critical national assets, special compartmented information facilities, conventional munitions storage areas, non-nuclear missiles and rockets in a ready to fire configuration, sensitive munitions and other mission essential assets. ICIDS provides the capability for Commanders to detect, assess and respond to unauthorized entry or attempted intrusion into their facilities. The system provides security to Units, Installations and Facilities while minimizing the number of security guards required. Additionally, the item includes ICIDS at new or modified facilities. ICIDS supports a balanced investment strategy for the Army approved force structure and requirements.																	
CIDS provides security measures for conventional arms, ammunition and explosive storage facilities, sensitive compartment information facilities, areas designed as mission essential and vulnerable and other high risk targets. Risks and vulnerabilities are minimized by providing Commanders with the appropriate levels of protection through the use of available technology to safeguard personnel and Army assets. Equipment also protects personnel, facilities and equipment from terrorist or criminal threats. The program supports unit readiness and deployment by reducing Unit and Installation vulnerability and supports the upgrades of the IDS for arms, ammunition and explosives arms vaults and ammunition supply point bunkers for National Guard Facilities that are non-compliant with current Army Directives. Additionally, the item includes IDSs at new or modified facilities. CIDS supports a balanced investment strategy for the Army's approved force structure and requirements. Equipment further protects personnel, facilities and equipment from terrorist or criminal threats. The program supports Unit readiness and deployment by reducing Unit and Installation vulnerability.

Other Physical Security Measures Equipment includes the Automated Installation Entry (AIE) system which complies with DTM 09-012 for Access Control Standards that includes identity proofing and vetting to determine fitness of an individual requesting and/or requiring access to installations and issuance of local access credentials. AIE satisfies the OPMG's Automated Access Control Standards. Installation of AIE will also meet recommendation 3.9 of the DOD Independent Review related to Ft Hood, TX.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY19 Base procurement funding in the amount of \$54.043 million provides funding for SIDS (MA0781) in the amount of \$13.033 million, CIDS (MA0782) in the amount of \$8.602 million and Other Physical Security Measures Equipment in the amount of \$32.408 million:

-\$13.033 million provides installation of ICIDS (MA0781) at five (5) sites: Iowa AAP, IA; Camp Parks, CA; Devens, MA; Camp Buchanan, PR; and Pine Bluff, AR. Funding supports a balanced investment strategy for the Army approved force structure and requirements. All quantities and funding is for Active Components.

-\$8.602 million for CIDS (MA0782) supports procuring six (6) sites of modernized integrated physical security equipment for intrusion detection and assessment, access control, electronic surveillance and force protection equipment at Army Reserve and National Guard Facilities and some Active Army locations. Funding provides security measures for conventional arms, ammunition and explosive storage facilities, sensitive compartment information facilities and other areas containing assets for which policy requires Intrusion Detection Systems. Risks and vulnerabilities are minimized by providing Commanders with the appropriate levels of protection through the use of available technology to safeguard personnel and Army assets. Funding supports a balanced investment strategy for the Army's approved force structure and requirements. All quantities and funding is for Active Components.

-\$32.408 million procures AIE (MA0783) systems at three (3) Tier I and 15 Tier II sites. The Tier I sites will include Fort Drum, NY and Fort Jackson, SC, and Picatinny Arsenal, NJ. The Tier II sites include Deseret Chemical Depot, UT; Presidio of Monterey, CA; Fort Indiantown Gap, PA; Detroit Arsenal, MI; Fort AP Hill, VA; Fort Hamilton, NY; Tooele Army Depot, UT; Fort McCoy, WI; Camp Parks, CA; Fort Buchanan, PR; Camp Atterbury, IN; Camp Shelby, MS; Camp Robinson, AR; Fort Hunter Liggett, CA; and Hays Army Hospital, CA. The AIE systems will be installed to protect Army force projection platforms and high priority installations. The system complies with DTM 09-112 for Access Control Standards that include identity validation and vetting to determine fitness of an individual requesting and/or requiring access to installations. The AIE system satisfies the OPMG's Automated Access Control Standards. Installation of the AIE will also meet recommendation 3.9 of the DOD Independent Review related to Fort Hood, TX. ACPEP provides standardized access control point configurations. All quantities and funding are for Active Components.

FY19 OCO procurement funding of \$6.000 million supports upgrades and expands existing Advantor camera protections for AO Patriot.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these items are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Remarks: Contract Option years are awarded in Mar of the FY. ICIDS Installations take approximately 12 to 18 months to complete from award of Task Order, extremely large installations can take up to 30 months to complete. A = Active Component (COMPO1) ANG = National Guard (COMPO2) AR = Army Reserve (COMPO3) "A" in the Delivery Schedule indicates the Contract Award Date. Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description: This program procures Base-level commercially available equipment from a list authorized by the Table of Distribution and Allowances (TDA) for Army activities but is not Army centrally managed or purchased. Equipment unit cost must meet the currently approved Expense-Investment threshold of \$250,000.00. The equipment supports recurring and generic activities typically performed by garrisons, such as material and cargo handling, engineering and public works, port and terminal operations support. Procures new investment items or replacements for existing equipment that is over-aged, obsolete, or beyond economical repair.												
Installation Management Commands existing BCE fleet is fifteen to forty years old and exceeds overall programmed life expectancy and Army set Maintenance Expenditure Limits (MEL). Equipment is becoming more difficult to repair after years of continual heavy use and repair parts are limited or not available due to discontinuation by the manufacturer causing longer and more frequent down times. Continued maintenance is increasingly cost prohibitive and competes with other critical Base Operations Services for resources. When new procurement is not possible, garrisons turn to leasing equipment at an extremely high cost, over 45% more expensive over the life of the vehicle, to meet mission requirements. If resources do not keep pace with IMCOM's aging fleet, safety risks rise, equipment readiness suffers, and mission support will be compromised as equipment continues to fail.												
Funds are required for CID to purchase life cycle replacement for Scanning Electron Microscope -w/Energy Dispersive X-ray Spectrometer w/Wavelength Dispersive Spectrometer (SEM-EDS/WDS). The requirement is part of the US Army Criminal Investigation Laboratory continuing effort to modernize and advance its forensic capability. This instrument allows for the investigation of elemental and crystalline structure compounds. By using x-rays, the instrument is able to develop patterns of the x-ray bending properties of compounds, better known as "diffraction patterns". This instrument combines the areas of high magnification microscopy with the ability to conduct analysis of detectable energies in the form of x-rays.

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 90: Other Support Equipment		P-1 Line Item Number / Title: 0312MB7000 / Base Level Common Equipment
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Justification: FY 2019 funding in the amount of \$6.633 million (Base) procures the following: In FY 2019, Installation Management Command (IMCOM) will use \$6.104 million to procure 23 essential equipment items. This includes Bulldozers (2), Road Graders (3), Front End Loaders (8), Tractors (2), Cranes (2), Street Sweepers (3), Excavators (1), Water Tanker (1), and Fork Lift (1). These items will be used to meet the immediate/daily needs of 10 Installations. Funding for FY18 acknowledges need to reconstitute aging fleet. In FY 2019, Criminal Investigative Command (CIDC) will use The FY19 (Base) procurement funding in the amount of \$.529 million procures the following: Scanning Electron Microscope -w/Energy Dispersive X-ray Spectrometer/ Wavelength Dispersive Spectrometer (SEM-EDS/WDS) and the X-Ray Diffractometer (XRD): Both instruments are the most advanced pieces of forensic equipment in the laboratory as well as being one of the most sensitive instruments for elemental analysis of materials. The majority of examinations are geared to the analysis of crystalline materials. It serves multiple functions in scientific investigations of materials associated with sexual assaults, assaults, homicides, suicides, arsons, burglaries, shooting investigations, IED investigations, etc. In conjunction with the elemental analysis using SEM/EDS/WDS, the XRD is able to conclusively identify the manner in which elements in a compounds are associated (bonded). An XRD analyzer obtains interference patterns reflecting lattice structures by varying the angle of incidence of the X-Ray beam. Thus, the precision, speed of rotation, and beam size of the x-rays become important parameters by which to judge materials. The impact to the laboratory of not completing these life cycle replacement would be to significantly limit the laboratory's ability to conduct investigations requiring the analysis of explosive analysis, soil analysis, and most significantly the identification of molecular structure of crystalline materials. The requirement must be obtained in order to meet electrical, mechanical and other installation requirements. If not funded, the completion, occupation, relocation, and ability to complete mission functions will be adversely effected. If the current microscope is not replaced, the aging instrument could fail or result in evidence pertaining to homicides and sexual assault cases not being analyzed in a timely manner due to outdated software and incompatibility with Army networks. ----- In FY 2019, CIDC will use \$2.080 million (OCO) procurement funding: OPA funding will allow the Defense Forensic Science Center (DFSC) to procure 8 2-sided expandable shelters to replace the first generation shelters that are not sanctioned by the Joint Committee on Tactical Shelters (JOCOTAS). The ESPs are part of modular, scalable, and customizable force packages for forward forensic exploitation that will be used to establish labs in support of global Geographic Combatant Commands (GCCs) with no organic exploitation capability.

Description:															
This budget line funds Modifications of In-Service Equipment programs. It is used to develop material solutions and also to procure hardware, materials, and the hardware installation cost required to complete the modification. Modifications are performed to correct safety deficiencies; increase mission capabilities and interoperability; extend the useful life; improve supportability; upgrade existing technology; increase efficiency; improve readiness; modernization of legacy communications equipment and links; address obsolescence issues; and to meet new and/or changing statutory and regulatory requirements. By modifying existing equipment, the Army maintains a ready, supportable inventory of equipment that meets current requirements and regulations at a cost considerably below that of buying new equipment.															
Army Watercraft Systems are categorized under Landing Craft, Towing and Terminal Operations, Ship-to-Shore Enablers and Watercraft Operations Support. Landing Craft consist of 8 Logistic Support Vessels (LSV), 34 Landing Craft Utility 2000 (LCU-2000), 30 Landing Craft Mechanized 8 (LCM-8) MOD 1, and 6 LCM-8 MOD 2 (Watercraft Operations Support). Towing and Terminal Operations consist of 6 Large Tug 800 (LT-800), 16 Small Tug 900 (ST-900), and 4 Barge Derrick Crane 115-ton (BD-115). Ship-to-Shore Enablers consist of 3 Modular Causeway Systems (MCS) [each MCS includes 2 Roll-On/Roll-Off Discharge Facilities (RRDF), 5 Modular Warping Tugs (MWT), 1 Causeway Ferry (CF), 1 Floating Causeway (FC)]. Landing Craft discharge combat equipment or troops to austere beaches, undeveloped coastlines and operate in a non-permissive environment. Towing and Terminal Operations and Ship-to-Shore Enablers support ocean and port/harbor towing/salvage operations. Both are critical in denied/degraded ports, Joint Logistics Over-the-Shore (JLOTS) operations, and operations throughout the littorals. Army Watercraft funding supports initiatives to enhance the seaworthiness, safety, and survivability while increasing the lethality, tactical mobility, and operational capability of the Army Mariner. Vessel lethality/Escalation of Force measures have increasingly become an area of vital concern to the Combatant Commanders (CCDR) given the requirement to preserve "freedom of the seas" access in all areas of the world, particularly the littorals, to support maneuver operations in all Areas of Responsibility.															
The Construction Equipment (CE) Modification of In-Service Equipment program funds system modifications and modernization initiatives across the CE portfolio, to include the High Mobility Engineer Excavator (HME); Engineer Rapid Airfield Construction Capability (ERACC) for Dozers, Graders, Scrapers; Family of Loaders (FoL); Skid Steer Loader (SSL); and Hydraulic Excavators (HYEX). These improvements will decrease rising sustainment costs and bridge the gap until new system procurement in future years.															
The Material Handling Equipment (MHE) Modification of In-Service Equipment program funds system modifications and modernization initiatives across the MHE portfolio, to include the Rough Terrain Container Handler (RTCH); All-Terrain Lifter, Army System (ATLAS); and Light Capability Rough Terrain Forklift (LCRTF). These improvements will decrease rising sustainment costs and bridge the gap until new system procurement in future years. In addition, program funds support the procurement and fielding of RTCH Special Tools Kits required to meet Field Level Maintenance requirements per the current Technical Manual for the aging legacy fleet.

Exhibit P-40, Budget Line Item Justification: PB 2019 Army		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 2035A: Other Procurement, Army / BA 03: Other Support Equipment / BSA 90: Other Support Equipment		P-1 Line Item Number / Title: 1110MA4500 / Modification Of In-Svc Equipment (OPA-3)
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Modification kits provide proven capabilities to reduce logistical, resource and operational energy burdens in forward deployed Force Provider base camps resulting in a significant impact on Soldier safety by reducing dangerous and risky resupply missions that result in casualties. In addition to saving lives, this is a fiscally responsible investment as these capabilities have a short return on investment in sustained operations. For example: Energy Efficiency modifications to shelters reduce solar loading by 85% and cooling and heating demands in turn reducing the fuel demand by 35% to power environmental control-ROI is within 180 days; the Power distribution Micro-grid component provides auto on/off capabilities for generators based upon load demand, reducing fuel consumed by over 30%-ROI is with 150 days; and the solid waste disposal piece will provide a safe and efficient capability to dispose of waste generated in the base camp.		
The Food Sanitation Center (FSC) will correct safety and operational shortfalls identified by the user and combat developer by retrofitting older FSCs with improvements from the current version. The modification kit includes automatic thermostatic water temperature control and a transfer pump. These modifications will improve operator safety, and overall sanitation effectiveness while reducing water consumption and environmental impact.		
The Explosive Ordnance Disposal (EOD) Modification of In-Service Equipment will be used to modify tool kits approved for EOD use. The EOD Response Tool Kit has not been modified or upgraded for more than 25 years. The kits contain special tools and equipment that EOD units use to render safe explosive ordnance. The modification will include adding the capability to provide decontamination for teams, as well as individuals, during suspected or confirmed exposure to chemical elements, adding the capability to locate and render safe Improvised Explosive Devices (IEDs), and modifying the kit packaging into smaller, mission unique kits to provide EOD technicians the ability to perform dismounted operations. The tool kits will be fielded throughout the active Army and National Guard units. The Army Acquisition Objective (AAO) for the EOD Response Tool Kit modification is 548. In addition, the Explosive Ordnance Disposal (EOD) Modification of In-Service Equipment will be used to modify the Dismounted Reconnaissance Sets, Kits and Outfits (DR SKO).		
The AN/PSS-14 (HSTAMIDS) upgrade will correct safety and reliability/maintainability shortfalls of the system identified by the combat developer and depot operations responsible for the reset and overhaul of this system. The modifications will include new electronic boards, hand controller hardware, and updated software to address the safety performance of the system. These upgrades will require training/fielding of the system to address changes in the system operation from current software/hardware configuration.		
The upgrade to the Husky Mounted Detection System (HMDS) Ground Penetrating Radar (GPR) panel (antenna) skins will decrease cuts and abrasions resulting from ground contact and improve the ability of the panels to shed water during heavy rain, which will enhance detection performance and operational availability during inclement weather.		
The M41 Protection Assessment Test System (PATS) is a military version of a commercial device - TSI's "Model 8020M PortaCount Respirator Fit Tester" with accessories and carrying case comprise a system designed to check the readiness of protective masks. The M41 PATS is one man portable, approximately 200 cubic inches in size, weighs 4 pounds, and is based on a miniature Condensation Nucleus Counter that continuously samples and counts individual particles that occur naturally in the surrounding air. The M41 PATS measures the concentration of these particles inside and outside the mask and calculates a Fit Factor (FF). The PATS is designed to verify that a protective mask, while worn by a Soldier, is capable of providing a minimum Army requirement FF of 1667. The PATS verifies that: (1) the fit of the mask to the soldiers' face is acceptable, and (2) there are no critical leaks in the mask system. In addition to these features, the PATS can also be used to help screen for unserviceable masks, assist in determining if Preventive Maintenance Checks and Services (PMCS) have been conducted properly on critical components, and assist in training personnel on the proper wearing of the mask. A modernized PATS is needed as the legacy system is no longer manufacturable due to technological obsolescence of critical calibration components. The modernized M41 PATS will have modern technologies and updated components, such as circuit boards, so they are producible and manufacturable and can be maintained into FY2035.		
The M139 Volcano Mine Dispensing System is a mine delivery system. Volcano was originally fielded for use on tactical vehicles from the 1980s along with the UH-60M Blackhawk aircraft. The prime movers for the system have been replaced and currently lack required safety certifications for safe usage. The in-service modification will complete initial engineering activities and complete system life extension modifications for worldwide ground and air use. Configuration and interface issues with the Class VII components of the Mine Clearing Line Charge (MICLIC) system (MK155 Mod 3 Launcher and M200 trailer) will also be addressed. The MICLIC system is used to breach vehicle-wide paths through minefields and to counter Improvised Explosive Device (IED) arrays. Funding will support rectifying interface issues between the launcher and new production M200 trailers, and other initial engineering activities in preparation for life extension modifications.		
The Dry Support Bridge (DSB) is a mobile, rapidly erected, modular military bridging system used by the MRBC. The 40 Meter DSB can span a 40-meter gap or two 20-meter gaps. The 46 Meter DSB can span a 46-meter gap or two 28-meter gaps (with the 46-meter retrofit upgrade). Both have a crossing capability of MLC 96 normal/120 under caution (Wheeled) and MLC 80 (Tracked). The DSB has a road width of

4.3 meters and an emplacement time of 90 minutes or less, with little or no site preparation. The DSB will support the Joint Force Commander's ability to employ and sustain forces throughout the global battle space.		
The Rapidly Emplaced Bridge System (REBS) is a self-deployable/retrievable bridge that provides the SBCT, and potentially IBCTs, an organic tactical gap crossing capability. The REBS can be employed by two Soldiers in less than ten minutes and is air transportable by C-130. The system is transported across the battlefield by a CBT and is comprised of two bridge halves and a pallet that is utilized to launch and retrieve the bridge. REBS is capable of crossing a 13 meter gap with an MLC of 40 normal and 50 caution.		
Comments: In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Justification:

FY 2019 procurement dollars in the amount of \$49.797 million Base and \$19.200 million OCO support the following efforts:

MA4501:

Modification Item #1 MHE Technical Insertion (PEO CS & CSS) - FY 2019 Base procurement dollars for Material Handling Equipment (MHE) in the amount of \$0.141 million funds the procurement and fielding of RTCH Special Tools Kits and provides upgrades modifications, like new control units, to the ATLAS, RTCH and other MHE systems and supports Program Management Support costs.

Modification Item #2 Construction Equipment Tech Insertion (PEO CS & CSS) - FY 2019 Base procurement dollars for Construction Equipment (CE) in the amount of \$2.856 million procures 12 Scraper Armor Kits to support soldier survivability, vehicle reliability and deployability, vehicle operations and visibility in hostile construction areas and Program Management support costs.

Modification Item #3 Army Watercraft Systems (PEO CS & CSS) - FY 2019 Base procurement dollars in the amount of \$8.268 million primarily supports the correction of safety and regulatory deficiencies in the Army Watercraft Legacy Fleet which has not transitioned to sustainment, is approaching the end of Economic Useful Life (EUL) and requires Engineering change Proposals (ECPs) to maintain capability. Also supports Program Management/Matrix Support, and upgrades/modifications to Army Watercraft Systems which are completed as required to resolve any safety and/or sustainability issues, Force Protection - lethal and non-lethal Escalation of Force (EoF) issues, and technical insertions. Additionally, other watercraft modifications are supported such as complex Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) modernization and technology upgrades in the replacement of obsolete systems. These modifications will gain critically required operational improvements or maintain compliance with new and/or changing federal statutory and regulatory mandates in the areas of safety of life at sea (SOLAS) and environmental compliance. Program Management/

Matrix Support includes Program Management and System 5.282- Engineering oversight required to manage the program and provide contractor oversight. Salaries, Benefits, Travel, Personnel Training and other government costs are included for retaining a professional acquisition workforce.		
Modification Item #4 & #5 M139 Volcano Mine Dispensing System (PEO Ammunition) - FY 2019 Base procurement dollars in the amount of \$8+5.282+.654 million supports modification of 33 volcano systems in addition to initial engineering for modification of MICLIC systems. M139 Volcano Mine Dispensing System and MICLIC System are new start programs in FY 2019.		
Modification Item #6 CBRN Soldier P.133-3.608-protection M41 PATS (PEO Joint Program Office Biological Defense) - FY2019 Base procurement dollars in the amount of \$5.282 million supports the procurement of 445 M41 Protection Assessment Test Systems (PATS) to include fielding and training of delivered systems to sustain the Army's chemical and biological protection mask fit assessment capability and mitigate obsolescence.		
Modification Item #7 Force Provider (PEO CS & CSS) - There is no FY 2019 funding for this modification item.+.133+3.608+		
Modification Item #8 Food Sanitation Center (PEO CS & CSS) - There is no FY 2019 funding for this modification item.		
MA4502: Modification Item #1 Petroleum and Water Systems (PEO CS & CSS) - FY 2019 Base procurement dollars in the amount of \$0.133 million supports the following: Petroleum and Water Systems (PAWS) will perform updates and provide replacements for obsolete instruments on t12.145he Petroleum Quality Analysis System Enhanced (PQAS-E) systems. This will ensure all systems in the field are the same configuration and have the most up to date instrumentation.		
Modification Item #2 Army Watercraft Systems (PEO CS & CSS) - FY 2019 Base procurement dollars in the amount of \$3.608 million primarily supports the correction of safety and regulatory deficiencies in the Army Watercraft Legacy Fleet which has not transitioned to sustainment, is approaching the end of Economic Useful Life (EUL) and requires Engineering change Proposals (ECPs) to maintain capability. Also supports Program Management/Matrix Support, and upgrades/modifications to Army Watercraft Systems which are completed as required to resolve any safety and/or sustainability issues, Force Protection - lethal and non-lethal Escalation of Force (EoF) issues, and technical insertions. Additionally, other watercraft modifications are supported su4ch as complex Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) modernization and technology upgrades in the replacement of obsolete systems. These modifications will gain critically required operational improvements or maintain compliance with new and/or changing federal statutory and regulatory mandates in the areas of safety of life at sea (SOLAS) and environmental compliance. Program Management/ Matrix Support includes Program Management and System Engineering oversight required to manage the program and provide contractor oversight. Salaries, Benefits, Travel, Personnel Training and other government costs are included for retaining a professional acquisition workforce.		
Modification Items #3 AN/PSS-14C (PEO Ammunition) and HMDS (PEO IEWS) - FY 2019 Base procurement dollars in the amount of \$12.145 million procures modifications to Countermeine Clearing Equipment for AN/PSS-14C (HSTAMIDS), which will extend the service life of this system, currently used in both the Continental United States (CONUS) and Outside the Continental United States (OCONUS).		
MA4504: Modification Item #1 Bridging (PEO CS & CSS) - FY 2019 Base procurement dollars in the amount of \$2.912 million supports the following Bridging upgrades: The Dry Support Bridge (DSB) 46 meter retrofit upgrade kits enabling the fielded 40 meter DSB Systems the capability to bridge gaps up to 46 meters, increasing its gap crossing capability by 15%. The Rapidly Emplaced Bridge System (REBS) technical manuals to support modifications.		
R01121: Modification Items #1 and 2 Explosive Ordnance Disposal Equipment (PEO Ammunition and PEO Joint Program Office Biological Defense) - FY 2019 Base procurement dollars in the amount of \$5.798 million procures modifications to 45 Explosive Ordnance Disposal (EOD) Response Tool Kits and 1 Dismounted Reconnaissance Sets, Kits and Outfits (DR SKO). FY 2019 OCO procurement dollars in the amount of \$19.200 million procures modifications to 109 Explosive Ordnance Disposal (EOD) Response Tool Kits and 8 Dismounted Reconnaissance Sets, Kits and Outfits (DR SKO). This modernized equipment will increase operational capabilities of EOD units, as well as enhance the safety of EOD soldiers.

Description:

This budget line funds Modifications of In-Service Equipment programs. It is used to develop material solutions and also to procure hardware and materials required to complete the modification. Modifications are performed to correct safety deficiencies; increase mission capabilities and interoperability; extend the useful life; improve supportability; upgrade existing technology; increase efficiency; improve readiness; modernization of legacy communications equipment and links; address obsolescence issues; and to meet new and/or changing statutory and regulatory requirements. By modifying existing equipment, the Army maintains a ready, supportable inventory of equipment that meets current requirements and regulations at a cost considerably below that of buying new equipment.

Modification Items #1 Material Handling Equipment (MHE) Technical Insertion (PEO CS & CSS) - FY 2019 Base procurement dollars for Material Handling Equipment (MHE) in the amount of \$0.141 million provides upgrades modifications, like new control units, to the ATLAS, RTCH and other MHE systems and supports Program Management Support costs. In addition to the base description above, the Material Handling Equipment (MHE) Modification of In-Service Equipment program funds system modifications and modernization initiatives across the MHE portfolio, to include the Rough Terrain Container Handler (RTCH); All-Terrain Lifter, Army System (ATLAS); and Light Capability Rough Terrain Forklift (LCRTF). These improvements will decrease rising sustainment costs and bridge the gap until new system procurement in future years.

Modification Item #2 Construction Equipment (CE) Tech Insertion (PEO CS & CSS) - FY 2019 Base procurement dollars for Construction Equipment (CE) in the amount of \$2.856 million procures 12 Scraper Armor Kits to support soldier survivability, vehicle reliability and deployability, vehicle operations, visibility in hostile construction areas and supports Program Management Support costs. In addition to the base description above, the Construction Equipment (CE) Modification of In-Service Equipment program funds system modifications and modernization initiatives across the CE portfolio, to include the High Mobility Engineer Excavator (HMEE); Engineer Rapid Airfield Construction Capability (ERACC) for Dozers, Graders, Scrapers; Family of Loaders (FoL); Skid Steer Loader (SSL); Hydraulic Excavators (HYEX); and Blade Leveling. These improvements will decrease rising sustainment costs and bridge the gap until new system procurement in future years.

Modification Item #3 Army Watercraft Systems (PEO CS & CSS) - FY 2019 Base procurement dollars in the amount of \$8.268 million primarily supports the correction of safety and regulatory deficiencies in the Army Watercraft Legacy Fleet which has not transitioned to sustainment, is approaching the end of Economic Useful Life (EUL) and requires Engineering change Proposals (ECPs) to maintain capability. Also supports Program Management/Matrix Support, and upgrades/modifications to Army Watercraft Systems which are completed as required to resolve any safety and/or sustainability issues, Force Protection - lethal and non-lethal Escalation of Force (EoF) issues, and technical insertions. Additionally, other watercraft modifications are supported such as complex Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) modernization and technology upgrades in the replacement of obsolete systems. These modifications will gain critically required operational improvements or maintain compliance with new and/or changing federal statutory and regulatory mandates in the areas of safety of life at sea (SOLAS) and environmental compliance. Program Management/Matrix Support includes Program Management and System Engineering oversight required to manage the program and provide contractor oversight. Salaries, Benefits, Travel, Personnel Training and other government costs are included for retaining a professional acquisition workforce.

Description:

This budget line funds Modifications of In-Service Equipment programs. It is used to procure the hardware installation cost required to complete the modification. Modifications are performed to correct safety deficiencies; increase mission capabilities and interoperability; extend the useful life; improve supportability; upgrade existing technology; increase efficiency; improve readiness; modernization of legacy communications equipment and links; address obsolescence issues; and to meet new and/or changing statutory and regulatory requirements. By modifying existing equipment, the Army maintains a ready, supportable inventory of equipment that meets current requirements and regulations at a cost considerably below that of buying new equipment.

Modification Item #1 Petroleum and Water Systems (PEO CS & CSS) - FY 2019 procurement dollars in the amount of \$0.133 million to correct safety deficiencies, increase mission capabilities and interoperability. To extend the useful life; improve, document and make changes to supportability, upgrade existing technology, increase efficiency, improve readiness, and the modernization of legacy communications equipment. To address obsolescence issues and to meet new and/or changing statutory and regulatory requirements by modifying existing equipment of systems in the petroleum and water systems portfolio.

Modification Item #2 Army Watercraft Systems (PEO CS & CSS) - FY 2019 Base procurement dollars in the amount of \$3.608 million primarily supports the correction of safety and regulatory deficiencies in the Army Watercraft Legacy Fleet which has not transitioned to sustainment, is approaching the end of Economic Useful Life (EUL) and requires Engineering change Proposals (ECPs) to maintain capability. Also supports Program Management/Matrix Support, and upgrades/modifications to Army Watercraft Systems which are completed as required to resolve any safety and/or sustainability issues, Force Protection - lethal and non-lethal Escalation of Force (EoF) issues, and technical insertions. Additionally, other watercraft modifications are supported such as complex Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) modernization and technology upgrades in the replacement of obsolete systems. These modifications will gain critically required operational improvements or maintain compliance with new and/or changing federal statutory and regulatory mandates in the areas of safety of life at sea (SOLAS) and environmental compliance. Program Management/Matrix Support includes Program Management and System Engineering oversight required to manage the program and provide contractor oversight. Salaries, Benefits, Travel, Personnel Training and other government costs are included for retaining a professional acquisition workforce.

Modification Items #3 AN/PSS-14 (PEO Ammunition) and HMDS (PEO IEWS) - FY 2019 Base procurement dollars in the amount of \$12.145 million procures modifications to Countermeasures Clearing Equipment for AN/PSS-14C (HSTAMIDS), which will extend the service life of this system, currently used in both the Continental United States (CONUS) and Outside the Continental United States (OCONUS).

Description:												
The Explosive Ordnance Disposal (EOD) Modification of In-Service Equipment will be used to modify tool kits approved for EOD use. The EOD Response Tool Kit has not been modified or upgraded for more than 25 years. The kits contain special tools and equipment that EOD units use to render safe explosive ordnance. The modification will include adding the capability to provide decontamination for teams, as well as individuals, during suspected or confirmed exposure to chemical elements, adding the capability to locate and render safe Improvised Explosive Devices (IEDs), and modifying the kit packaging into smaller, mission unique kits to provide EOD technicians the ability to perform dismounted operations. The tool kits will be fielded throughout the active Army and National Guard units. The Army Acquisition Objective (AAO) for the EOD Response Tool Kit modification is 548. In addition, the Explosive Ordnance Disposal (EOD) Modification of In-Service Equipment will be used to procure the Dismounted Reconnaissance Sets, Kits and Outfits (DR SKO).

Description:															
This program provides funding to the Army Test and Evaluation Command (ATEC) to establish, modernize, expand or replace test facilities used in production testing of General Support Equipment (including trucks, trailers, generators, soldier support equipment, etc.). It sustains Army production test capabilities through upgrade and replacement of instrumentation and equipment that is technologically and/or economically obsolete. Modernization of test instrumentation and equipment provides increased automation and efficiencies, improved data quality and quantity and cost avoidances to Army Program Managers. Programmed funding will be used to upgrade or replace production test instrumentation and equipment at Aberdeen Test Center (ATC), Aberdeen Proving Ground, MD; and Yuma Test Center (YTC), Yuma Proving Ground, AZ (including YTCs Cold Regions Test Center (CRTC), Fort Greely, AK).															
Secondary Distribution		FY 2017	FY 2018	FY 2019 Base	FY 2019 OCO	FY 2019 Total	FY 2020	FY 2021	FY 2022	FY 2023					
Army	Quantity	-	-	-	-	-	-	-	-	-	-	-

Total: Secondary Distribution	Quantity	-	-	-	-	-	-	-	-	-	-	-			
	Total Obligation Authority	1.528	2.271	2.301	-	2.301	2.344	2.411	2.479	2.525	-	-			
Justification:															
FY 2019 Base procurement dollars in the amount of \$2.301 million supports the following efforts:															
At ATC, procures modern industrial shop equipment (welding and cutting machines) used in fabrication of support items required for Production Qualification Testing (such as rotors, stands, sleighs, camera mounts and instrumentation brackets); replaces old surveying equipment with modern digital systems used for surveying test sites; provides lifecycle replacement of analytical chemistry laboratory equipment used to characterize test item materials and support failure analysis and procures new robust laptop personal computers (PC) to provide data collectors with the capability to support activities involving the acquisition, review, and processing of reliability, availability and maintainability (RAM), Integrated Logistics Support (ILS) and performance test data. PCs will give ATC the capability to use "State-of-the-Art" technologies to streamline the process involved in the acquisition, processing, and distribution of test data. At YTC, procures replacement transducers used to collect performance data during automotive tests (including sensors, load cells, thermocouple amplifiers, pressure transducers, embedded wireless sensors, strain gages, current transducers and thermocouples); replaces obsolete air delivery aircraft

Description:																	
Special Equipment for User Testing is comprised of multiple programs for the Major Operational Testing Instrumentation and Army Threat Simulator Program. Program provides funding for Major Operational Testing Instrumentation, Major Field Instrumentation for Operational Testing (OT), Force Development Testing and Experimentation (FDTE), and Army Warfighting Experiments (AWE). Initiatives are tied to tactical and instrumentation systems that support each of the five joint functional concepts outlined in the Army Modernization Plan (Force Application; Protection; Focused Logistics; Battlespace Awareness; Command and Control). The Army Threat Simulator Program procures actual foreign hardware and Non-Developmental Items (NDI) (e.g., chassis, subsystems, commercial equipment, or actual threat weapons), which are integrated into a threat simulator design for user testing and training. Budget Item procures a variety of test assets, such as Threat Battle Command Force, Threat Operations, and Advanced Jammer Suite.																	
Special Equipment for User Testing programs provides support at: Army Test and Evaluation Command (ATEC) and Operational Test Command (OTC) facilities to include Transformation Technology Directorate (TTD) at Fort Hood, TX; Fire Support Test Directorate (FSTD) at Fort Sill, OK; Airborne Special Operations Test Directorate (ABSOTD) at Fort Bragg, NC; Air Defense Artillery Test Directorate (ADATD) and Electronic Proving Ground (EPG) at Fort Huachuca, AZ; Aberdeen Test Center (ATC); Redstone Test Center (RTC); White Sands Test Center (WSTC); and Yuma Test Center (YTC).

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 Base procurement dollars in the amount of \$11.608 million procures multiple threat systems (Electronic Warfare (EW), Command, Control, and Communications, and Advanced Jamming) required to support developmental and operational testing and training of network centric threat scenarios. These threat scenarios are critical to integrating digital battlefield data collection and analysis tools that support the establishment of robust command and control capabilities. These tools will collect, store, and analyze data from this new dimension of digital command and control battlefield warfare capabilities. The Army will field Advanced Jammer capabilities to fulfill developmental and operational test requirements for ongoing Army Warfighter Assessments and Network Integration Evaluation events. Validated threat jammers are a critical element to maintaining threat EW density and realism required by Director, Operational Test and Evaluation to provide operationally relevant environments for Test and Evaluation (T&E) and training. Fielded threat capabilities are operated, maintained, and sustained as one integrated threat electronic warfare force in support of Army T&E activities, such as the Network Integration Evaluation.

Remarks:

The Advanced Jammer Suite provides current validated threat representative open air electronic attack capability that includes Frequency Follower jamming, Digital Radio Frequency Memory (DRFM) jamming, and advanced Position, Navigation and Timing (PNT) jamming in support of Army operational test and evaluation. Unit costs (comprised of prime movers, hardware and software to support Cyber Electromagnetic Activity (CEMA) and Electronic Warfare (EW)) varies due to the complexity and number of tests required for each suite. Threat requirements change rapidly based on intelligence estimates and may result in differences between procurement cycles and variations with individual articles within the same procurement cycle.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description: Program provides for procurement of spares to support initial fielding of new or modified end items. Spares are broken out as follows:																	
BS9716 / Non-PEO Spares: Procures Depot Level Reparable (DLR) secondary items from the Supply Management, Army activity of the Army Working Capital Fund. To provide initial support, funds are normally required in the same year that end items are fielded.																	
BS9721 / Defense SATCOM Sys Spares (SPACE): Spares support thirteen projects under Defense Enterprise Wideband SATCOM Systems (DEWSS) Program. Spares support the modernization and upgrade to the Modernization of Enterprise Terminals (MET) systems, Enterprise Wideband Satellite Payload Control Systems, and Digital Communications Satellite Subsystems. The projects currently supported are as follows: Radio Frequency Modulated Orderwire (RFMOW), Wideband Remote Monitoring Sensor (WRMS), Modernization of Enterprise Terminals (MET), Wideband Operation Management System (WSOMS), Replacement Patch Test Facility (RPTF), Replacement Radio Frequency Interconnecting Subsystem (RRFIS), Global Terrestrial Critical Control Circuit System (GTC3S), Remote Monitoring and Control Equipment (RMCE), Joint SATCOM Engineering Center (JSEC), Joint Management and Operations System (JMOS), Global Satellite Configuration Control Element (GSCCE), Common Network Planning System (CNPS), and Wideband Training and Certification System (WTCS).
